Disclaimer

This is not an official manual, all information here has been written based on research and user experiences of our community.

Be responsible, the creators of this manual do not take any responsibility for your investments, invest only what you can afford, registration and trial are free, but if you are not willing or cannot afford to invest any amount then it is not worth continuing this reading.

1. Introduction

Today we will take you to the discovery of a new technology based on **artificial intelligence** made by Neura Technologies, from now on we will indicate with the abbreviation NT, which is used as a method to generate profit thanks to Cashback, with **millions of active users** around the world who use it to generate their own **automatic Cashback**.

Registration is totally **free** and in addition you will have the opportunity to take advantage of a **Gift Card worth $50** to test its potential.

1.1 What is Cashback?

Cashback is a refund system in which a portion of the money spent on a purchase is returned. This concept has become popular in many contexts, especially in the world of credit cards, loyalty programs, and shopping apps. Here's how it works:

Purchase: The consumer makes a purchase using a qualifying payment method *(often a credit card or an online platform affiliated with a cashback program).*

Refund: A percentage of the amount spent is refunded. This percentage varies depending on the program or product purchased. For example, it could be 1-10% of the total amount.

Credit: The refunded money is credited to the consumer's account or via the cashback platform, usually in the form of a spendable balance or as a direct credit to the card. In some cases, it can also be accumulated to redeem vouchers or discounts.

Types of Cashback:

- **Cashback credit cards:** Some cards offer automatic cashback on all purchases or on specific categories (e.g. restaurants, fuel, supermarkets).
- **Cashback apps and platforms:** Apps such as Satispay or specific websites offer cashback for purchases made through their links.
- **Temporary promotions:** Some stores or brands offer cashback on certain products or during promotional periods.

In summary, cashback is an economic incentive that pushes consumers to spend more, but with the advantage of receiving a small portion of the money spent back.

1.2 The artificial intelligence of the NeuraBot

The NeuraBot, based on artificial intelligence, selects promising products and analyzes market trends through **Social Networks** and **Search Engines**.

Subsequently, the NT team processes this information to develop and manage advertising campaigns thanks to its affiliation with over **20,000 online stores**.

So in fact, to use the platform, you don't need any experience in marketing.

But now let's see how sales work and what is behind this mechanism.

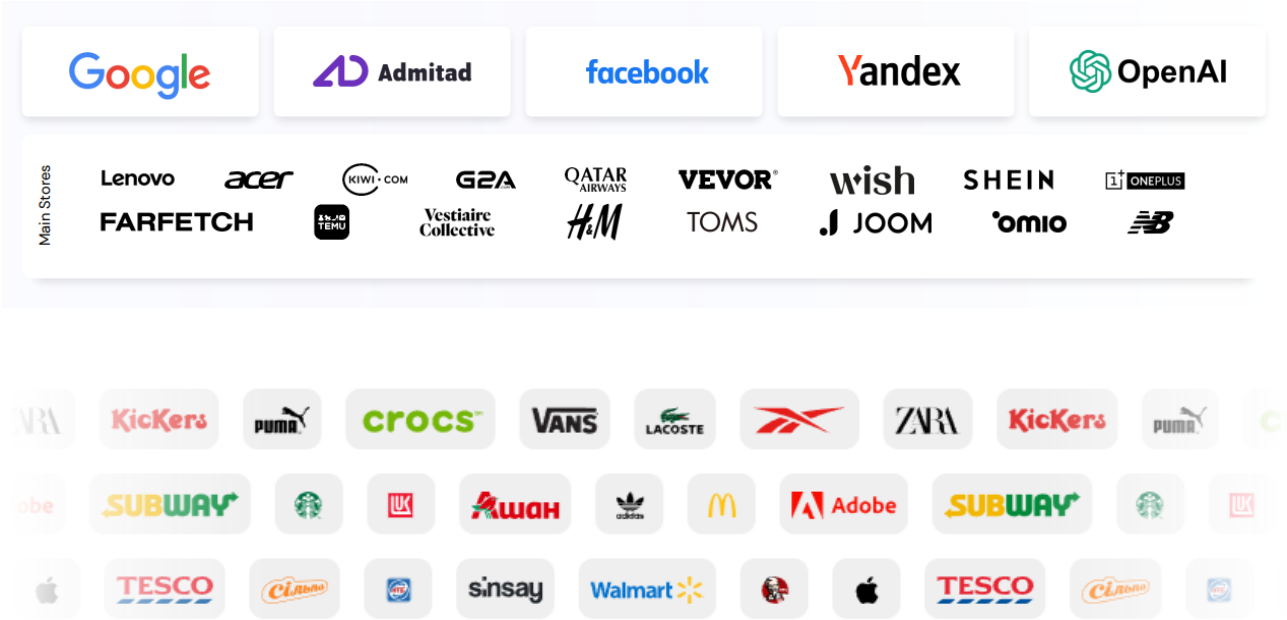
In the example below, we'll see a Buyer who purchases a $100 worth of product through an ad campaign managed by NT.

This will pay the Seller $100, since the purchase was made through an advertising campaign, the Seller will pay the Cashback, for example $11, of which $10 to the affiliate, in this case NT.

The $10 thus received are divided as follows:

- **45% ($4.50)** goes into a protection fund, which always guarantees compensation on any canceled transactions or refunded products, not making you lose a penny.
- **the remaining 55% ($5.50)** is up to you as an investor.

It has been calculated that with this method, you can earn **between 25 and 35% on the amount invested**, making NT one of the best cashback systems in existence.



2. Registration

Follow these steps carefully, they will be essential to start using the platform correctly.

Note: *For greater usability of the content, all the sample screens in this guide have been generated from a mobile device, so those using a computer or tablet may notice graphic differences in the arrangement of the content due to the type of screen used.*

2.1 Requirements

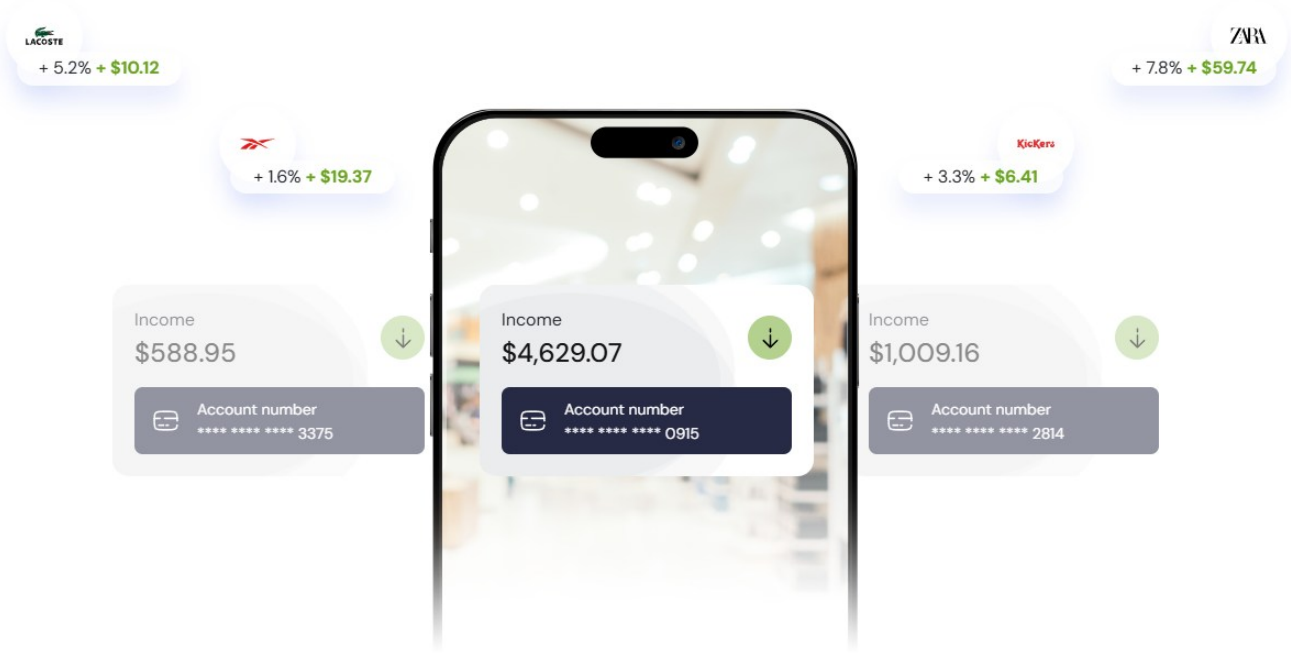
Mandatory, to test the platform for free and discover its potential:

- ✓ Have reached the age of majority
- ✓ Owning a smartphone, tablet, or computer
- ✓ Have a fixed or mobile internet connection
- ✓ A registration invitation link *(you can find one in the Create an account)*
- ✓ A gift card worth $50 *(you can find one in the Redeeming your Gift Card)*

Additional, only if you decide to continue:

- ✓ A budget with which to start buying your ad campaigns *(minimum $100, recommended $200 or more)*

If you meet all the simple requirements listed above, then you are ready to proceed with registering your account.

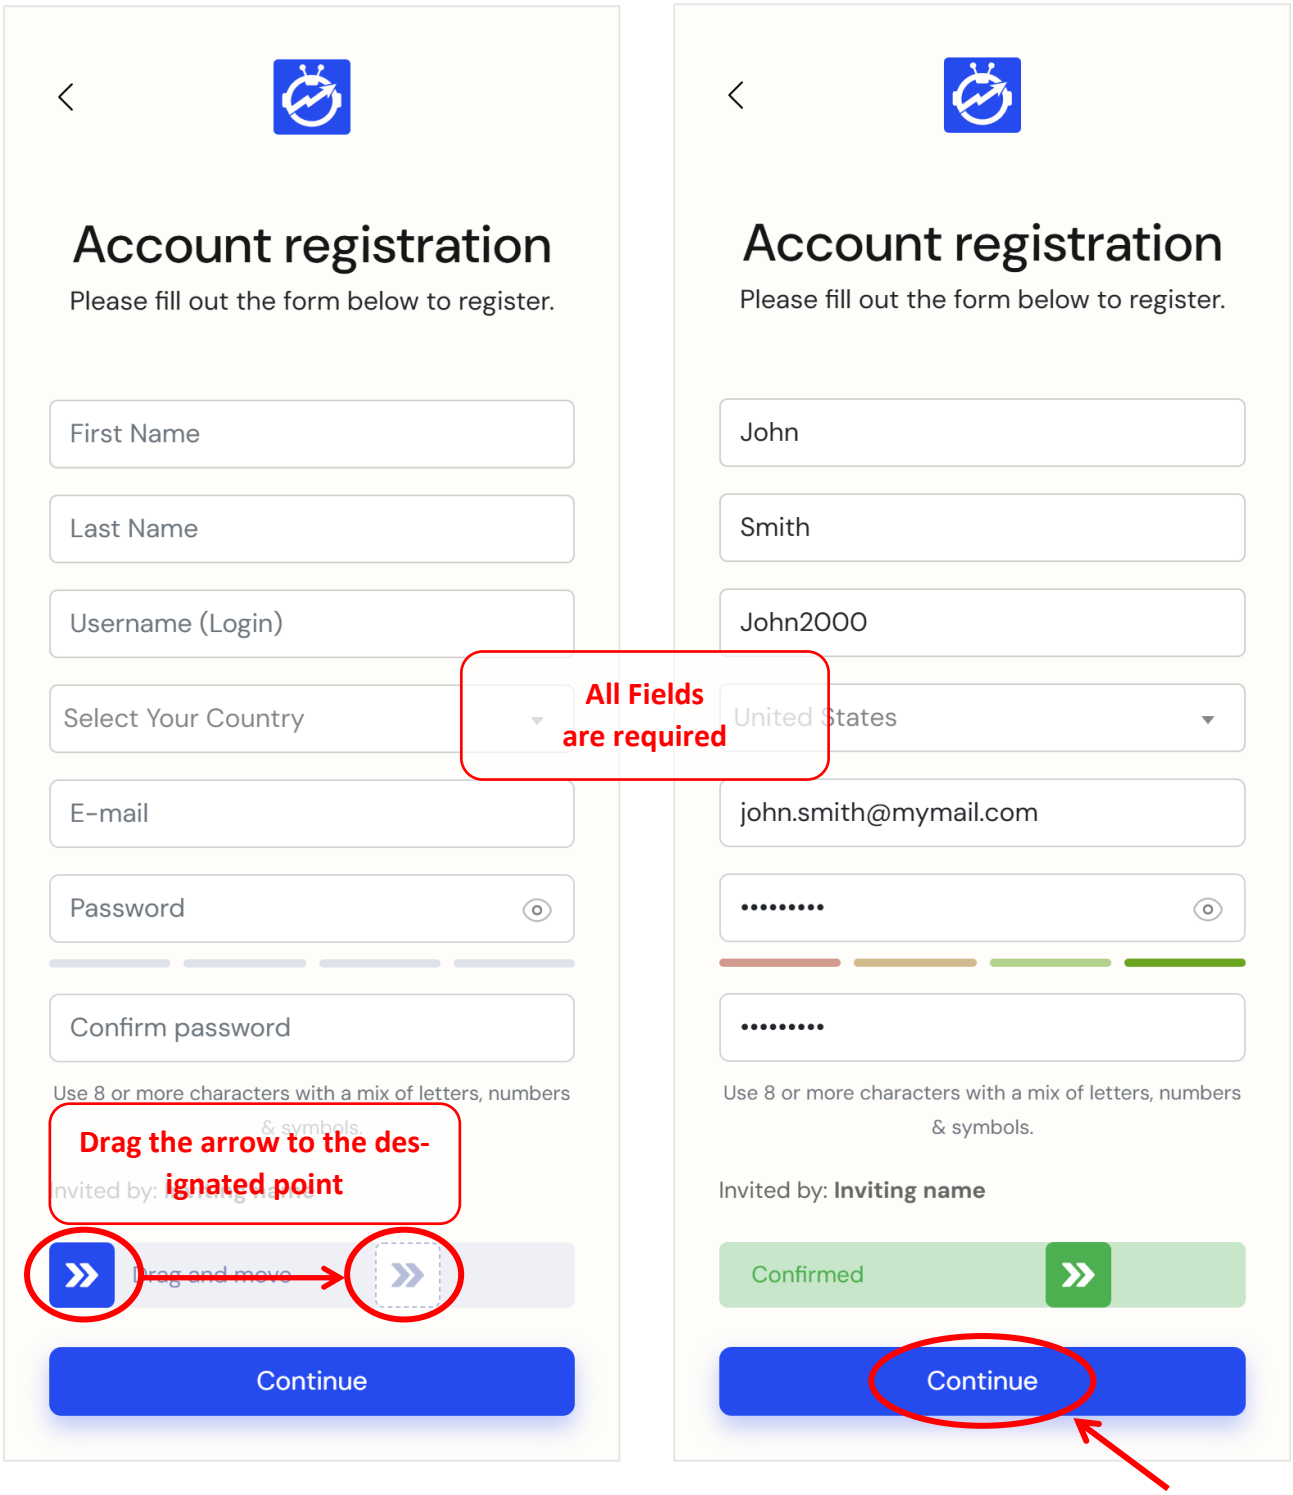


2.2 Create an account

Registration is totally **free** and thanks to the **$50 gift card** you can test the platform to discover its real potential.

If you don't already have an invitation link click here to get started, otherwise use the invitation link provided to you and follow the steps.

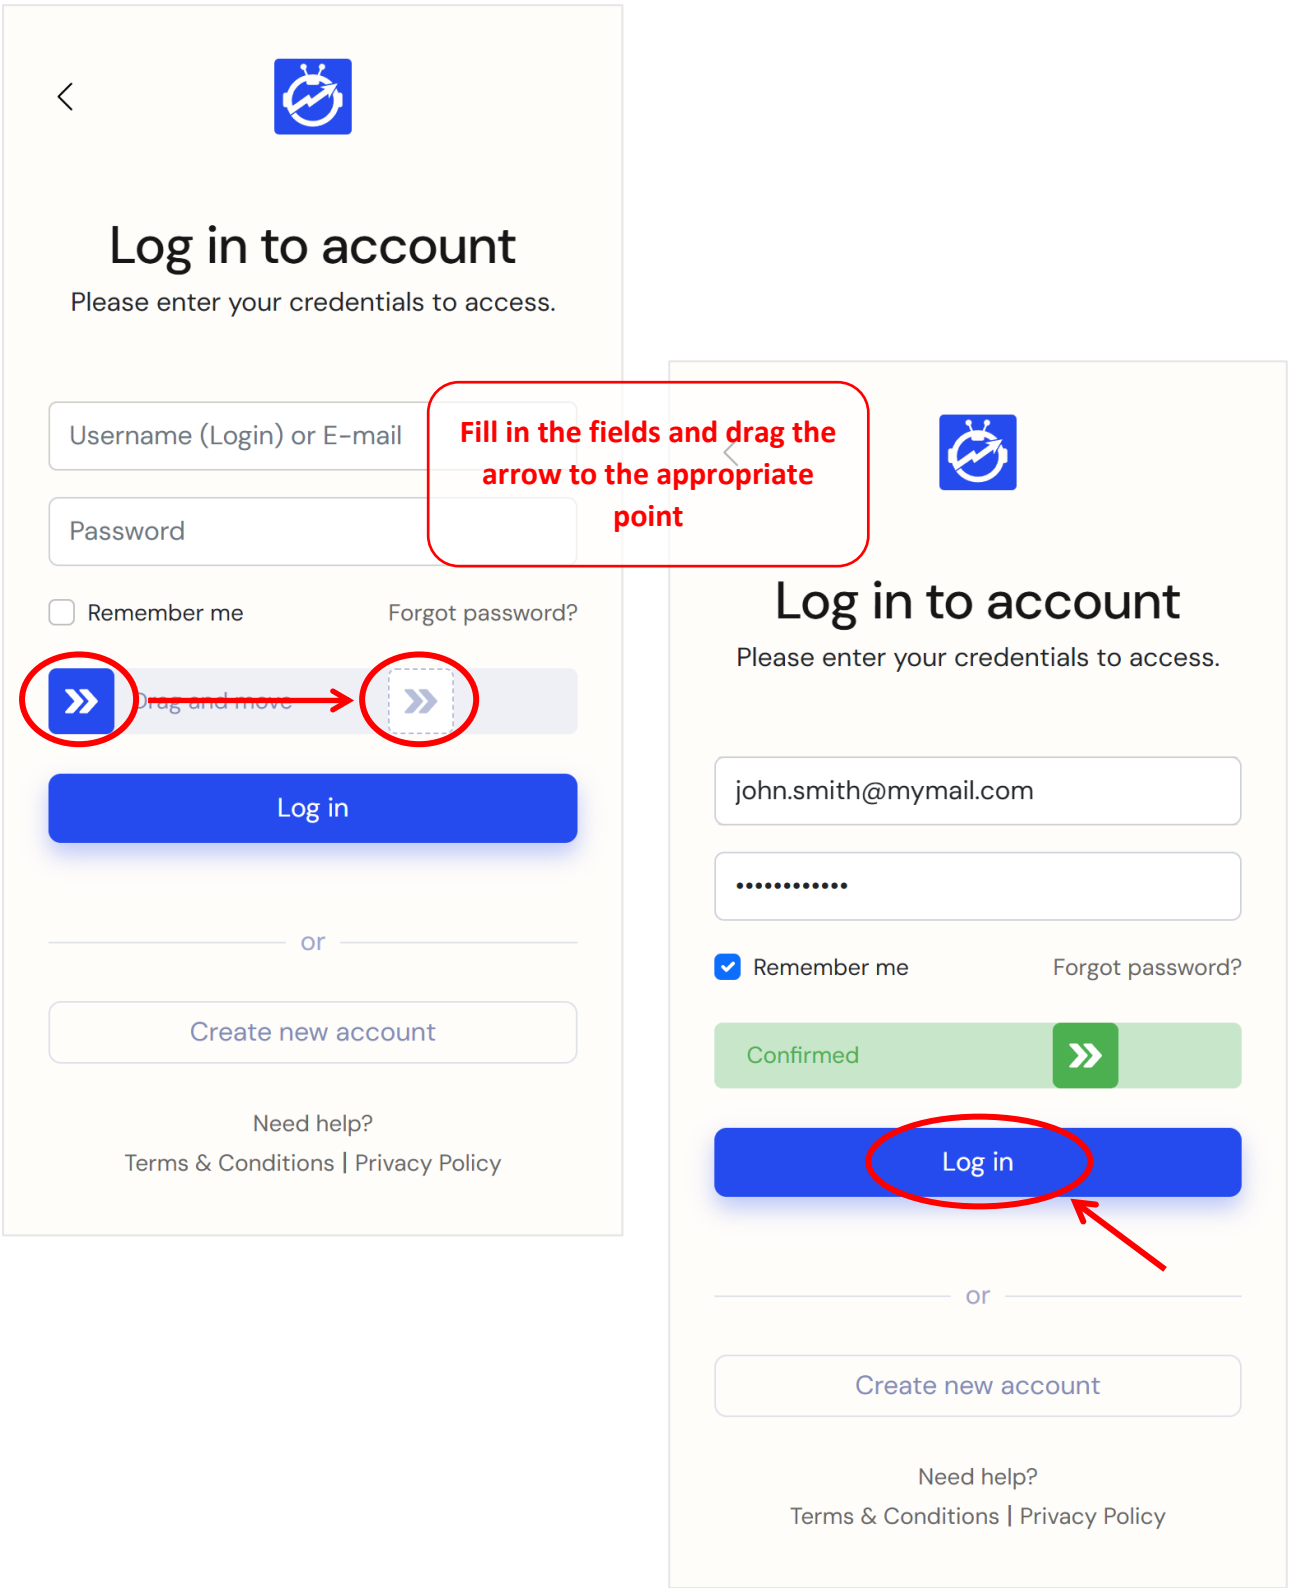
IMPORTANT: *Make sure that under "Invited by" there is the name of the person who invited you in order to redeem the $50 gift card.*



3. First access

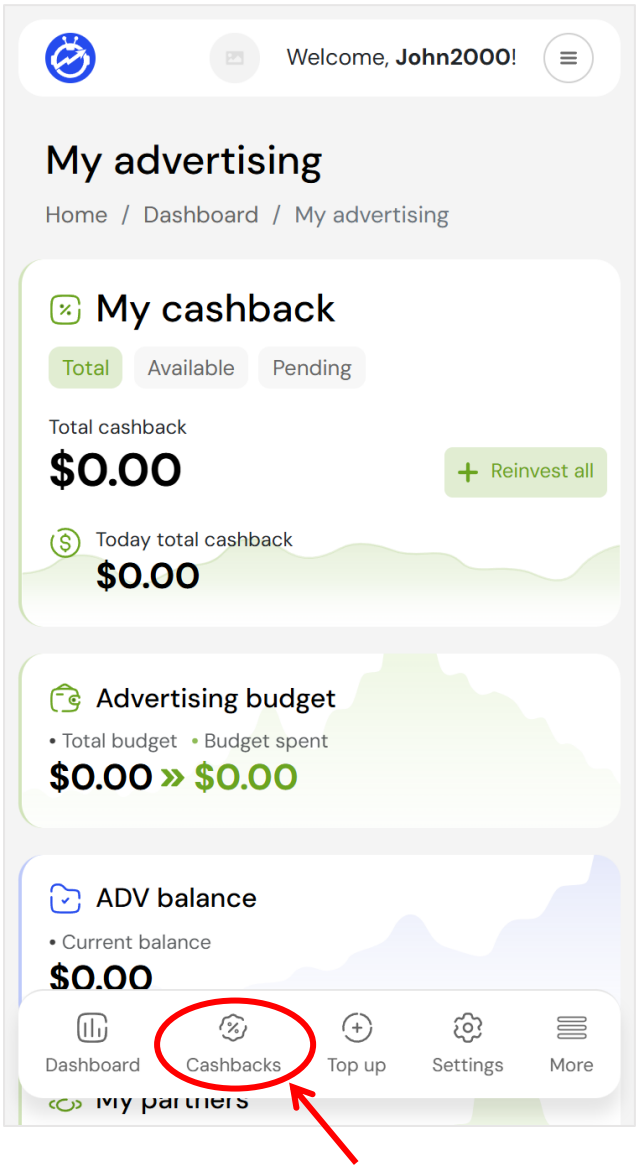
Follow these steps carefully, they will be essential to start using the platform correctly.

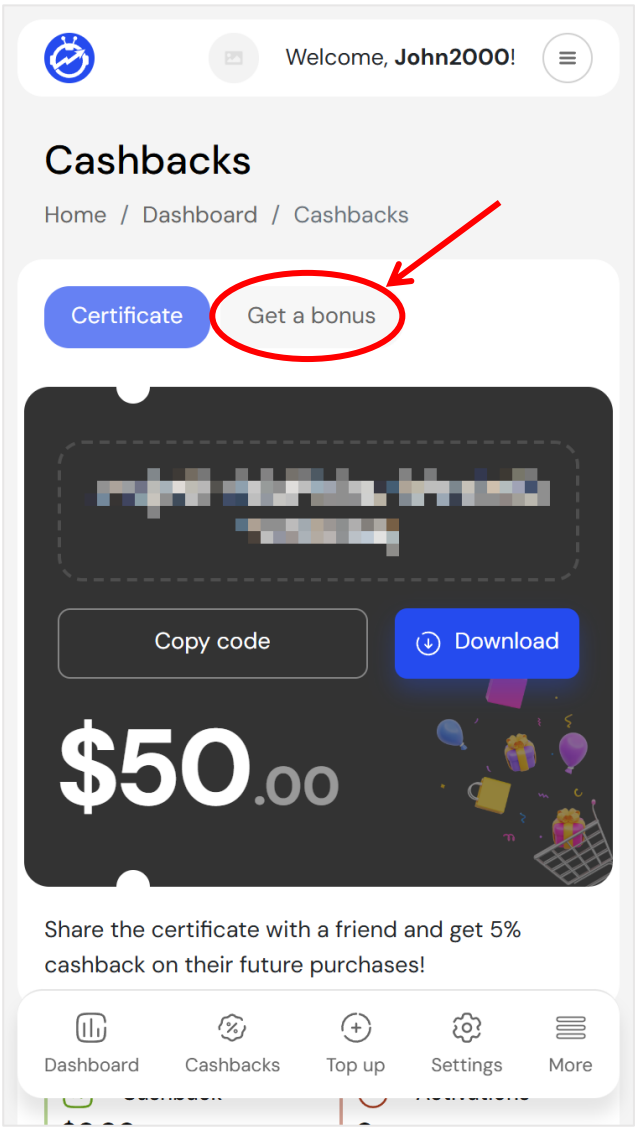
If you haven't already, log in with your credentials.

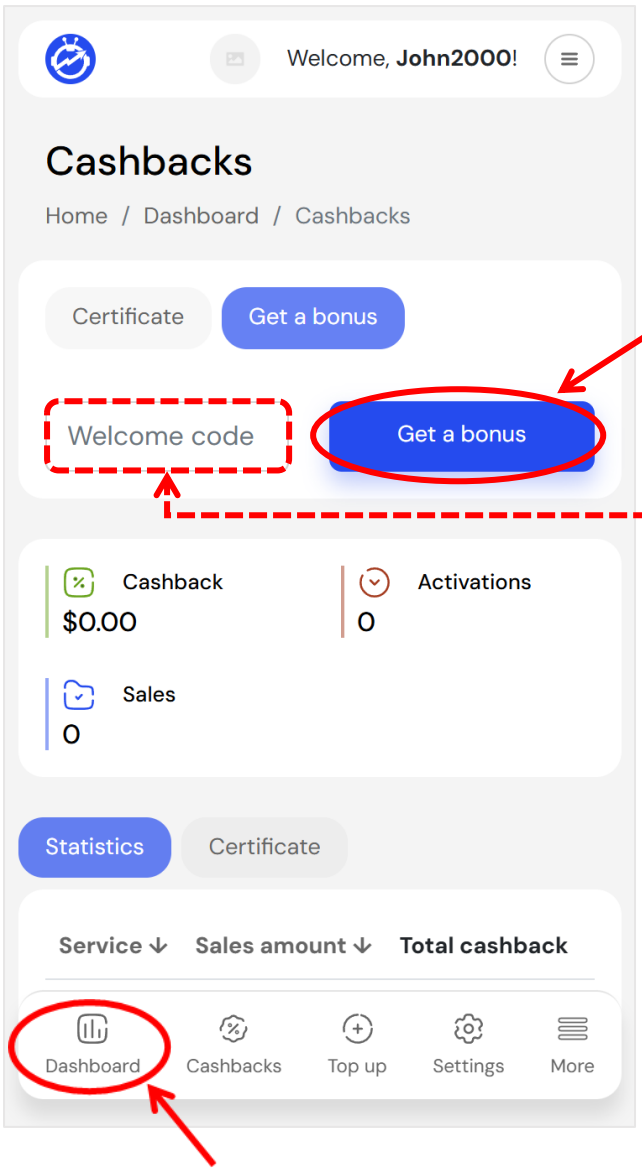


3.1 Redeeming your Gift Card

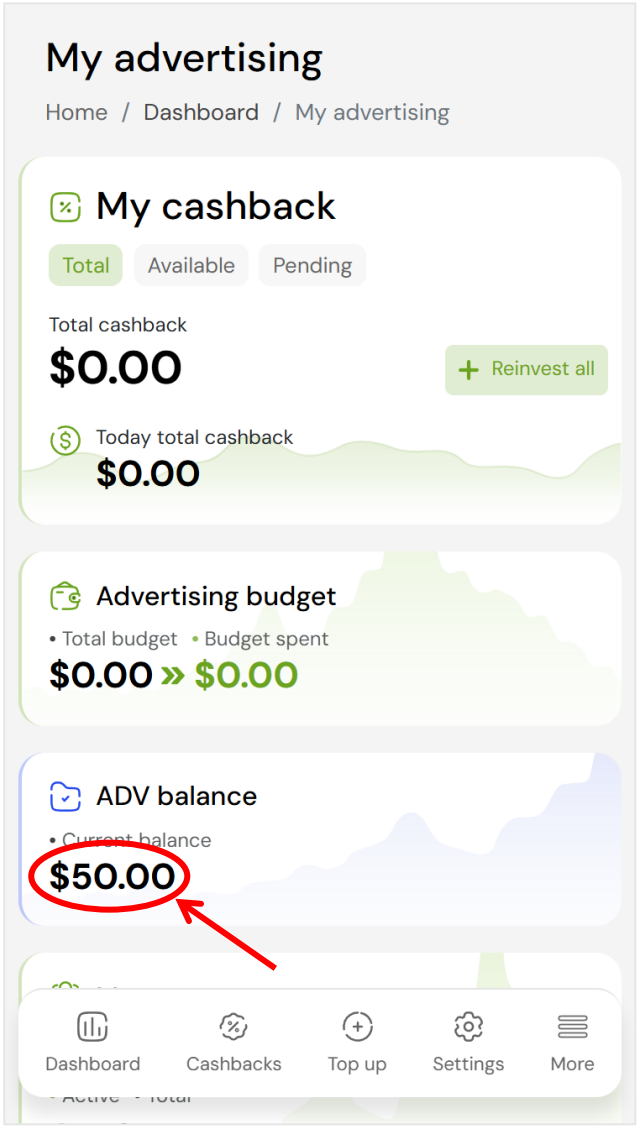
The Gift Card is a marketing tool with a face value of $50 intended for one-time use.





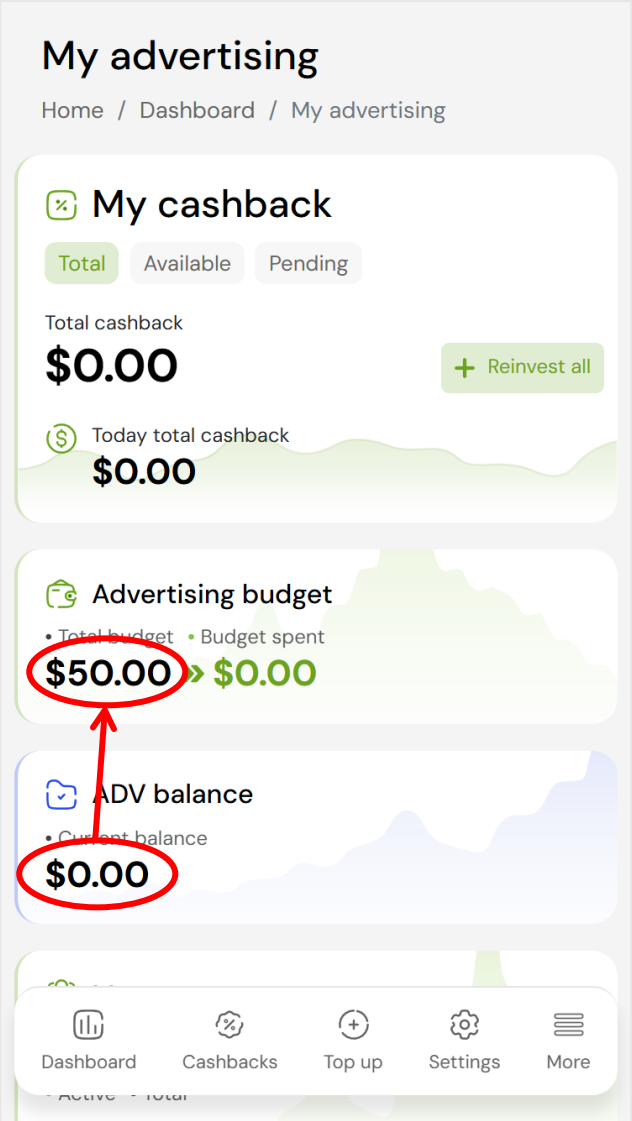


Enter a valid certificate and confirm by clicking on "Get a bonus", if you don't already have one you can use the one in the illustration.



N.B.: *Once the procedure is completed, it will take* ***24 to 48 hours*** *to approve the advertising budget, moving from the status of* ***"ADV Balance"*** *to that of* ***"Advertising budget"****.*

Only then can you move on to the next point in the guide.

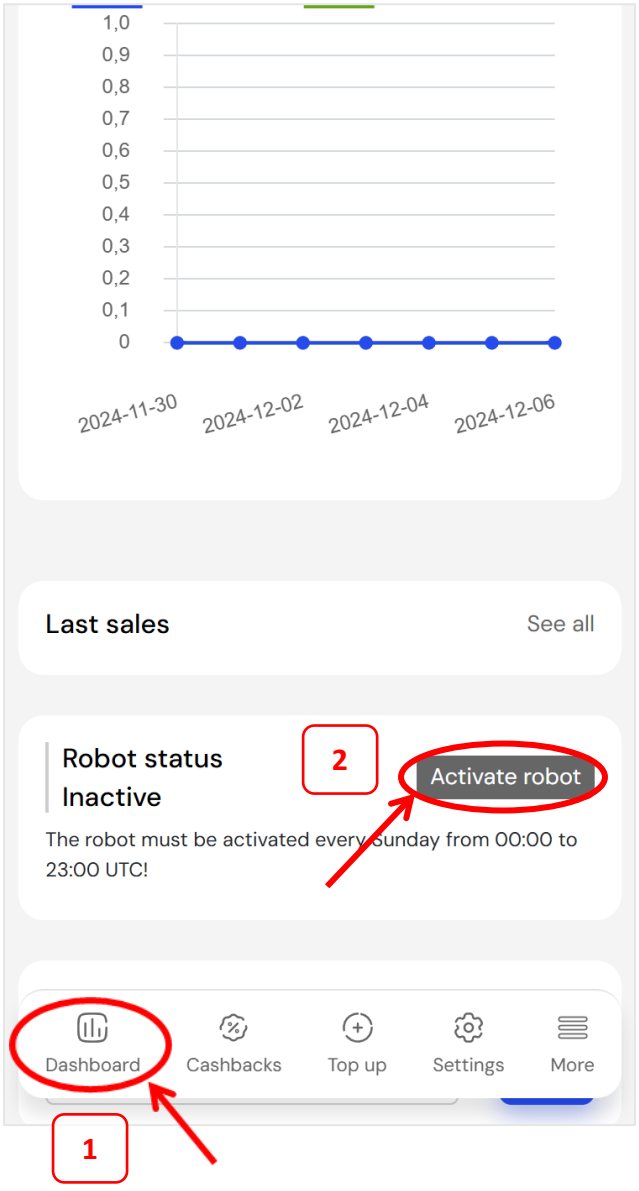


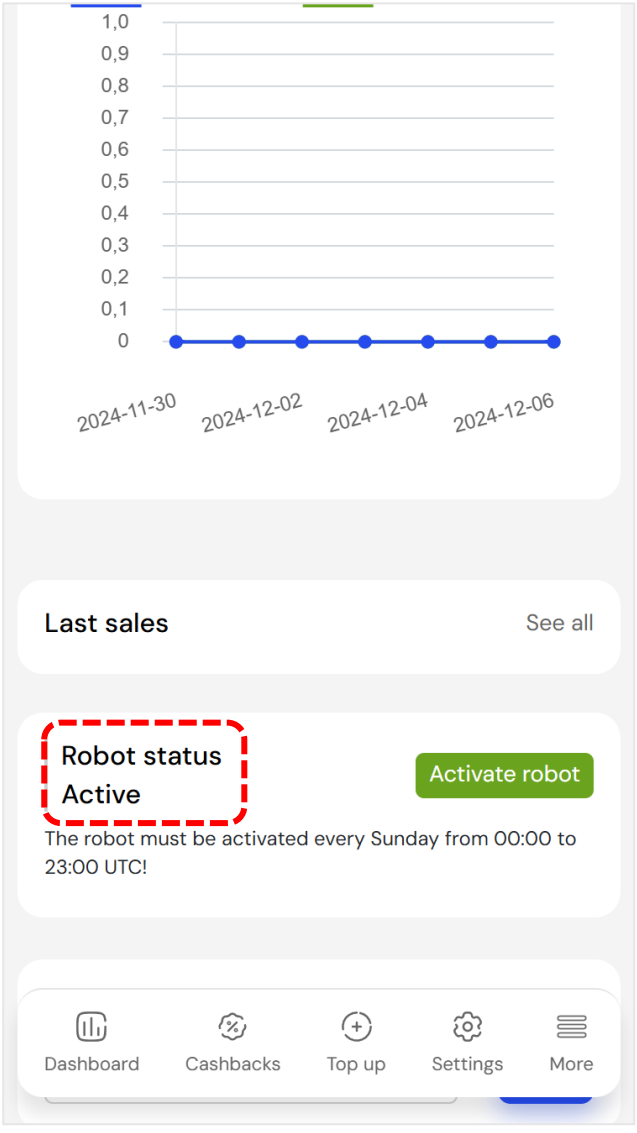
3.2 Activating the NeuraBot

After the budget has been confirmed and moved to the status of **"Advertising budget"** we can finally activate our **NeuraBot**.

To activate it, you'll need to go to your Dashboard and scroll to the bottom of the page.

*IMPORTANT: Remember that the first activation will be possible as soon as the advertising balance is available, then you will have to reactivate the NeuraBot **EVERY SUNDAY,** if you do not carry out the procedure it will not be possible to activate the NeuraBot until the following Sunday making you lose the entire week of earnings.*





4. Top up your account

After testing the platform, if you decide you want to continue earning money thanks to it, you will need to top up your account, as **the first withdrawal/reinvestment will be limited to the amount of not less than $100**, so with the use of the Gift Card alone it will not be possible to reach this threshold. **Further withdrawals/reinvestments will not be limited**.

To be sure of reaching the minimum threshold you should top up your account with a **minimum amount of $100**, but from experience and if you have the possibility, I recommend **that you top up at least $200 or more**, not necessarily at once.

Also remember that the greater the remaining *budget (not yet spent),* the greater the purchase of advertising campaigns and the greater the earnings.

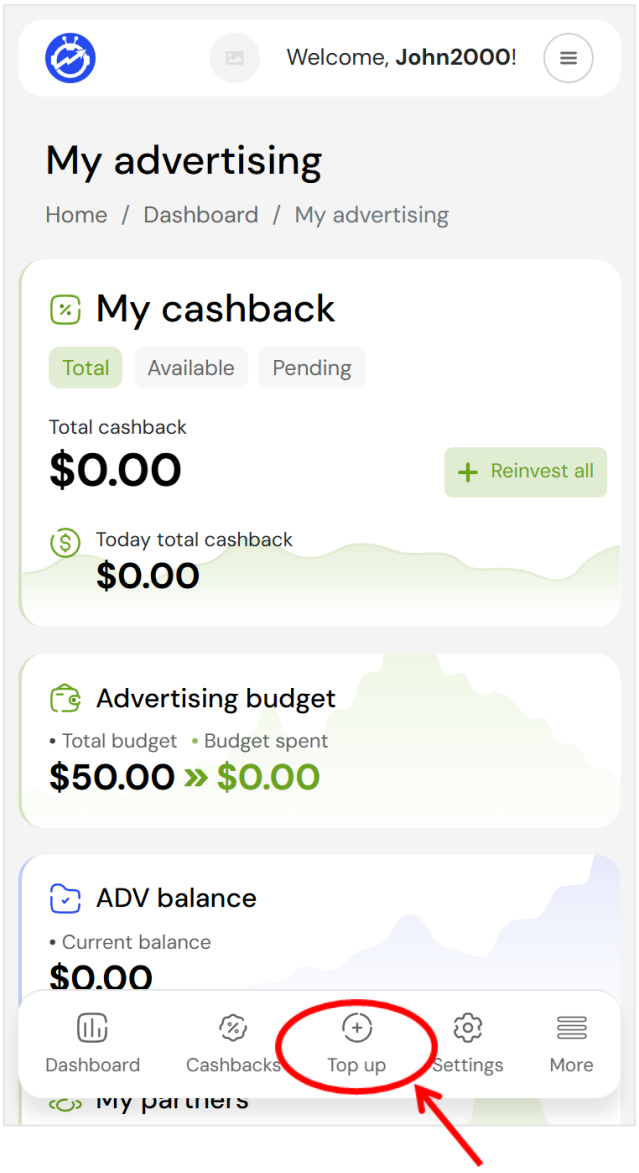
Subsequently, it will be possible **to reinvest the Cashback earned** within the platform itself, without necessarily having to recharge the account further.

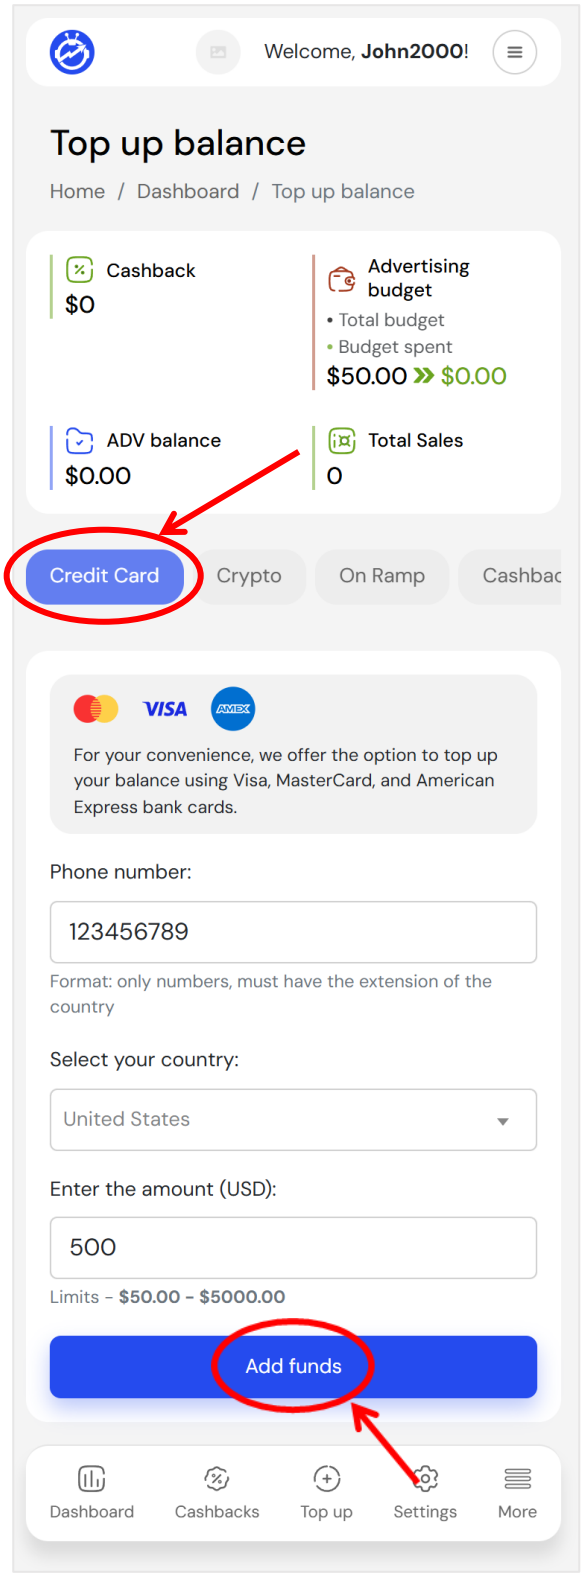
N.B.: *remember that the recharged amount will be displayed under* ***"ADV Balance",*** *for the confirmation of the new budgetand then the transition to* ***"Advertising budget"*** *you will have to wait* ***from 24 to 48 hours****.*

4.1 Top up with Credit Card

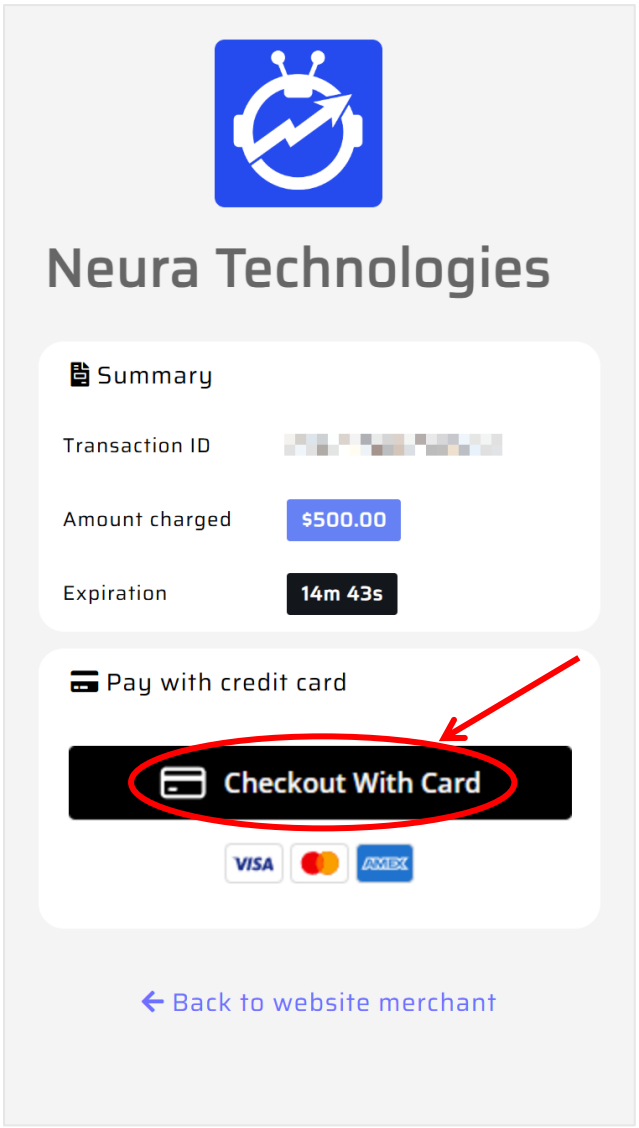
The easiest way to top up your account is definitely to use your credit card.

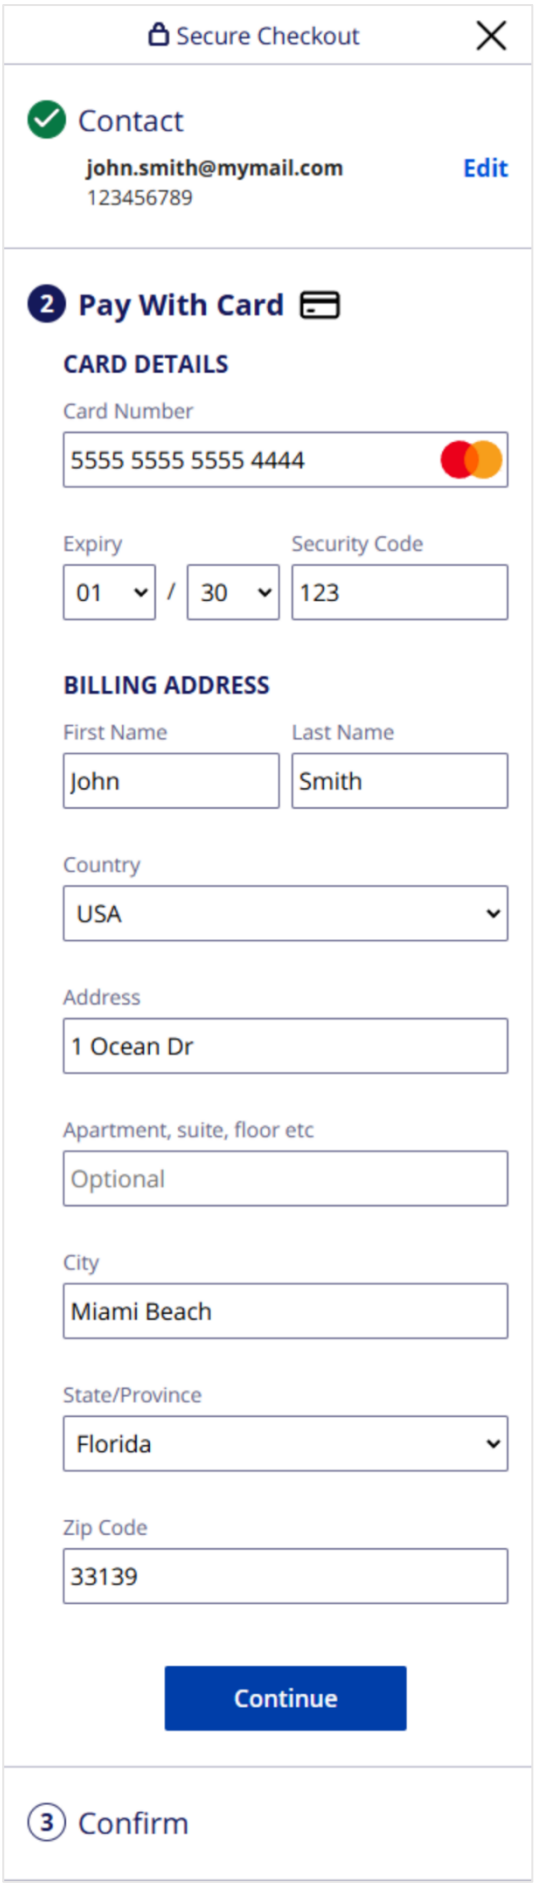
N.B.: *recharging by credit card is limited, to recharge with amounts higher than the indicated limit we recommend the use of cryptocurrencies. See the [Recharge with Crypto section](#).*





Enter the state you're from, your phone number, and the amount you want to top-up.

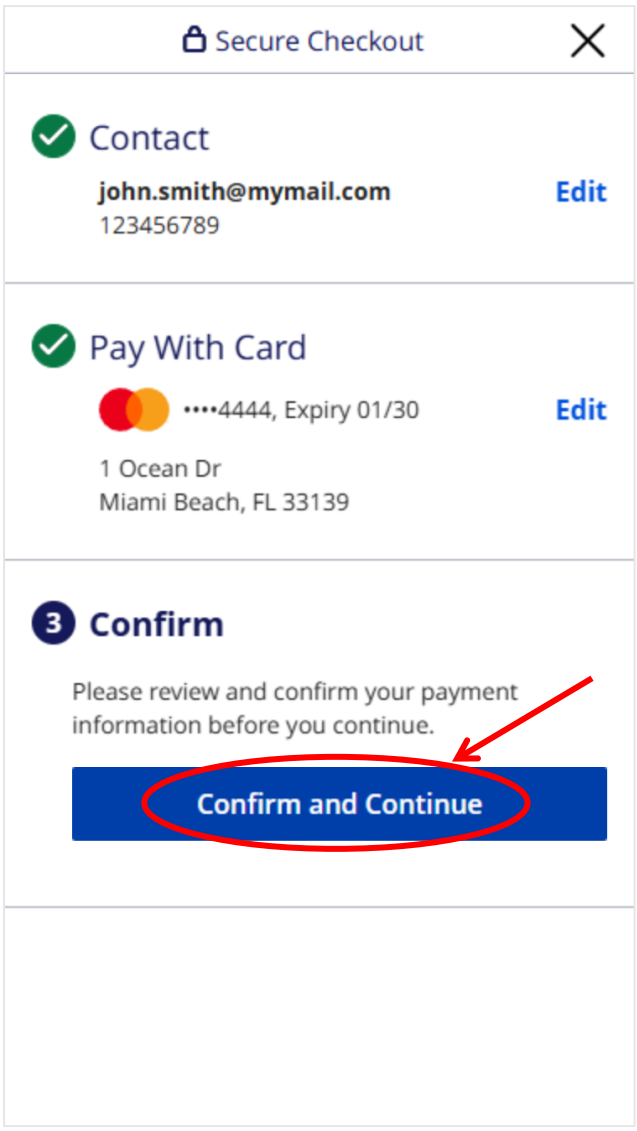




An excellent solution for your card payments is certainly the use of Revolut, which allows you to create disposable virtual cards to maximize the protection of your account.

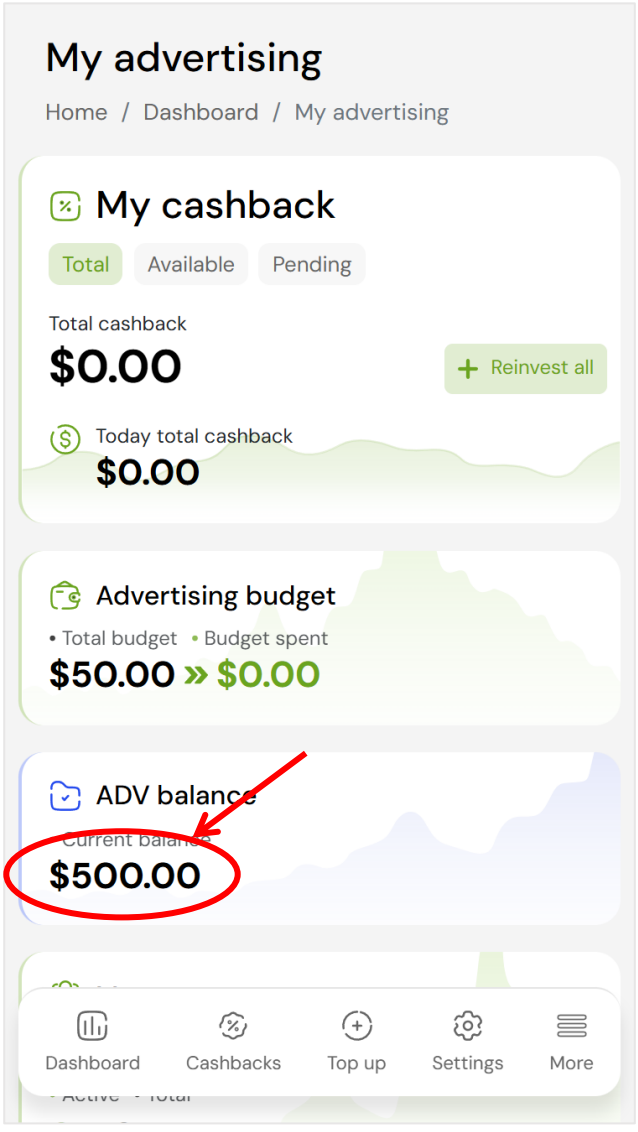
Not a member yet?

Sign up with Revolut by clicking here



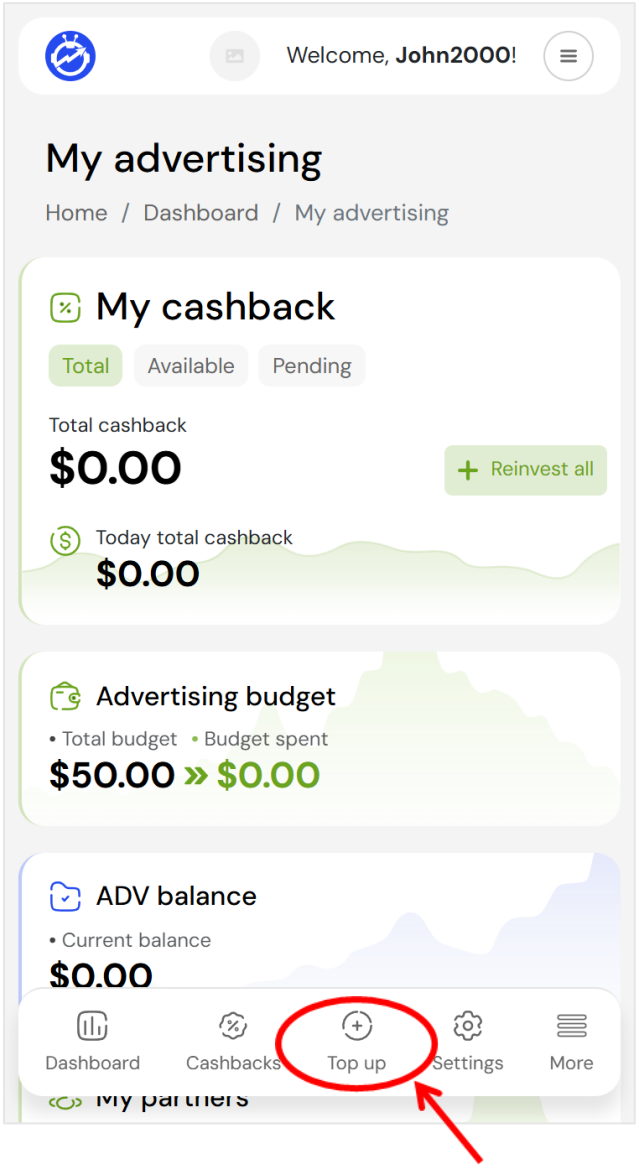
Depending on your banking provider, you may need to confirm your payment transaction via two-factor authentication via OTP code or banking app, so follow the instructions provided by your bank.

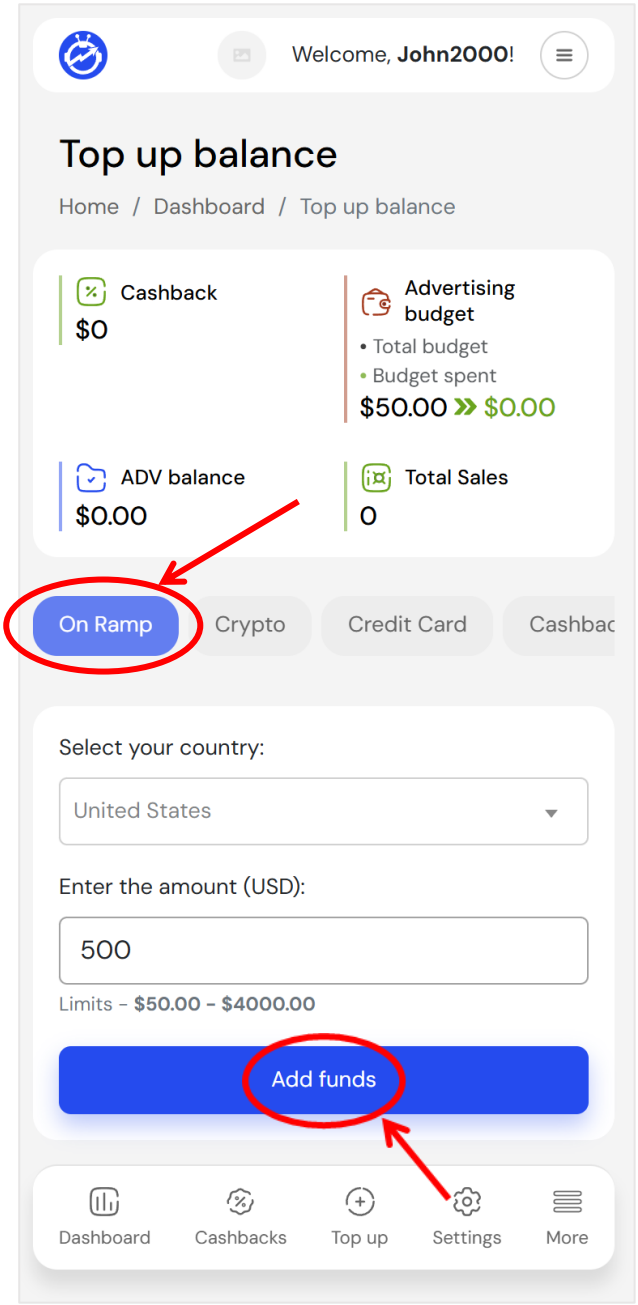
N.B.: *remember that the topped up amount will be displayed under* ***"ADV Balance",*** *for the confirmation of the new budget and then the transition to* ***"Advertising budget"*** *you will have to wait* ***from 24 to 48 hours****.*



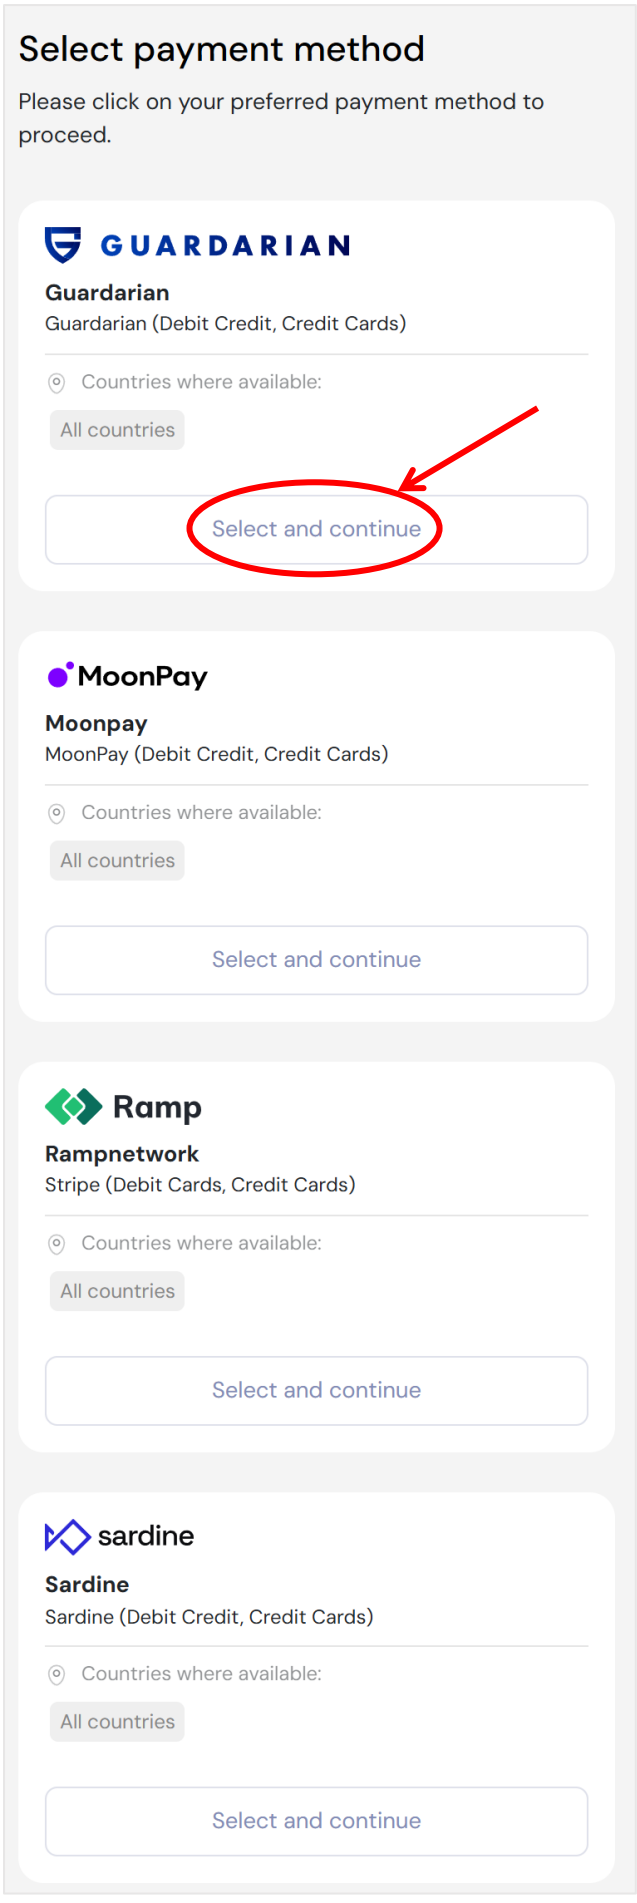
4.2 Top up with Google Pay or Revolut

You can also top up your account through third-party services such as **Google Pay** or **Revolut**.





Enter the country you're coming from and the amount you want to top-up.



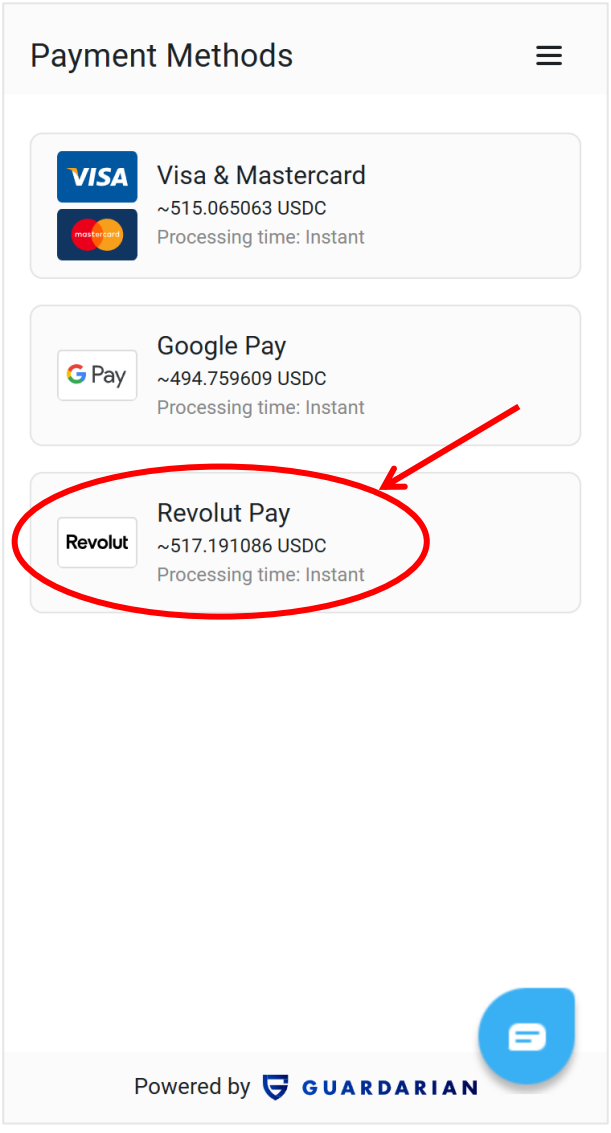
Please note that *these screenshots are for informational purposes only and may vary depending on the state from which the payment is made or any changes in the agreements between NT and the service providers.*

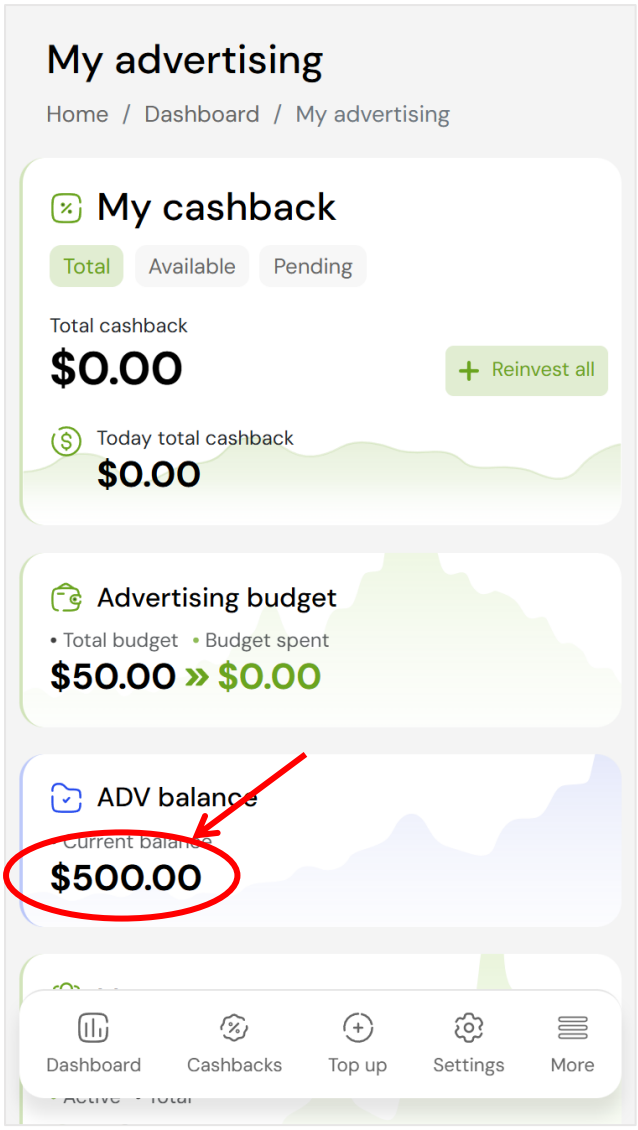
Select which platform to transact with, and always check what the best conditions are in terms of transaction taxation for any provider.

An excellent solution for your card payments is certainly the use of Revolut, which allows you to create disposable virtual cards to maximize the protection of your account.

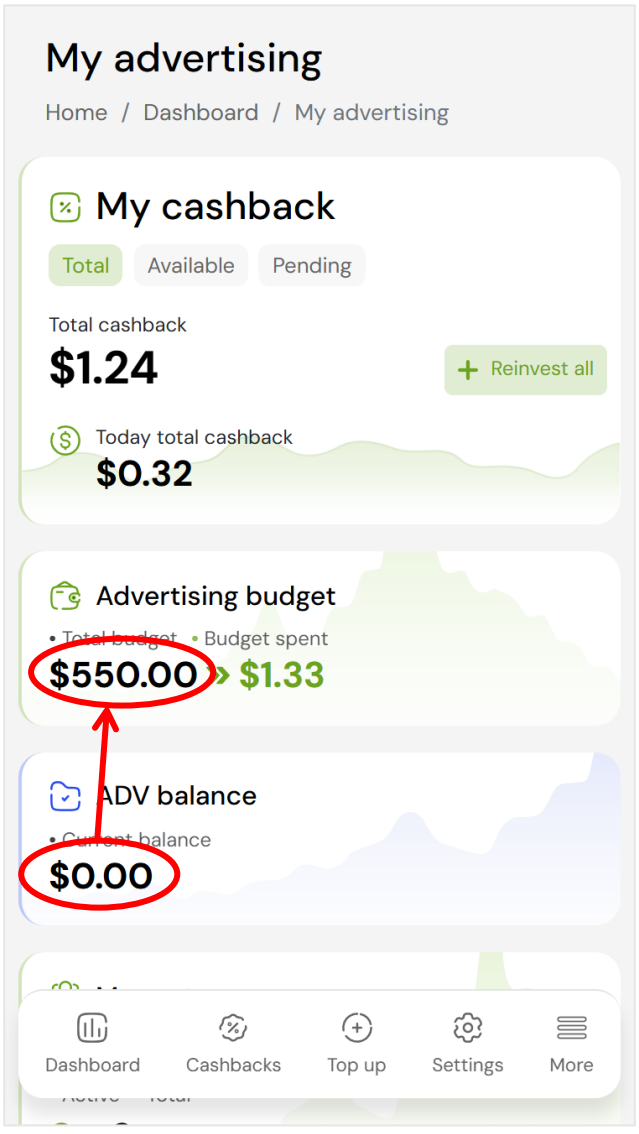
Not a member yet?

Sign up with Revolut [by clicking here]





Depending on your banking provider, you may need to confirm your payment transaction via two-factor authentication via OTP code or banking app, so follow the instructions provided by your bank.



N.B.: *remember that the recharged amount will be displayed under "ADV Balance", for the confirmation of the new budget and then the transition to "Advertising budget" you will have to wait from 24 to 48 hours.*

4.3 Recharge with Crypto

This is not a guide on crypto, it is assumed that you know how to use them, if not, we advise you to inform yourself before starting, you can find multiple guides on the subject online.

If you are new to this world, however, I can recommend the use of a **"Hot Wallet"** for greater security and ease of use, you can choose it from one of the certified service providers you find below.

- Sign up with Binance by clicking here
- Sign up with Crypto.com, by clicking here
- Sign up with Coinbase by clicking here

Note: *The example below is purely illustrative, the procedure varies depending on your cryptocurrency platform.*

5. Let's learn to understand the NeuraBot

The operation of the NeuraBot is complex. But knowing at least the basics to understand what is shown to us will be very useful to understand how our advertising budget is managed.

5.1 My Advertisement

This section shows a general overview of your robot's status.

My cashback:

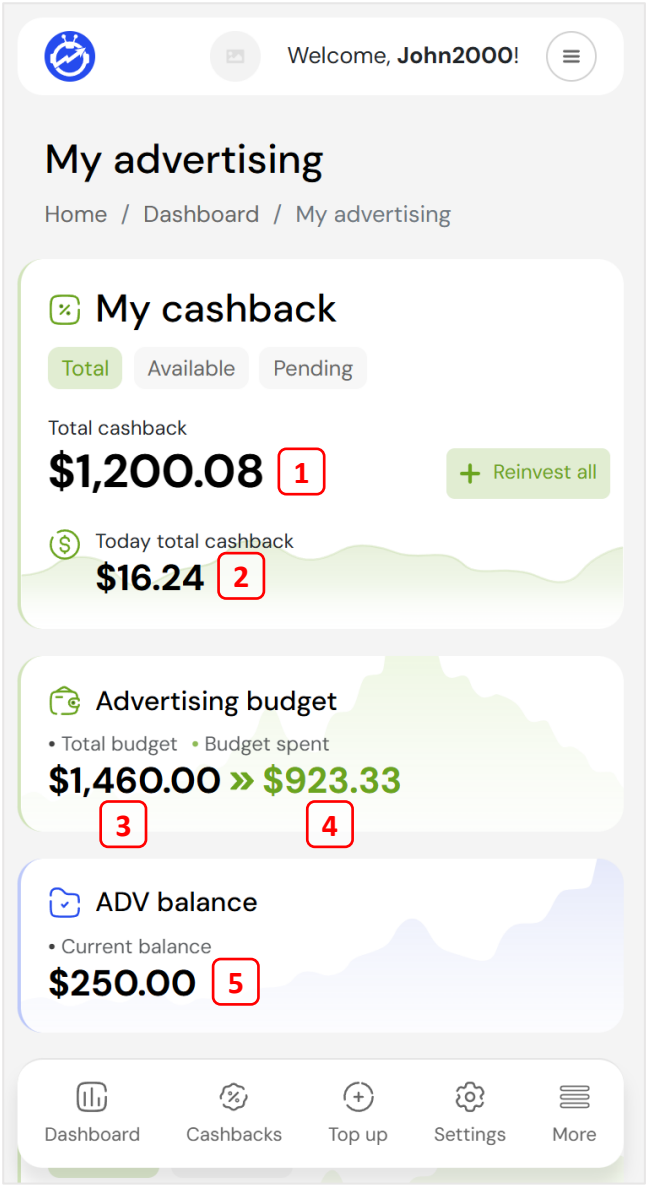
1. **Total cashback:** the Cashback accumulated so far.
2. **Today total cashback:** The Casback accumulated today.

Advertising budget:

3. **Total budget:** The total budget of your ad campaigns.
4. **Budget spent:** the budget spent so far.

ADV Balance:

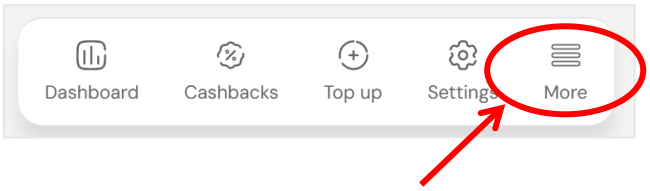
5. **Current balance:** the budget added during the confirmation phase. ***N.B.:*** *For the confirmation of the new budget and therefore the transition to* ***"Advertising budget"*** *you will have to wait* ***from 24 to 48 hours****.*

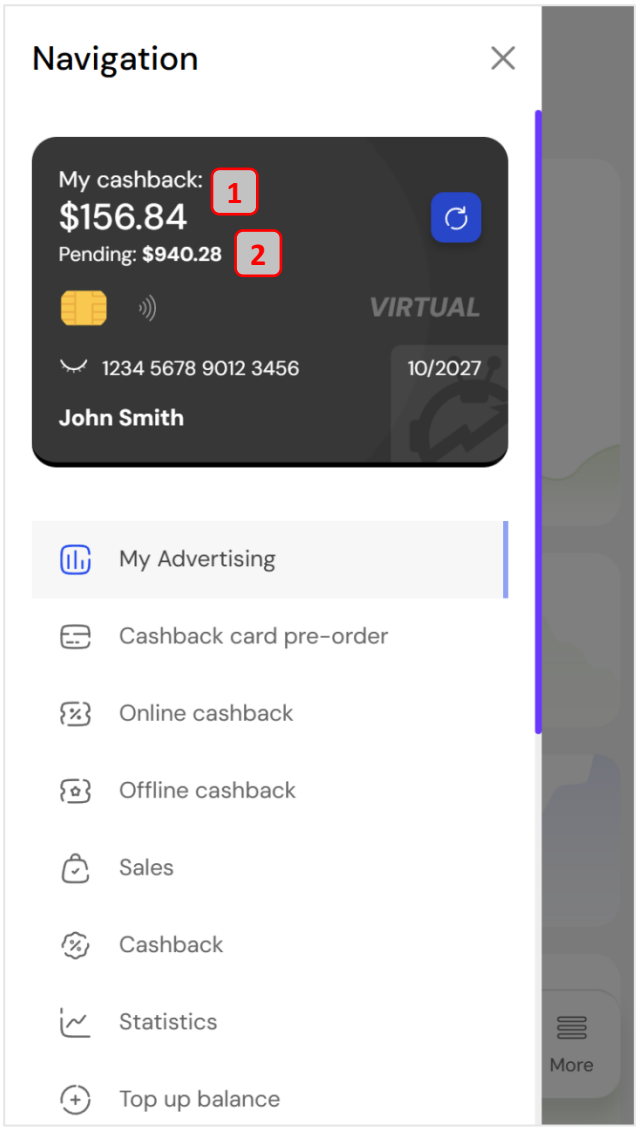


5.2 The Cashback Card

The **Cashback card** will be issued by NT exclusively to those who request it. Directly linked to **the balance of your Cashback account** you can use it to make purchases both online and in physical stores, currently in its **VIRTUAL version** it represents the status of your account.

Currently, any costs and times for the release are not known.



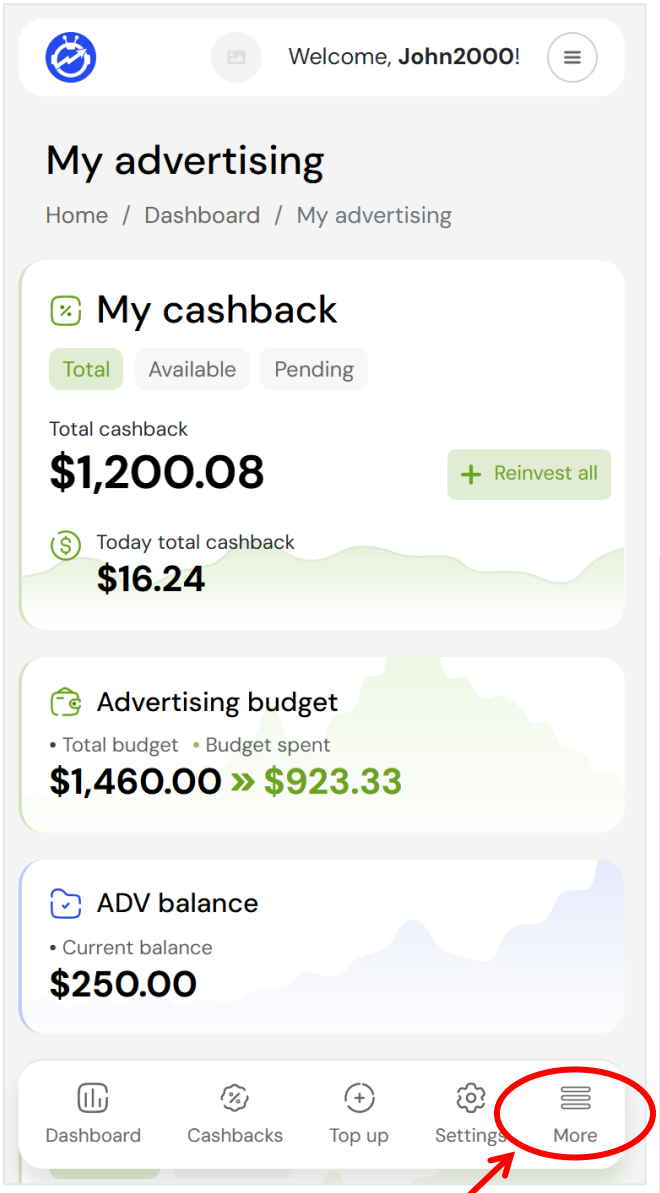


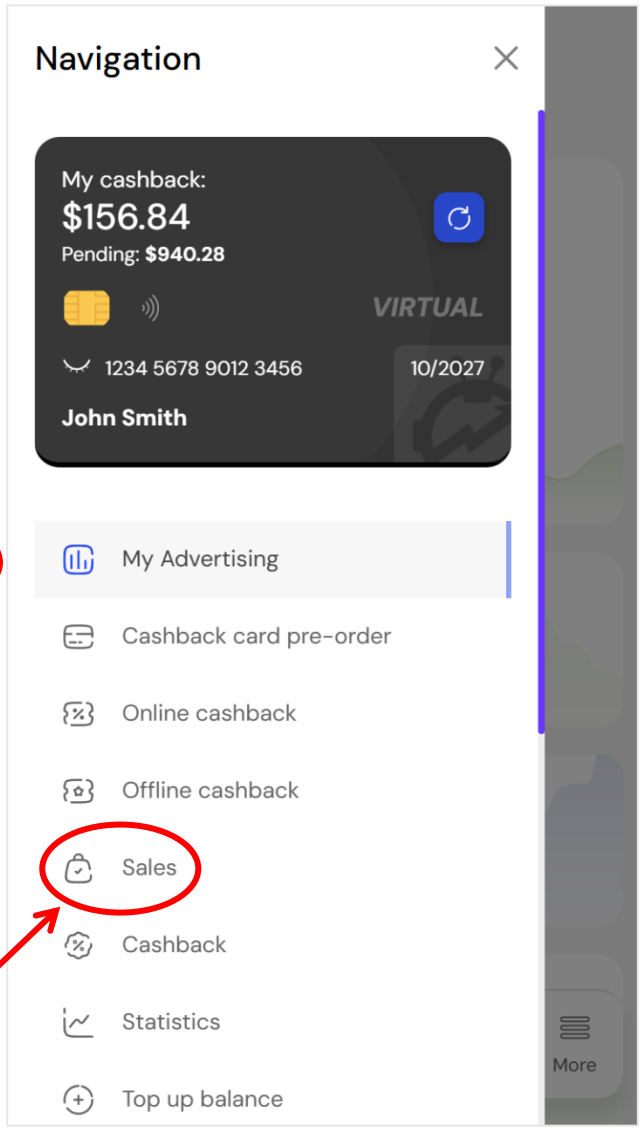
1. **My Cashback:** it is the confirmed balance on your account, you can decide whether to withdraw or reinvest it.
2. **Pending:** it is a part of the Cashback account that contains the amount of remuneration for purchases that have not yet been confirmed by aggregators.

In addition, the Cashback card is **valid for 3 years**, once it has expired to continue to enjoy the benefits of the platform it will be necessary to confirm its renewal.

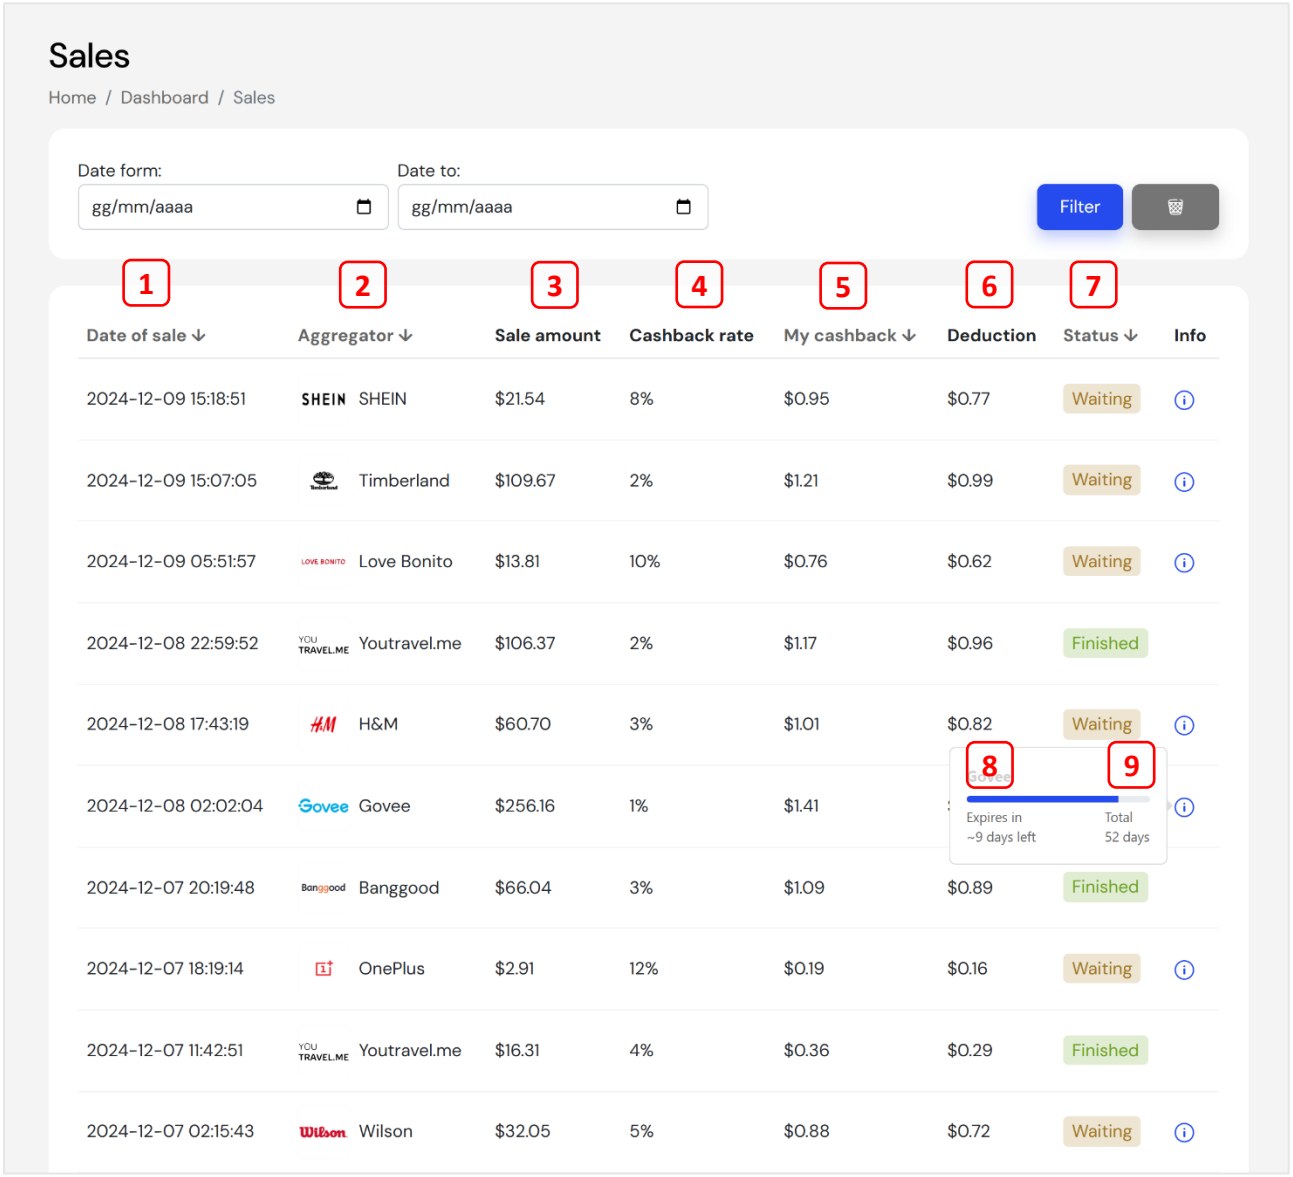
5.3 Sales

Now you will see examples of sales, now we will understand what we have earned and when our Cashback will arrive.





1. **Date of sale:** The date of the sale in UTC format.
2. **Aggregator:** The store to which the sale was made.
3. **Sale amount:** the total amount of the sale.
4. **Cashback rate:** percentage of profit on the sale.
5. **My cashback:** your earnings, equivalent to 55% of the Cashback received.
6. **Deduction:** the gain of NT equivalent to 45% of the Cashback received and mainly constitutes the company's profits. A part of this percentage is taken and goes to a protection fund. This is used as a guarantee in the event of a return of the product or other possible eventualities.
7. **Status:** can be "Waiting" or "Finished".
8. **Info / Expires in:** time remaining to obtain the Cashback. ***Note:*** *This symbol (~) means approximately.*
9. **Info / Total:** total expected time to confirm the Cashback. Depending on the Cashback program, it can take **anywhere from 16 to 60 days** or even more.



6. Cashback on personal purchases

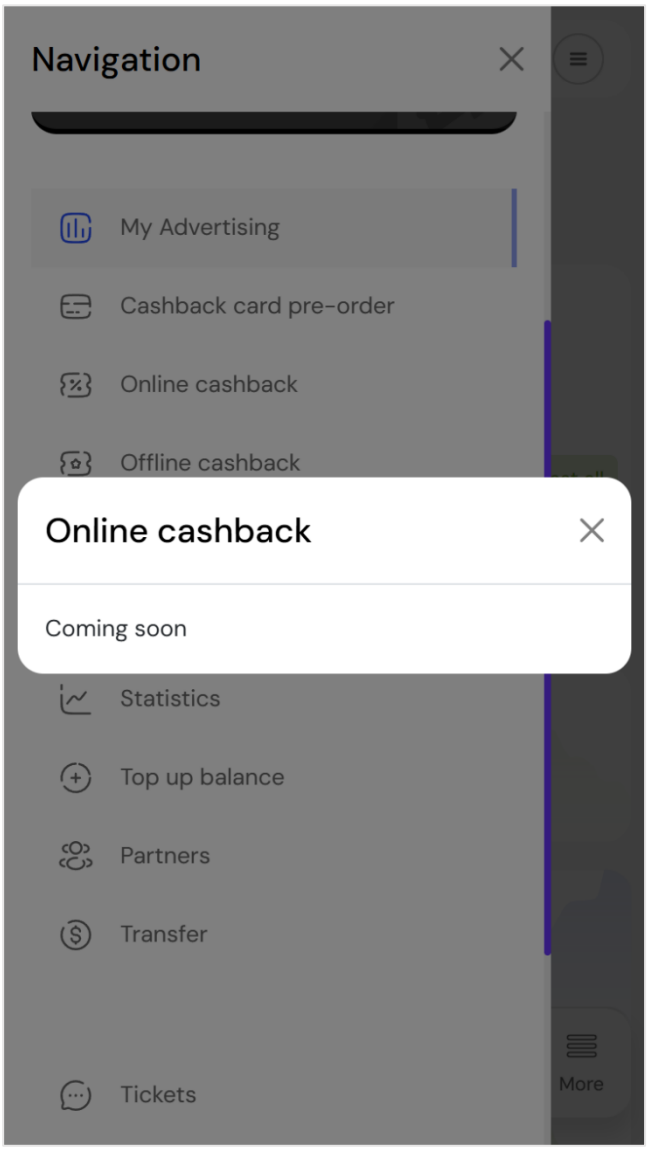
You don't just earn Cashback by investing your own money but also via your personal purchases made in one of the **20,000 affiliated online and offline stores** .

6.1 Online shopping

Online purchases are those that are made on the internet, such as **Temu**, **Aliexpress** etc...

Currently, online purchases are not available, the company has stated that they will be activated in **April 2025**.

As soon as they are available you will be notified through the official channels of NT or thanks to the new edition of this guide.



6.2 Offline shopping

Offline purchases are those that are made in a **tax store**, basically when you go shopping or get food at fast food.

In order to take advantage of cashback from offline purchases, it will be necessary to make the payment in an affiliated store, exclusively with the card you have registered on the platform.

After that you will have **to scan or photograph the purchase receipt** that will be provided to you by the merchant, where the last 4 numbers of your card that you used for payment will be indicated, and send it to the verification system to obtain cashback.

Offline purchases are currently not available, the company has stated that they will be activated in **April 2025**, but it is possible to fill in the data for future use.

As soon as they are available you will be notified through the official channels of NT or thanks to the new edition of this guide.

6.3 Applying for the Physical Cashback Card

The Cashback card *(physical)* is a debit card that NT will issue to those who request it. Directly linked to the balance of your Cashback account, you can use it to **make purchases both online and in physical stores**.

To request it, it will be necessary to fill in the data for **KYC verification**.

*"**KYC (Know Your Customer)** is the process by which companies verify the identity of their customers to prevent fraud, money laundering, and other illegal activities.*

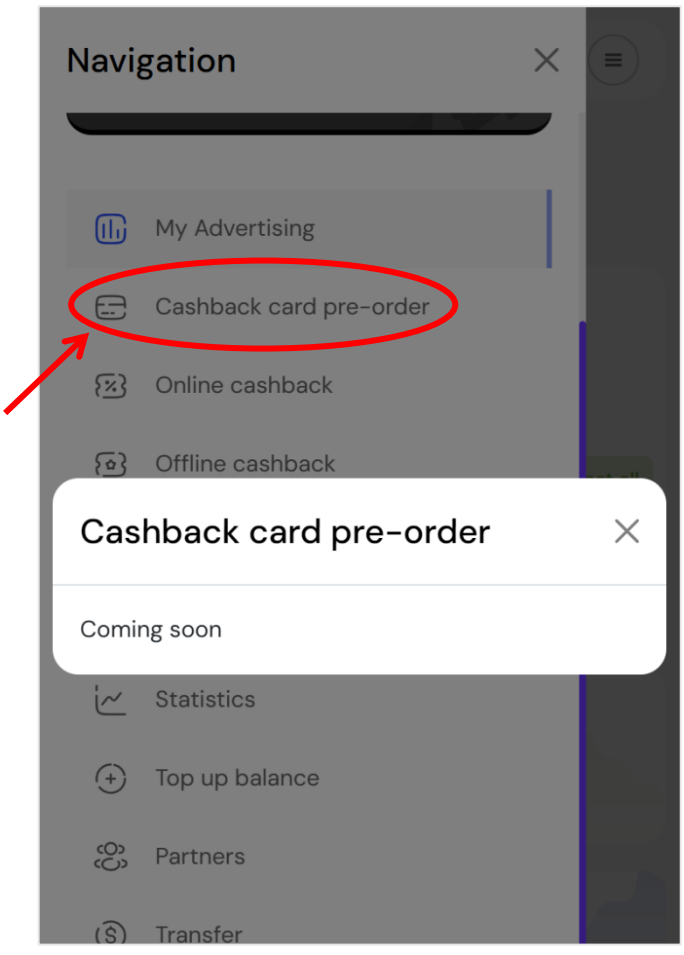
It is mainly used in the financial sector (banks, cryptocurrencies, payment institutions) and consists of the collection and verification of documents such as:

- ***Proof of identity** (identity card, passport, driver's license)*
- ***Proof of residence** (utility bill, bank statement)*
- ***Selfie with ID** (to verify that the person is real)*

KYC is often a regulatory requirement imposed by financial regulators to ensure the safety and transparency of transactions."

(Source: ChatGPT)

Currently, the times and costs have not yet been made available.



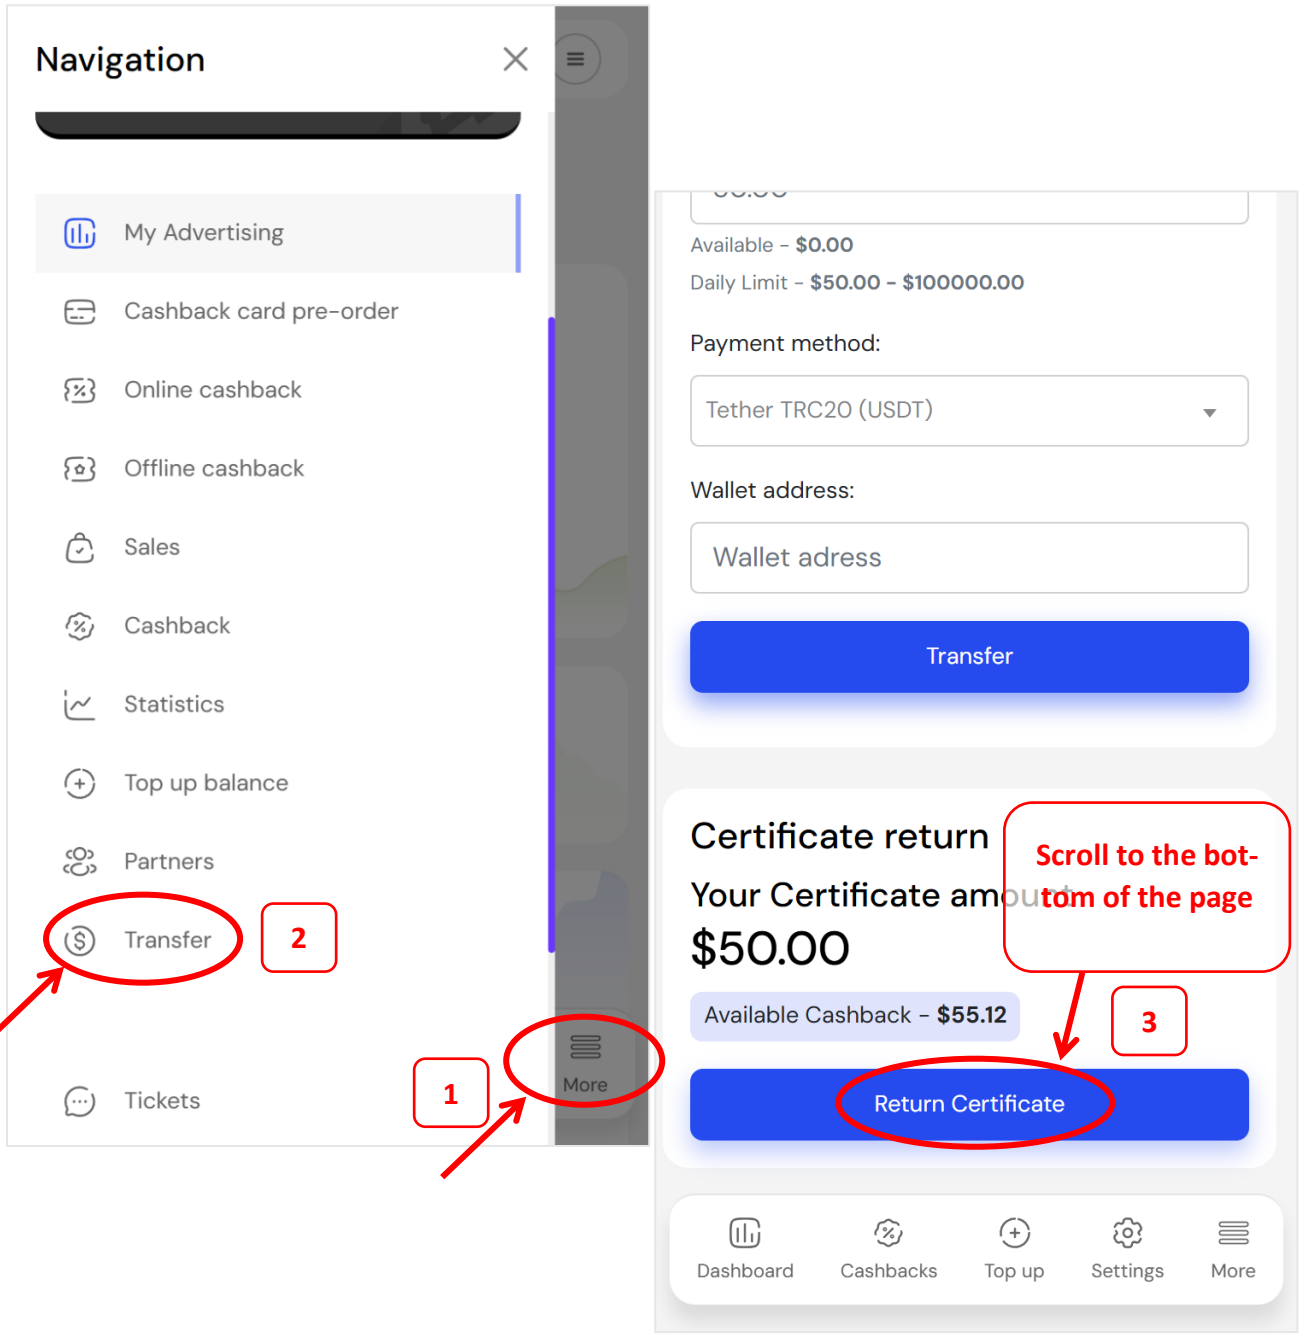
7. What to do with the Cashback received

Reinvest or Withdraw? That is the question. Unless you invest large sums right away, you have to be patient and reinvest as much as possible.

7.1 Returning the Gift Card

The Gift Card is a marketing tool with a **face value of $50** intended for a one-time use only and **must be returned** after obtaining the Cashback.

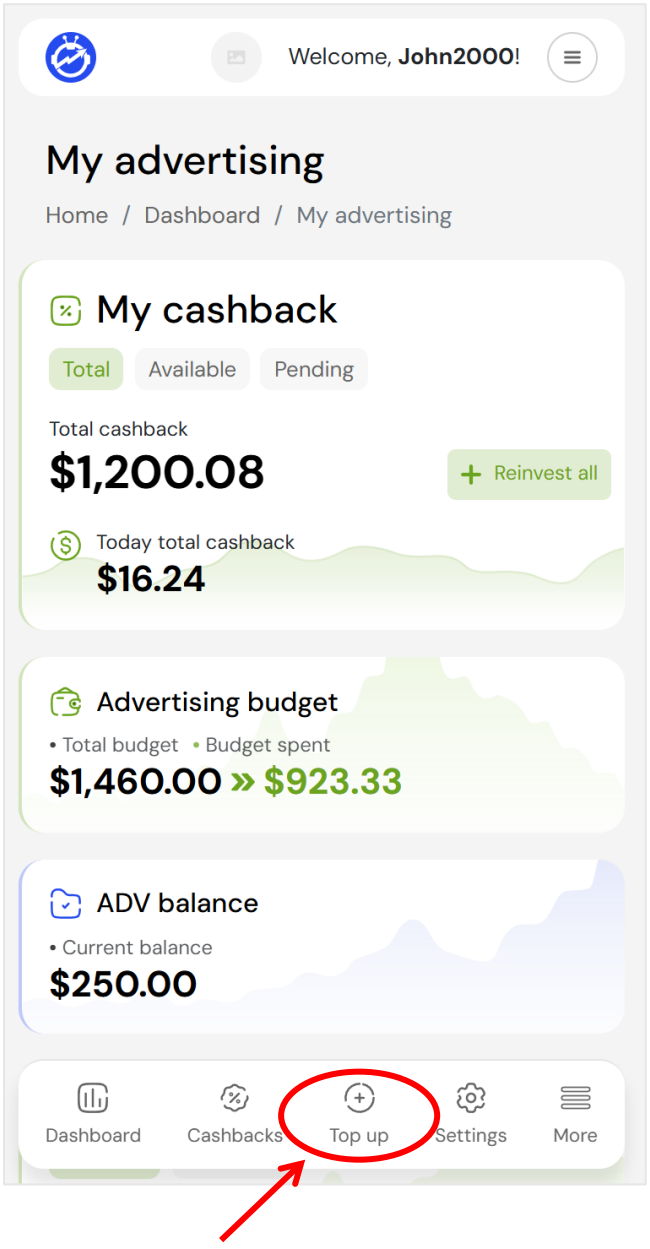
The Cashback obtained beyond its value remains with you.

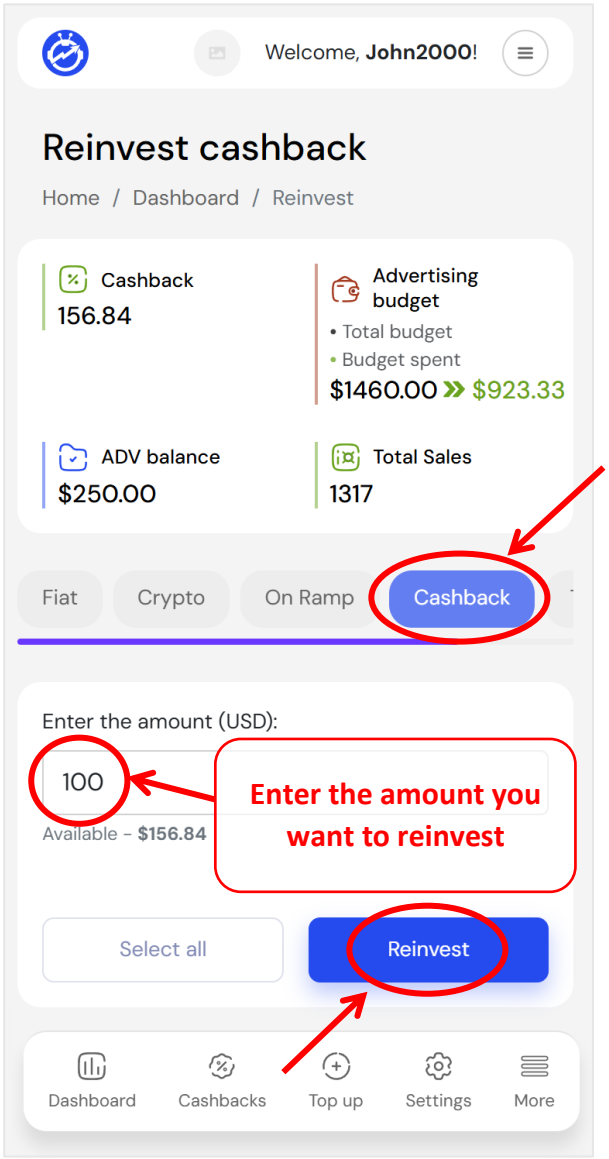


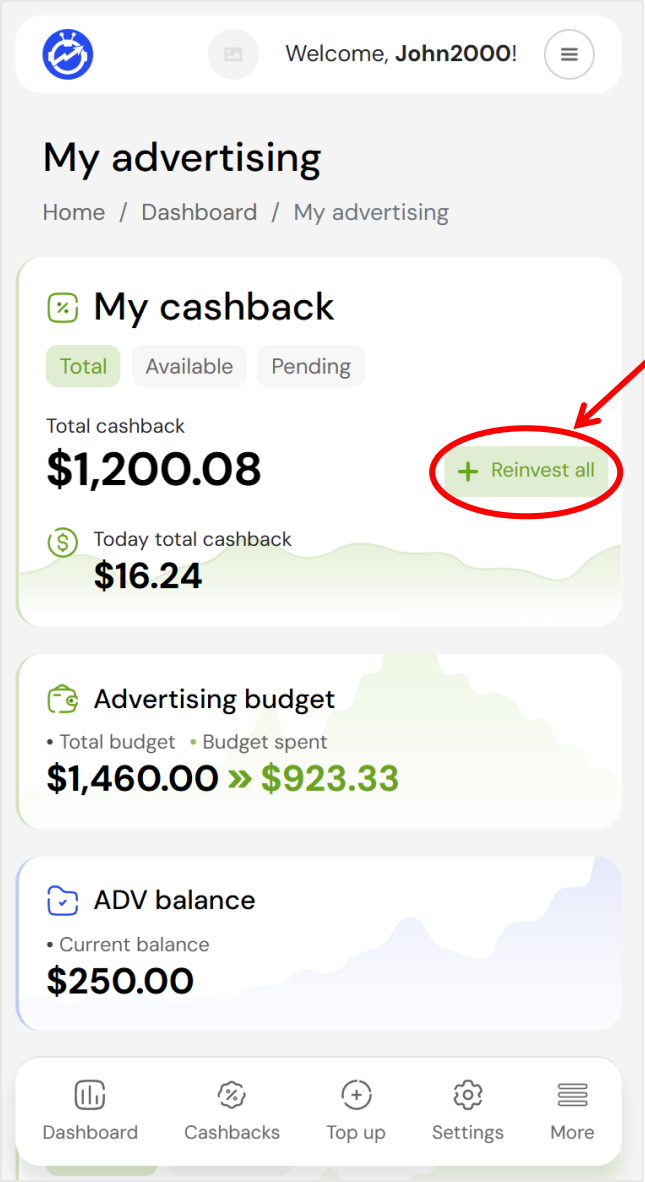
7.2 Reinvest Cashback

The fundamental strategy to follow, especially at the beginning, to see your profits increase is to reinvest the Cashback earned, so that it increases further and you do not necessarily have to draw on your savings again.

N.B.: *remember that the reinvested amount will be displayed under* ***"ADV Balance"*** *for the activation of the budget you will have to wait* ***from 24 to 48 hours****. The first withdrawal/reinvestment will be limited to the amount of not less than $100, further withdrawals/reinvestments will not be limited.*







It has also been made possible to reinvest the entire available cashback easily directly from the main page.

7.3 Withdraw Cashback to Crypto Wallet

This is not a guide on crypto, it is assumed that you already know how to use them, if not, we recommend that you inform yourself before starting, you can find multiple guides on the subject online.

If you are new to this world, however, I can recommend the use of a **"Hot Wallet"** for greater ease of use, you can choose it from one of the certified service providers you find below.

- Sign up with Binance by clicking here
- Sign up with Crypto.com, by clicking here
- Sign up with Coinbase by clicking here

Please note that *the first withdrawal/reinvestment will be limited to the amount of not less than $100, further withdrawals/reinvestments will not be limited.*

8. Refer a friend

To invite a friend, you'll need your invitation link and gift card.

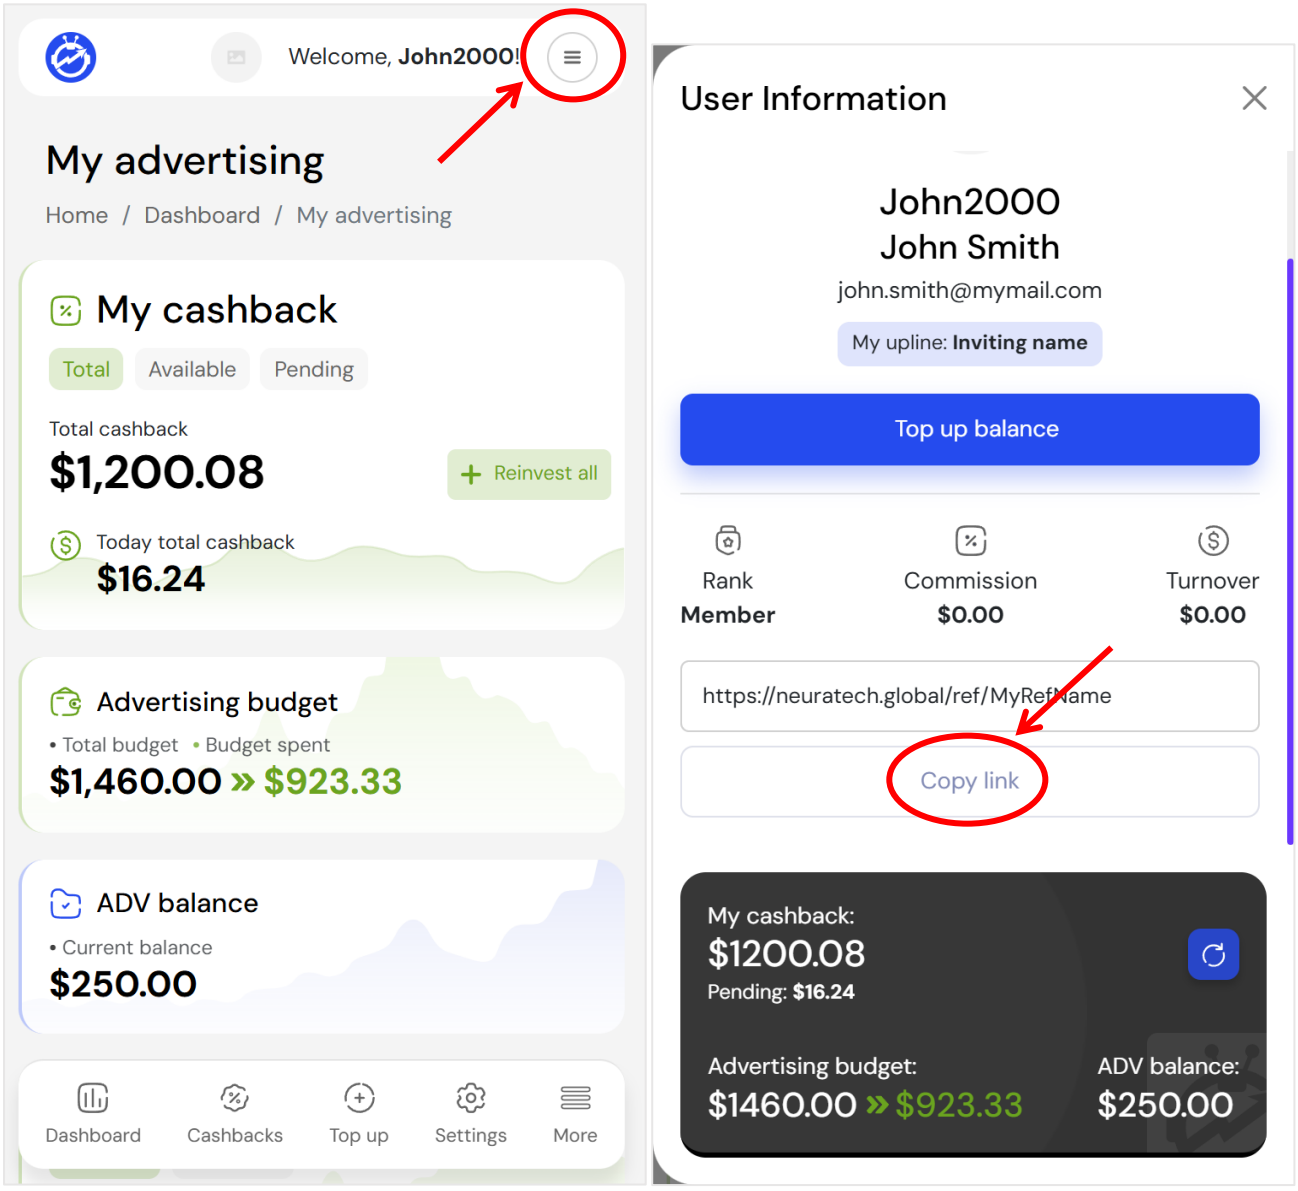
In addition, inviting a friend will allow you to get a 5% initial bonus on their investments.

Note: *To get the bonuses, your NeuraBot will need to activate. Therefore, never forget to reactivate your robot every Sunday.*

8.1 Share your invitation link

Copy your invitation link and share it with your friends, then you will need to provide them with the certificate with the $50 trial voucher. *See Share your Gift Card.*

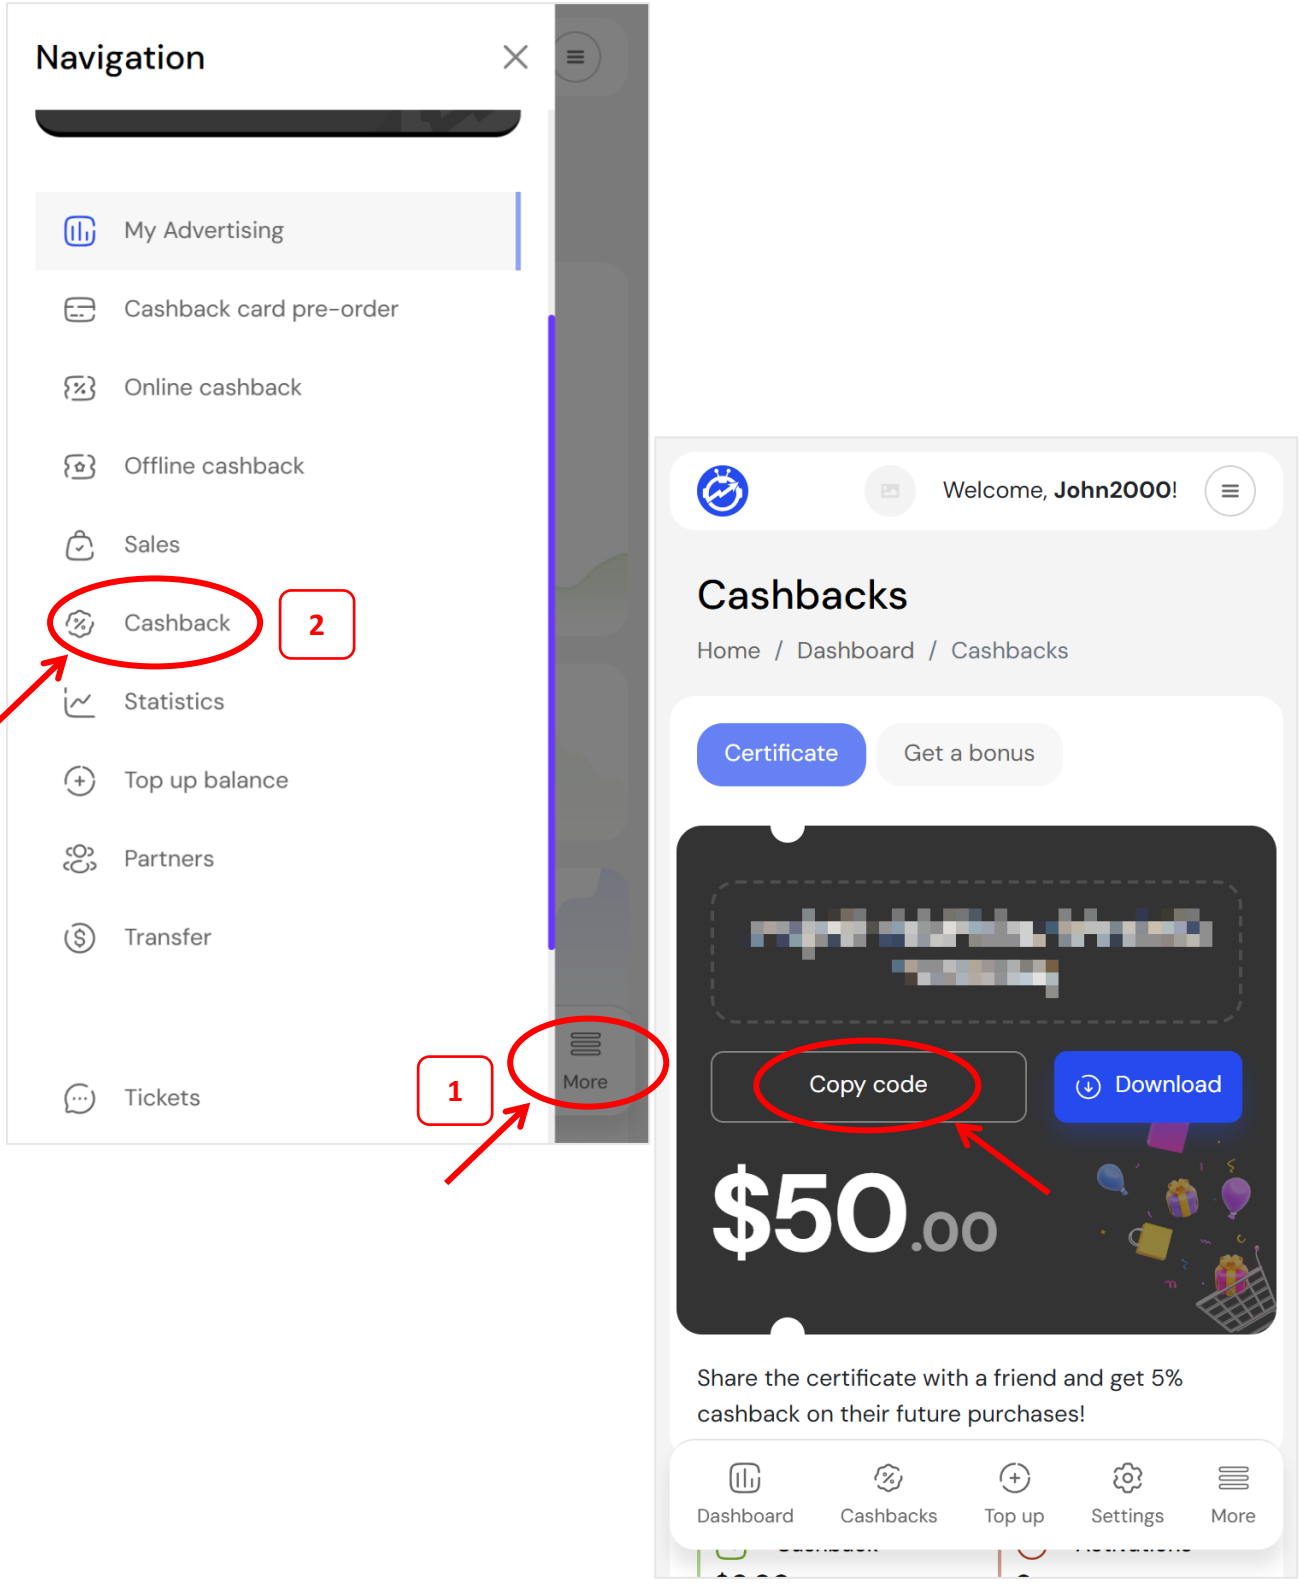
Explain the procedure to be carried out or feel free to share this manual, but remember to use your link and your voucher instead of those present here.



8.2 Share your Gift Card

Share the gift card with your friends, **you will get them $50** to try out the platform while you **will get 5%** on their future investments.

Explain the procedure to be carried out or feel free to share this manual, but remember to use **your link and your voucher** instead of those present here.



8.3 Referral Program

Although it is possible to earn money exclusively from advertising campaigns, for those who are interested you can also earn from the referral program.

What is a Referral Program?

*"A **referral program** is a marketing system in which a company rewards its customers for bringing in new customers through personal referrals. Usually, existing customers share a unique link or code with friends or acquaintances, and when they complete a purchase or sign up, both the referee and the new customer receive some kind of reward, such as discounts or credits." (Source: ChatGPT)*

As already mentioned, initially you can earn 5% on future investments, of users who register through your Invitation Link and activate the Gift Card, which from now on we will call partner users. Subsequently, by reaching milestones, it is possible to obtain rewards and increase the percentage up to 15% on direct partner users.

Remember, the percentage of gain will only be recognized on **new investments** and not on re-investments. You will also need to have the NeuraBot active with a certain budget depending on the goal to be achieved.

In addition, it is also possible to earn something on indirect partner users. An indirect partner user is defined as someone who has registered in your line of non-direct partner users. But in this case, the percentage will have to be calculated based on the partner level each one is in.

Let's say a new user partner invests $100, here's an example of how the earnings will be divided:

- **Partner 1** who invited the new direct partner user, let's say he is at Member Level so he will earn 5% ($5)
- **Partner 2** who invited Partner 1, let's say he is at the Leading Consultant Level which has a percentage of direct partner users of 9%, but since the new user is not his direct partner user, we would have to subtract the percentage already earned by Partner 1, so 9% - 5% = 4% (4$)
- **Partner 3** who has invited Partner 2, let's say it is at the Developer Level which has a percentage of direct users of 11%, even here we should still subtract the percentage already paid to the other partners, so 11% - 4% - 5% = 2% (2$)

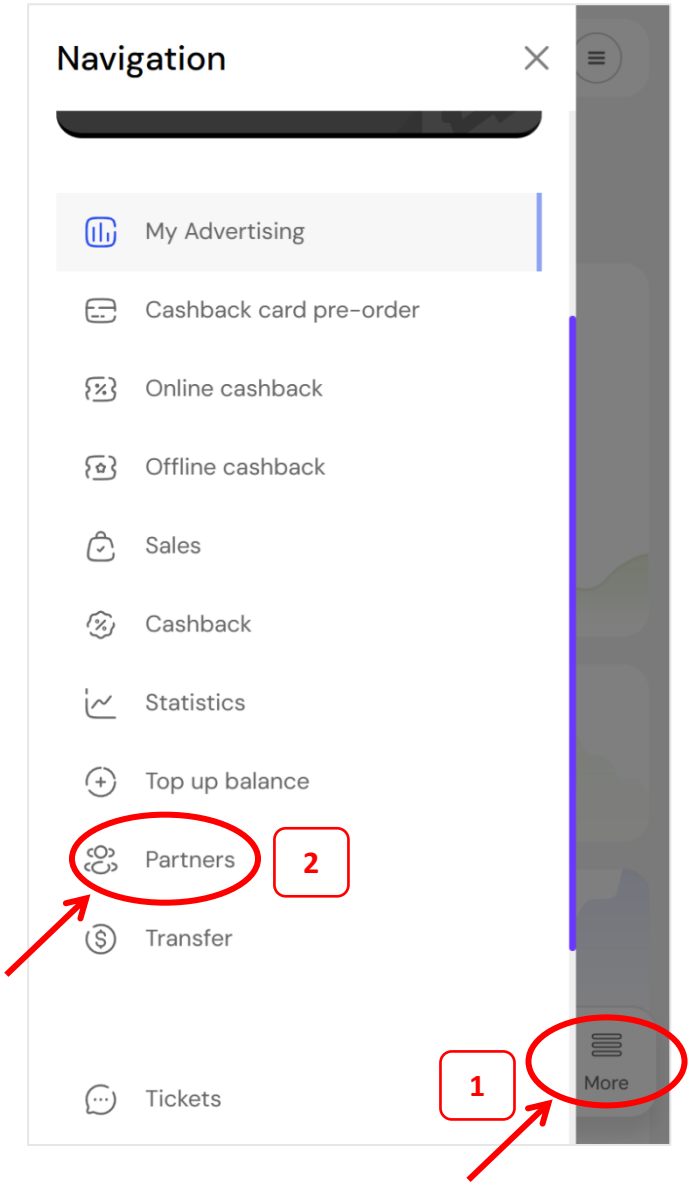
And so on up to a maximum of 15% that is reached at the Executive level, so from here it can be understood that indirect partner users of the same or lower level than their direct partners will not receive anything.

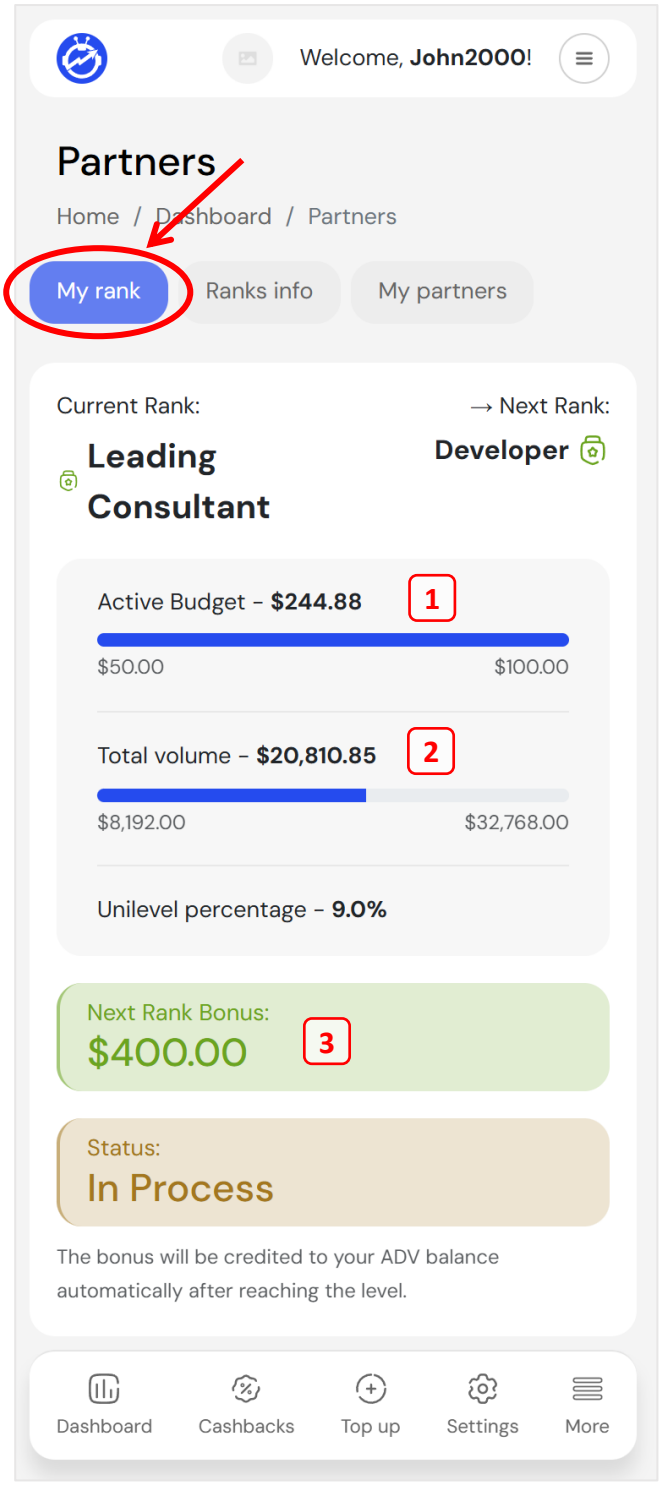
This concept is very important, to understand if we are dealing with a pyramid Ponzi scheme or a lawful and sustainable referral program, in fact, for pyramid Ponzi schemes, inviting new members is mandatory and not optional as in this case.

In addition, the percentages of earnings in pyramid Ponzi schemes are recognized as they exceed 100% of the amount invested *(obviously impossible as you cannot generate money out of thin air).*

Therefore, NT's referral program is perfectly legal and sustainable.

To review Partner Tiers and what tier you are at, follow these steps.



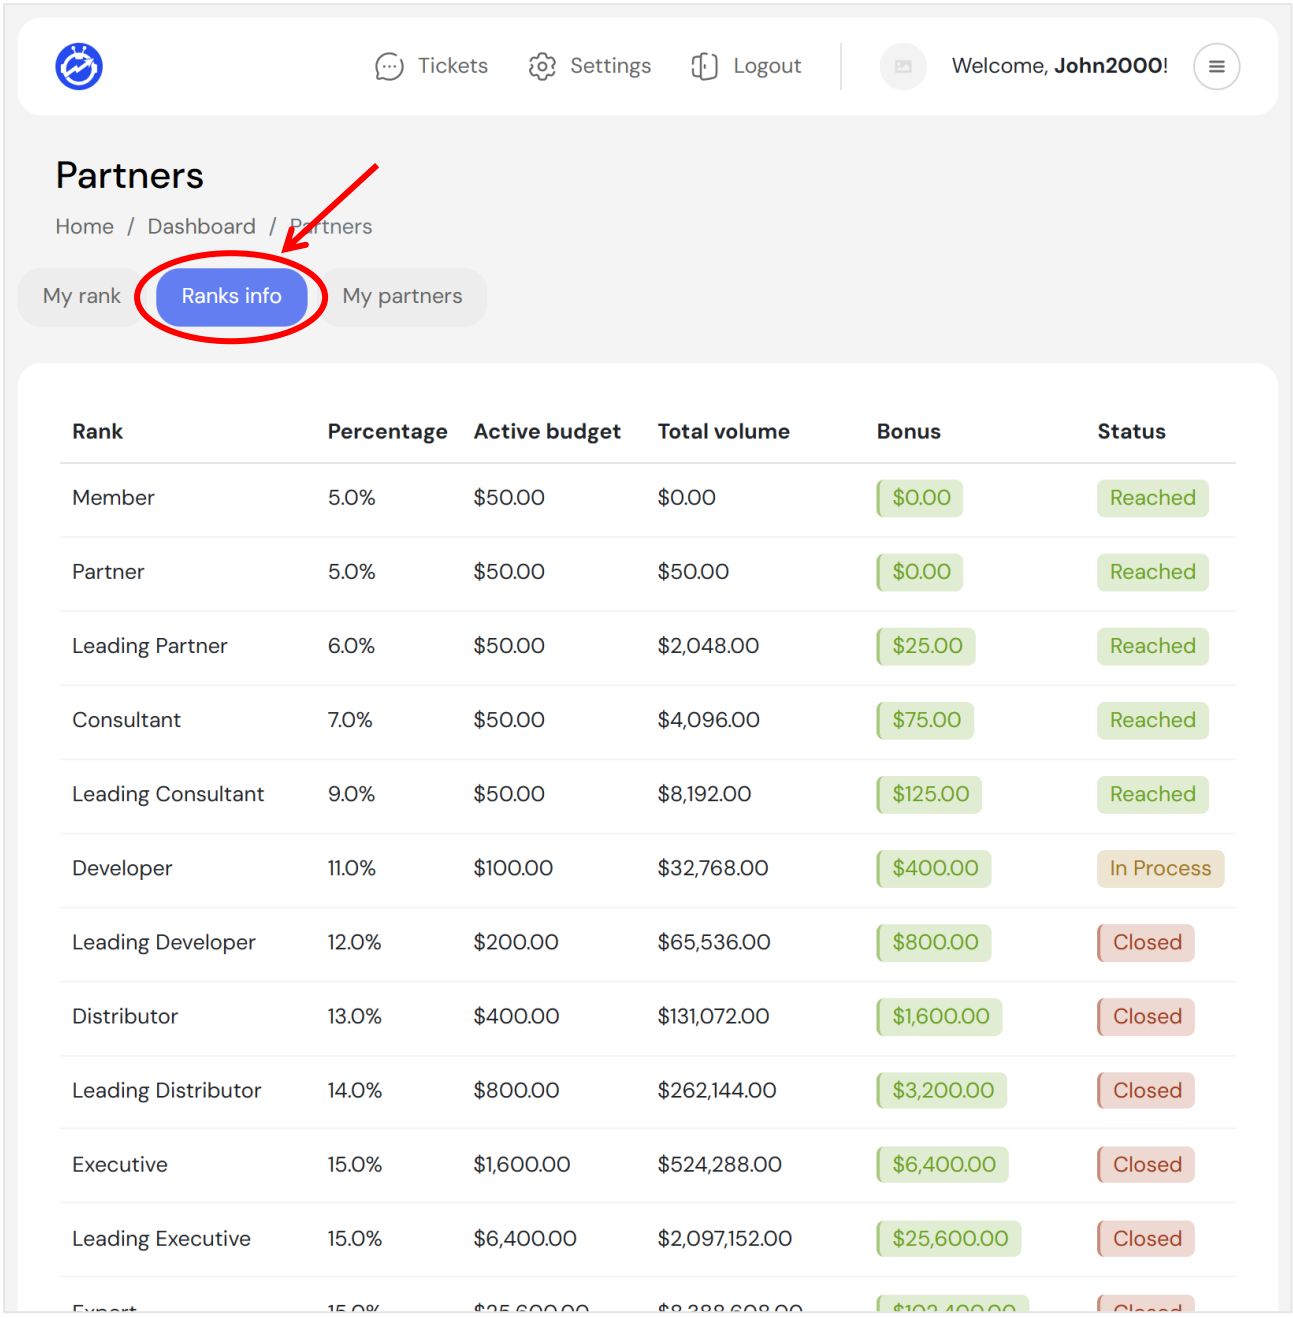


1. **Active Budget:** The budget not spent on your ad campaigns.

2. **Total Volume:** The sum of the budgets invested or re-invested in the advertising budgets of your direct and indirect partner users.

3. **Next Rank Bonus:** The reward you will receive upon reaching the next level. To obtain it, it will be sufficient to meet the requirements of **"Active Budget"** and **"Total Volume"**.

To consult the achievable goals and the respective bonuses, go to the following page.



Rank	Percentage	Active budget	Total volume	Bonus	Status
Member	5.0%	$50.00	$0.00	$0.00	Reached
Partner	5.0%	$50.00	$50.00	$0.00	Reached
Leading Partner	6.0%	$50.00	$2,048.00	$25.00	Reached
Consultant	7.0%	$50.00	$4,096.00	$75.00	Reached
Leading Consultant	9.0%	$50.00	$8,192.00	$125.00	Reached
Developer	11.0%	$100.00	$32,768.00	$400.00	In Process
Leading Developer	12.0%	$200.00	$65,536.00	$800.00	Closed
Distributor	13.0%	$400.00	$131,072.00	$1,600.00	Closed
Leading Distributor	14.0%	$800.00	$262,144.00	$3,200.00	Closed
Executive	15.0%	$1,600.00	$524,288.00	$6,400.00	Closed
Leading Executive	15.0%	$6,400.00	$2,097,152.00	$25,600.00	Closed

9. Safety

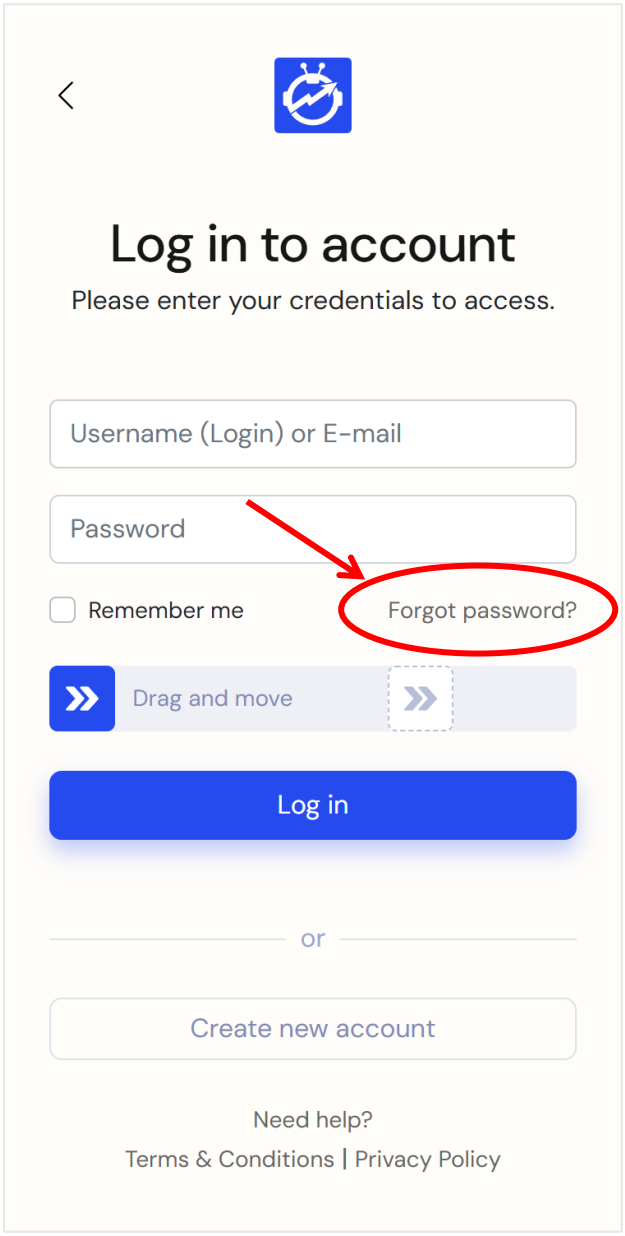
This is definitely one of the most important topics of all. Where there are big gains, unfortunately, there are also scammers who will try to get hold of your investments.

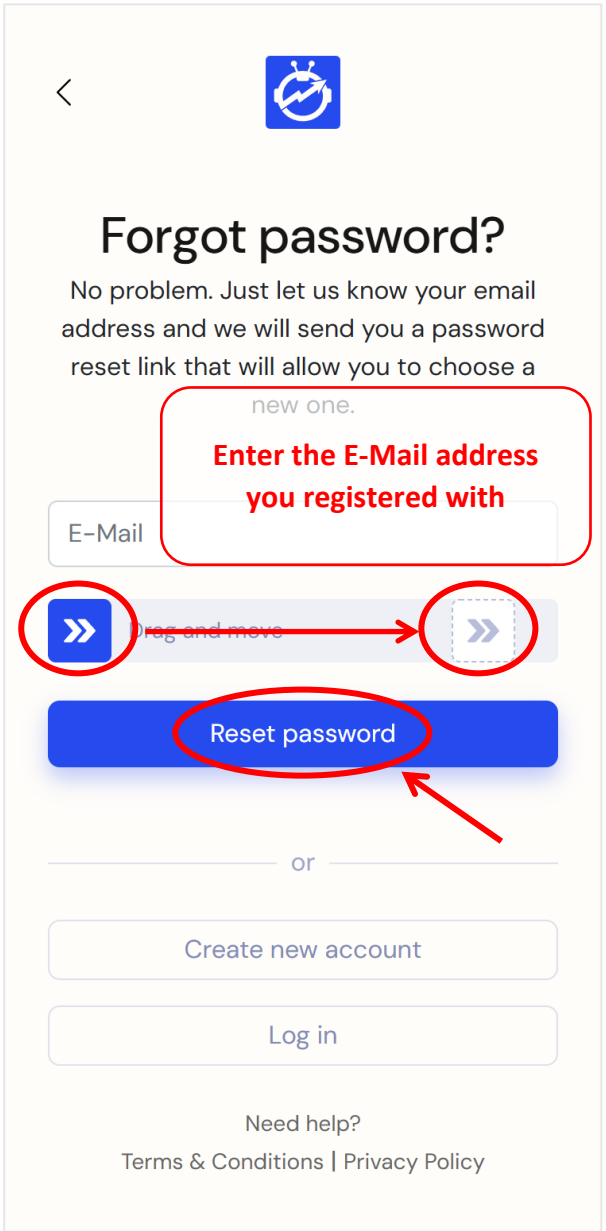
Here are the best actions you can take to protect your account.

9.1 Password Recovery

If you've lost your password or your account has been hacked, recover it now!

ATTENTION!!! NT will never ask for your account password or to make a payment outside the official platform!!





Forgot password?
No problem. Just let us know your email address and we will send you a password reset link that will allow you to choose a new one.
Enter the E-Mail address you registered with
E-Mail
Reset password
or

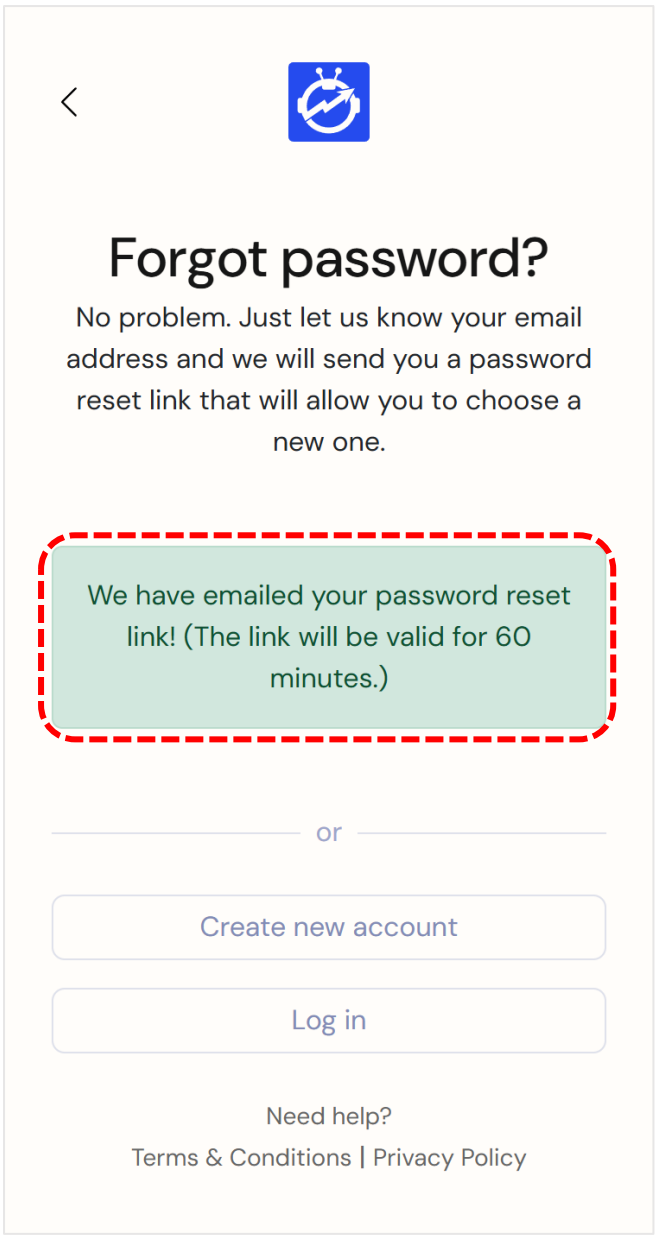
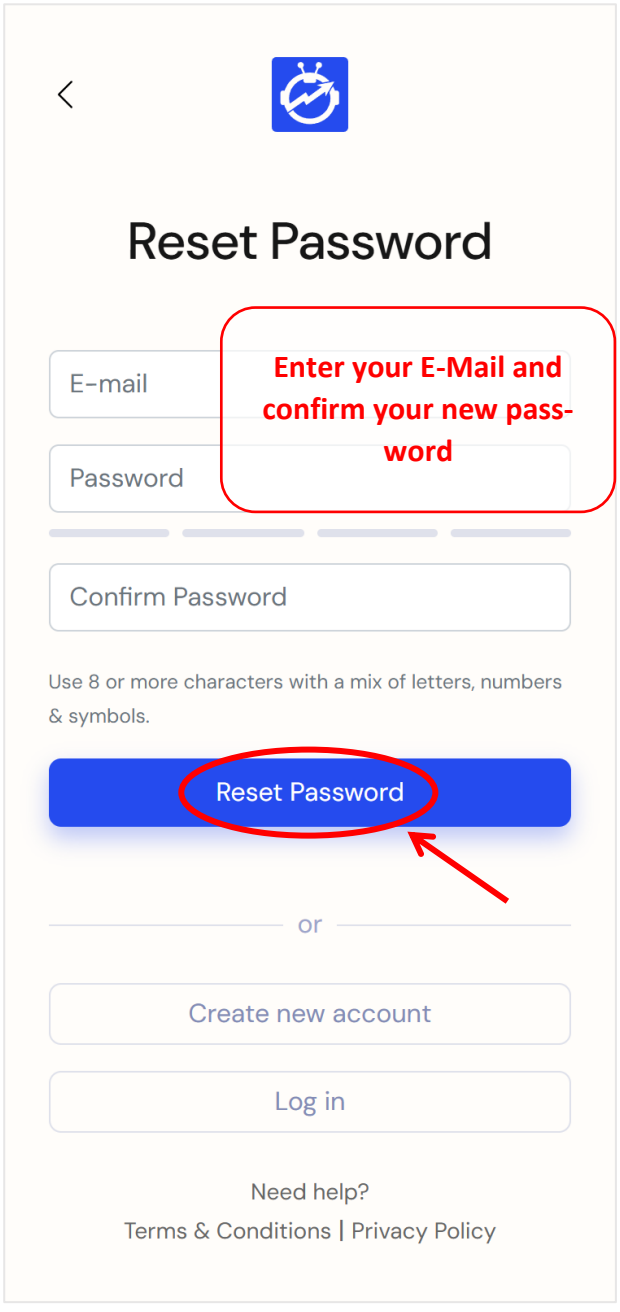
Log in
Need help?
Terms & Conditions | Privacy Policy



Forgot password?
No problem. Just let us know your email address and we will send you a password reset link that will allow you to choose a new one.
We have emailed your password reset link! (The link will be valid for 60 minutes.)
or
Create new account
Log in
Need help?
Terms & Conditions | Privacy Policy

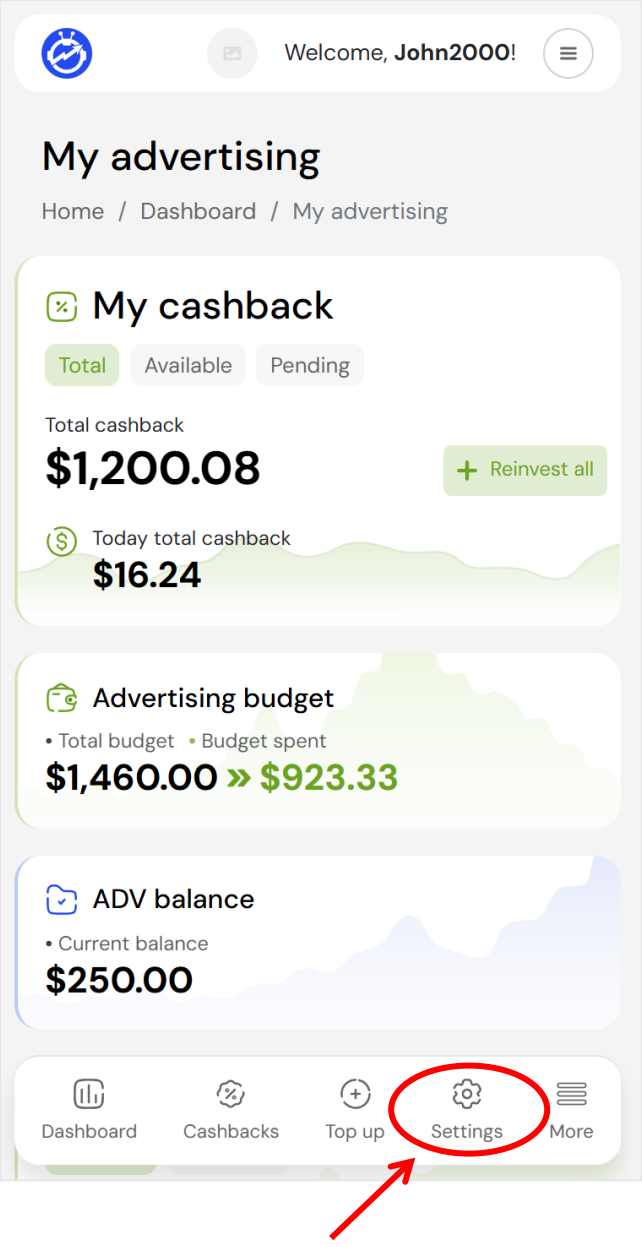
You will receive an E-Mail with the link for recovery. Open the link and move on to the next step.

You will have 60 minutes to complete the procedure, after the time has expired you will have to request a new password recovery.

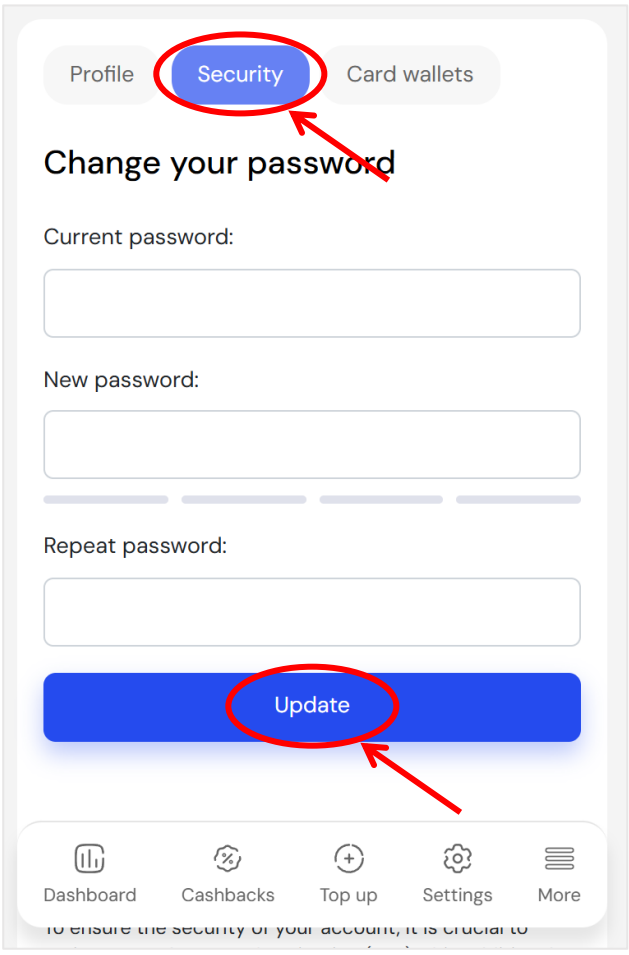


9.2 Change password

If you still have your account but want to change your password, even periodically for security, you can follow the steps below.



Scroll down and click on "Security". Then write the old and new password twice



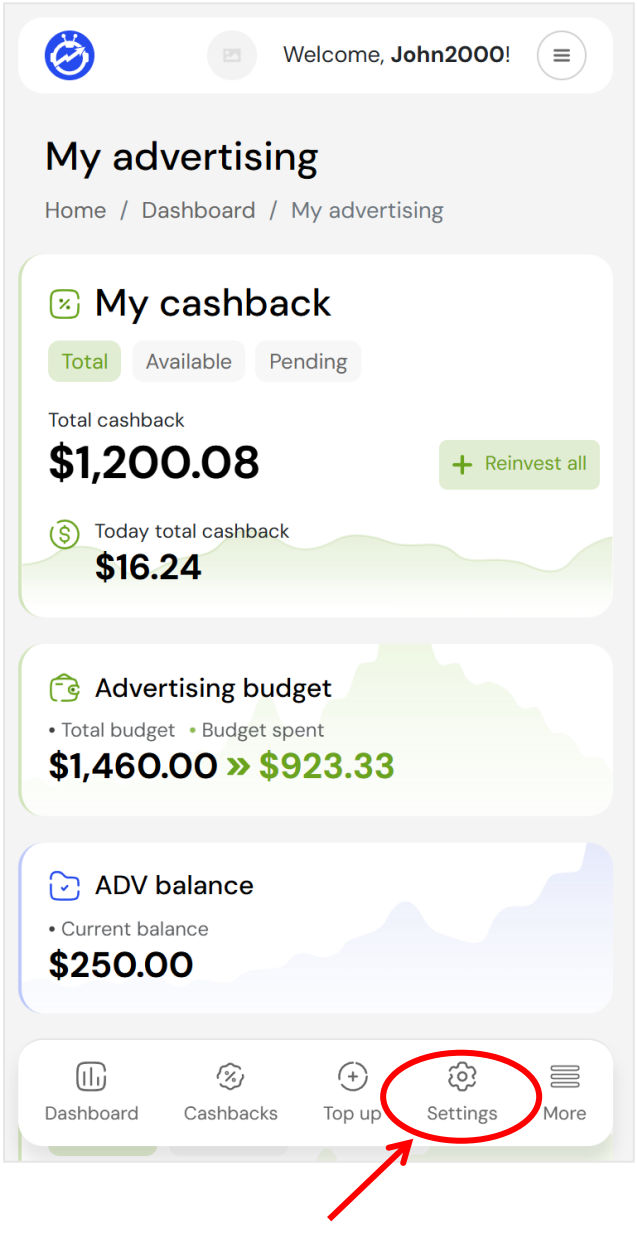
9.3 Two-factor authentication

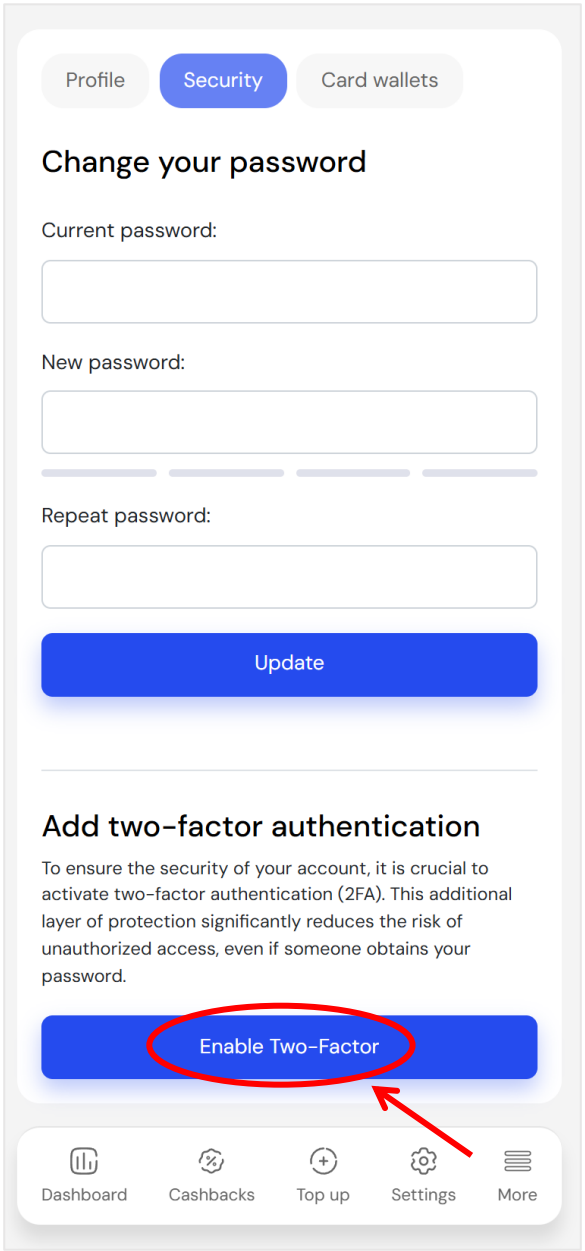
NT has implemented the ability to activate **Google's two-factor authentication (2FA).** 2FA is the best way to deter and stop the majority of account takeover attacks.

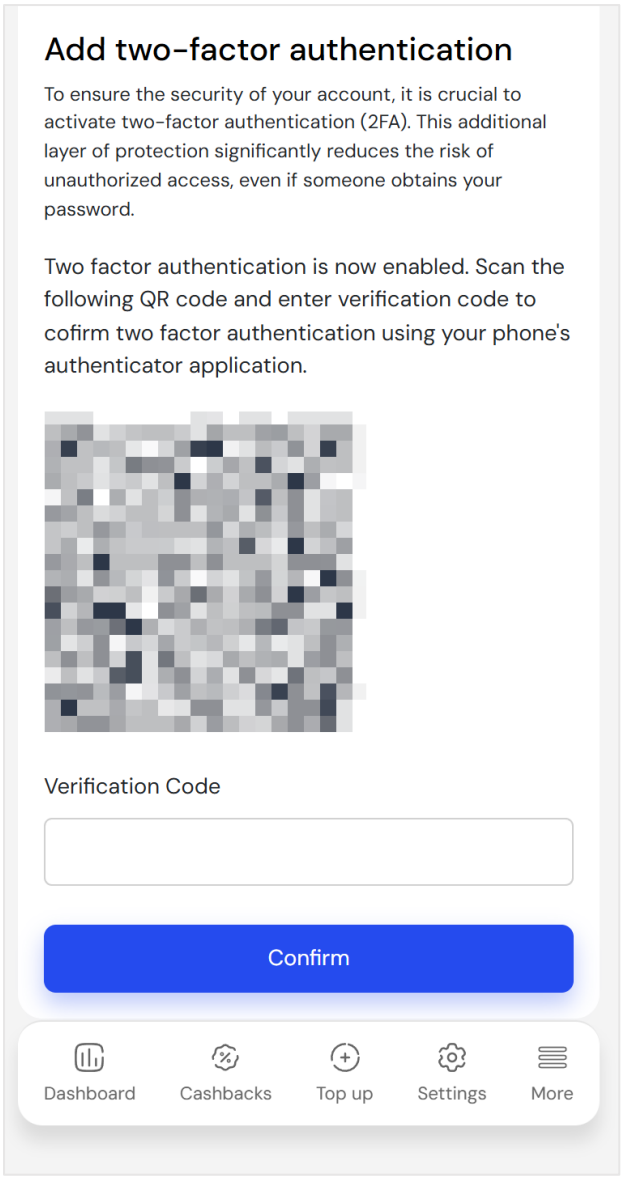
Once the procedure is activated, each time you log in you will be asked to enter the 2FA code.

ATTENTION!!! NT will never ask for your 2FA code, if someone asks you don't give it to them as they intend to steal your account!!

First, download and install Google Authenticator on your **Apple** or **Android device**.







Add two-factor authentication
To ensure the security of your account, it is crucial to activate two-factor authentication (2FA). This additional layer of protection significantly reduces the risk of unauthorized access, even if someone obtains your password.
Two factor authentication is now enabled. Scan the following QR code and enter verification code to cofirm two factor authentication using your phone's authenticator application.
Verification Code
Confirm
Dashboard
Cashbacks
Top up

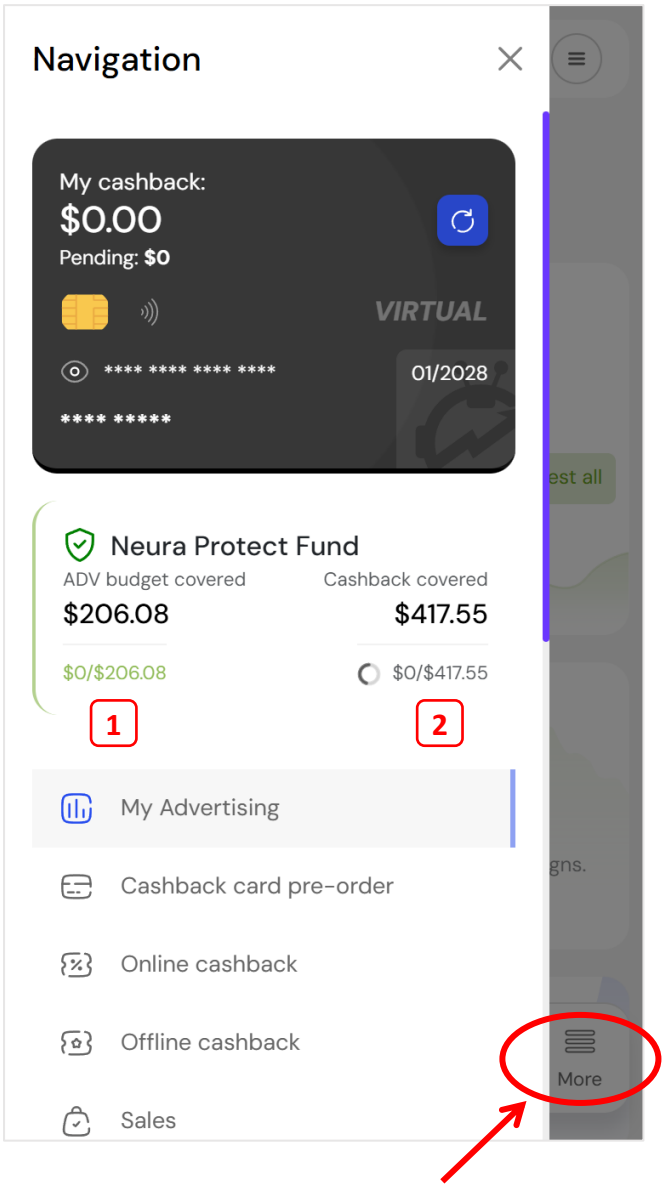
9.4 Protection Fund

In very rare cases, the emergency procedure of the protection fund may be activated.

This procedure is necessary in the event of very serious events that prevent the normal activity of the platform.



The new cashback received, resulting from the protection fund procedure, will be divided as follows:

- **55%** will be the new revenue from advertising campaigns.
- **the remaining 45%** will cover losses in the screen relating to the protection fund.

Below is the explanation of the screenshot:

1. **ADV budget covered:** this is a budget not yet spent to be recovered.
2. **Cashback covered:** this is the cashback obtained from your advertising campaigns to be recovered.

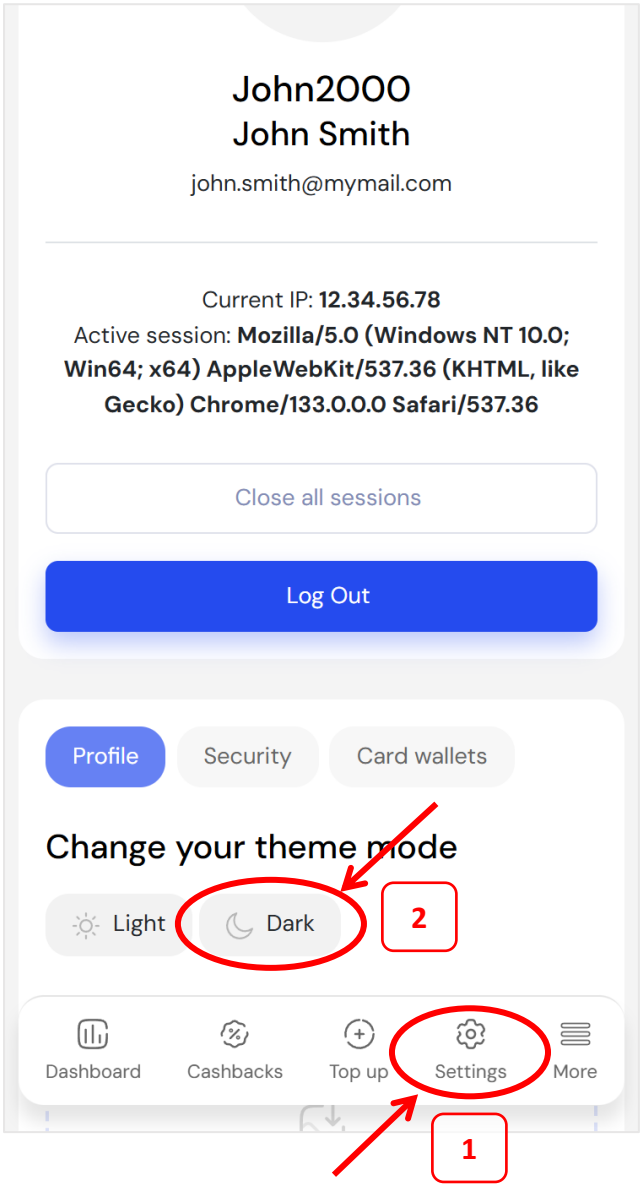
Note: *If you find any discrepancies in the processing of the cashback to be recovered, please contact support via the official Support Channel.*

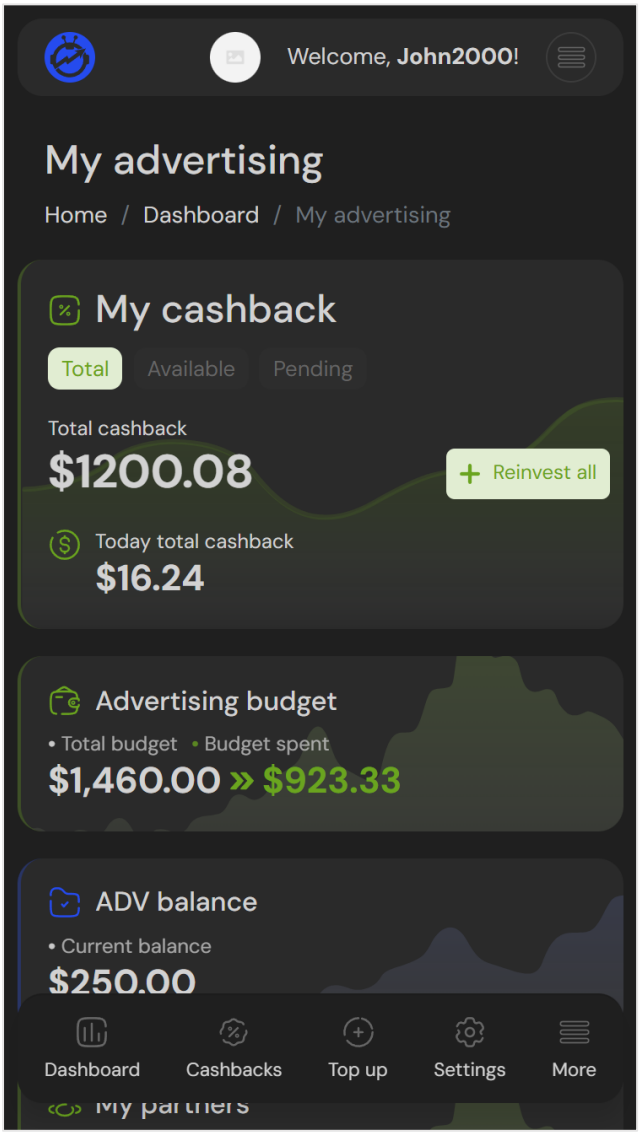
10. Personalization

In this section you can see how you can customize our account.

10.1 Dark Mode

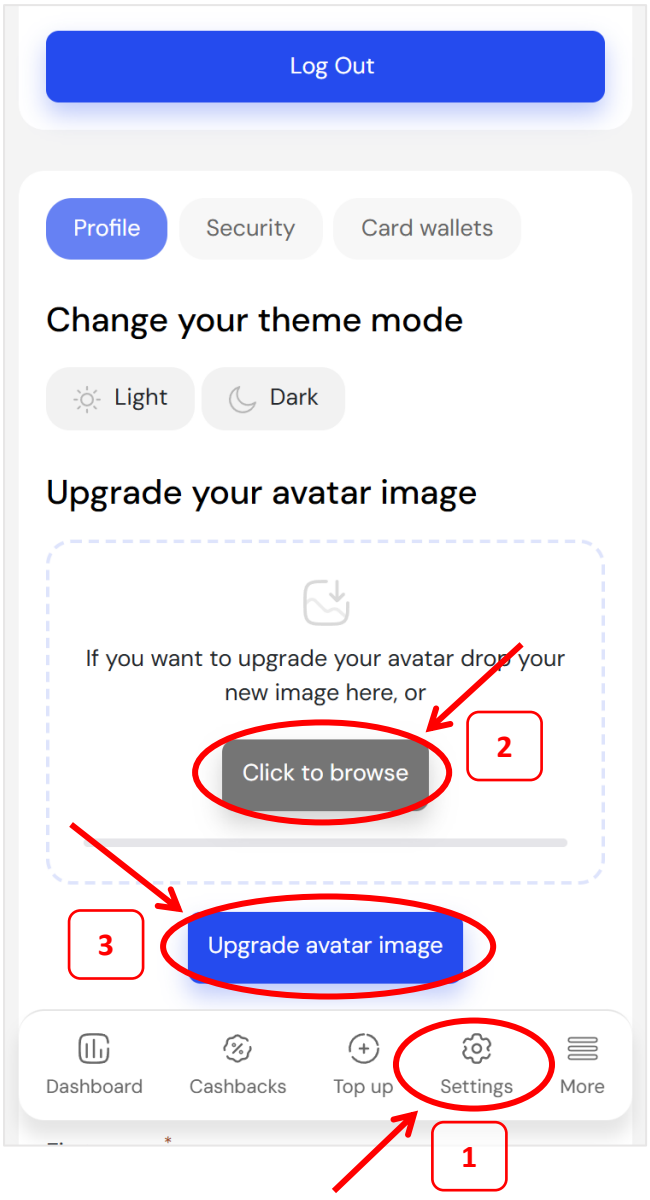
For lovers of dark mode, below are the instructions to set it.

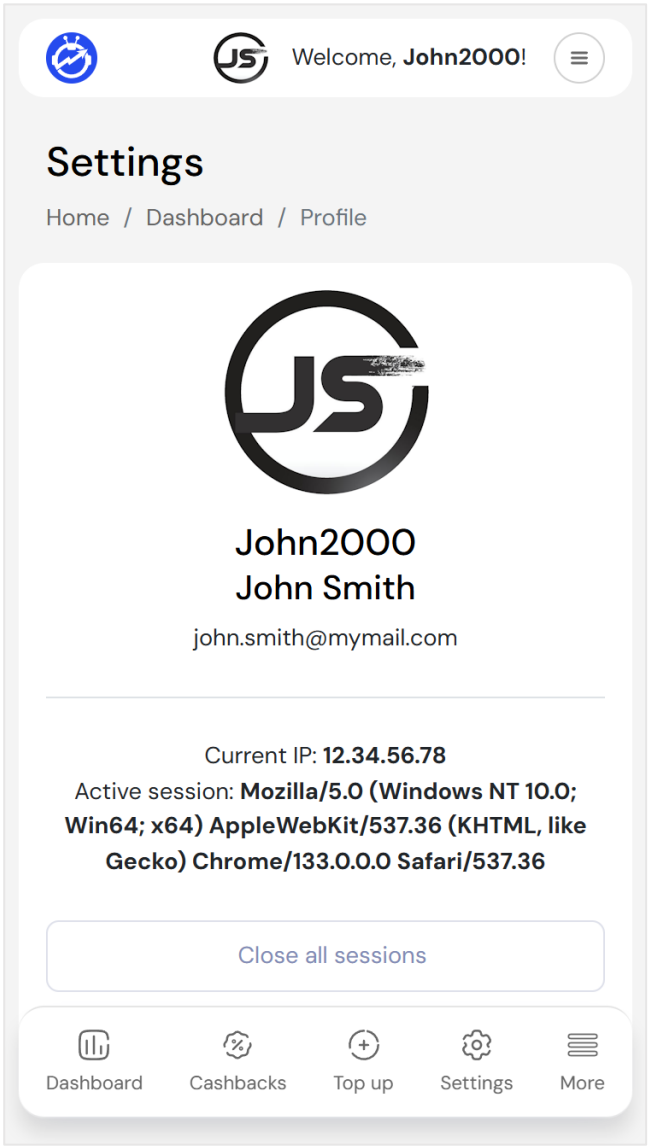




10.2 Profile picture

Here's how to change your profile picture.





11. Reliability

Before giving our money to strangers, it is right to inform ourselves and understand who we are dealing with in order not to run into scam products.

Therefore, we have carried out investigations to clarify and avoid these eventualities.

11.1 How it really works

Let's start by specifying that NT is not directly affiliated with any company but is based on collaboration as a **publisher** with a platform called **Admitad**.

*"**Admitad** is a CPA affiliate platform founded in 2009 that connects advertisers and publishers to promote products and services online. Advertisers (businesses or brands) create affiliate programs and offer commissions to publishers (websites, influencers, bloggers) who promote their products through trackable links. When a user clicks on one of these links and completes a desired action, such as a purchase or sign-up, the publisher receives a commission. The platform handles tracking, transactions, and payments for both parties, making it easy for them to collaborate with each other." (Source: ChatGPT)*

Therefore, you too could register an account on Admitad, start earning money as a publisher by promoting products and services, but this is a laborious job that requires time and experience, you need to create advertisements, promote them on search engines such as Google or on social networks such as Instagram and Facebook, it is a profession in all respects that not everyone is willing to do.

And that's where NT and its NeuraBot come in.

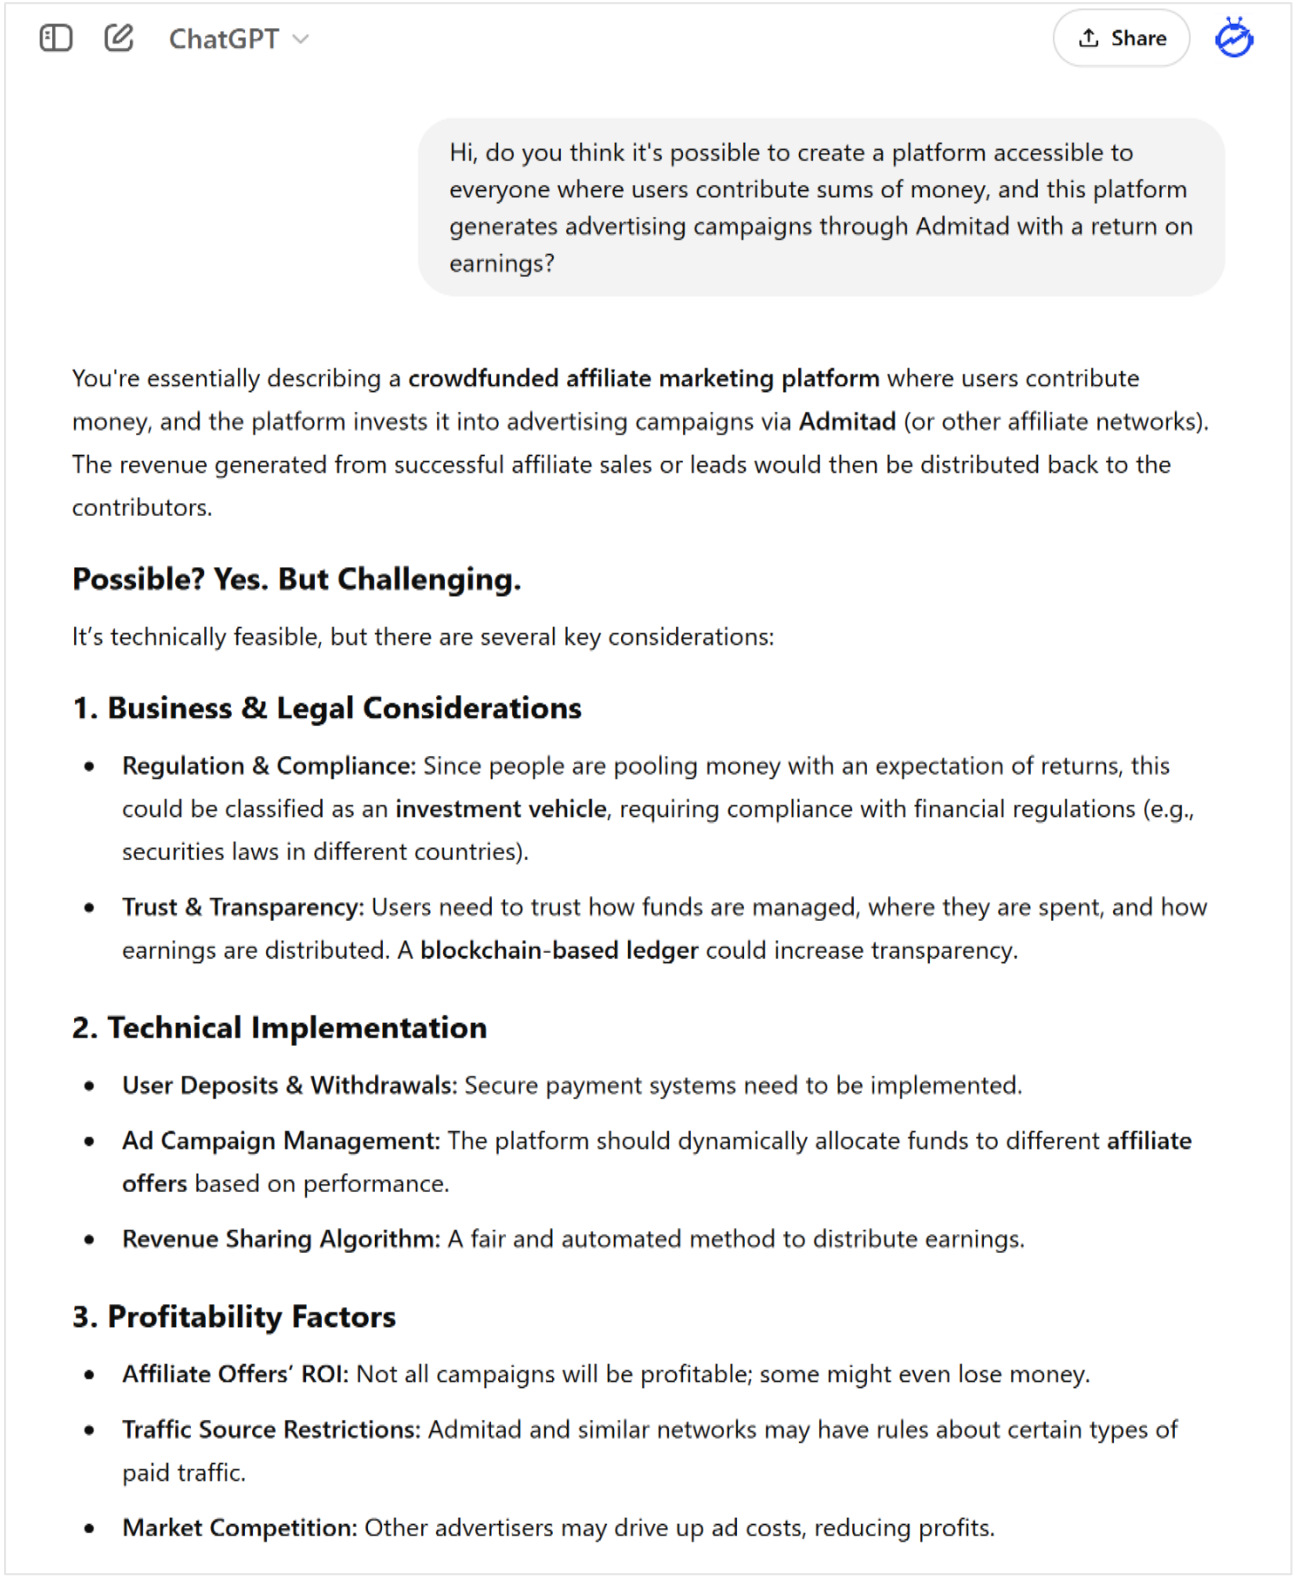
Thanks to the integration with artificial intelligence, all this complex procedure is automated, bringing this business within everyone's reach.

11.2 What ChatGPT thinks about it

We had a chat with the most famous artificial intelligence of all to understand, thanks to the information we have on the platform, if this business model is realistic.

We started with simple questions and then delved into the topic in more detail.

Below is the original conversation:



ChatGPT
Share
Hi, do you think it's possible to create a platform accessible to everyone where users contribute sums of money, and this platform generates advertising campaigns through Admitad with a return on earnings?
You're essentially describing a **crowdfunded affiliate marketing platform** where users contribute money, and the platform invests it into advertising campaigns via **Admitad** (or other affiliate networks). The revenue generated from successful affiliate sales or leads would then be distributed back to the contributors.
Possible? Yes. But Challenging.
It's technically feasible, but there are several key considerations:
1. Business & Legal Considerations
- **Regulation & Compliance:** Since people are pooling money with an expectation of returns, this could be classified as an **investment vehicle**, requiring compliance with financial regulations (e.g., securities laws in different countries).
- **Trust & Transparency:** Users need to trust how funds are managed, where they are spent, and how earnings are distributed. A **blockchain-based ledger** could increase transparency.
2. Technical Implementation
- **User Deposits & Withdrawals:** Secure payment systems need to be implemented.
- **Ad Campaign Management:** The platform should dynamically allocate funds to different **affiliate offers** based on performance.
- **Revenue Sharing Algorithm:** A fair and automated method to distribute earnings.
3. Profitability Factors
- **Affiliate Offers' ROI:** Not all campaigns will be profitable; some might even lose money.
- **Traffic Source Restrictions:** Admitad and similar networks may have rules about certain types of paid traffic.
- **Market Competition:** Other advertisers may drive up ad costs, reducing profits.

Potential Solution?

A **DAO-based model** (Decentralized Autonomous Organization) could work where funds are managed transparently, and smart contracts handle **profit distribution**.

Would you be interested in discussing a **specific business model**, such as revenue-sharing percentages or automation?

Therefore, would it be possible to generate and share the earnings between the platform and the investor?

Yes, it's possible to generate and share earnings between the platform and the investors, but it requires a **clear revenue-sharing model** and a **sustainable strategy** to ensure profitability. Here's how it could work:

Revenue-Sharing Model

1. **Users (Investors) Deposit Funds**
   - Investors contribute money to a shared advertising pool.
   - A minimum and maximum investment limit may be necessary.
2. **Platform Runs Affiliate Ad Campaigns**
   - The platform uses the pooled funds to run advertising campaigns through **Admitad** and other affiliate networks.
   - Ads direct traffic to affiliate offers, earning commissions on conversions.
3. **Revenue is Generated**
   - Profits come from successful **sales or lead generation**.
   - Campaign performance varies, meaning some may be **profitable**, while others may not.
4. **Profit Distribution**
   - A **percentage split** between investors and the platform is agreed upon.
   - Example:
     - 70% of profits go to investors (proportional to their contribution).
     - 30% goes to the platform (for management, operational costs, and reinvestment).
   - Losses should also be accounted for. If an ad campaign loses money, investors must **accept some risk**.

Key Challenges & Solutions

Challenge	Solution
Investment Regulation	Ensure compliance with financial laws (may require licenses).
Transparency	Use blockchain or detailed reports to show real ad spending and earnings.
Ad Campaign Risk	Diversify campaigns, test strategies before scaling, and educate investors about risks.
Affiliate Network Rules	Ensure compliance with Admitad's policies (some networks restrict paid traffic).
Fair Payout System	Automate payments via smart contracts or a secure financial system.

Alternative Approaches

- **Tokenized Investment Model:** Users contribute funds in exchange for a **token** that represents a share of profits.
- **AI-Based Ad Optimization:** Use AI to improve campaign performance and reduce loss risks.
- **Reinvestment Pool:** Allow investors to choose whether to withdraw or reinvest profits automatically.

Would you like help structuring a **detailed business model**, including fees, investor protections, or tech implementation? 🚀

> Let's assume that the platform keeps 45%, while the investor keeps 55%

A **45%-55% revenue split** (where the platform keeps **45%** and the investor keeps **55%**) can work if structured properly. Here's a more detailed breakdown of how this model could be structured:

Business Model Structure

1. Investor Contribution & Fund Pooling

- Investors deposit funds into the platform.
- Funds are pooled and allocated to **paid advertising campaigns** promoting **affiliate offers** from Admitad and other networks.

2. Ad Campaign Execution

- The platform manages campaigns using Facebook Ads, Google Ads, TikTok, or other traffic sources.

- The goal is to generate **affiliate commissions** from successful conversions.

3. Revenue Generation & Distribution

- Profits from affiliate commissions are split as follows:
  - **55%** goes to the investor (proportional to their contribution).
  - **45%** goes to the platform (for campaign management, platform maintenance, and reinvestment).

Revenue Flow Example

Let's assume:

- An investor contributes **$1,000**.
- The platform runs campaigns and earns **$2,000** in affiliate commissions (after ad costs).

🔹 **Profit Calculation**:
$2,000 (Revenue) - $1,000 (Ad Costs) = $1,000 Profit

🔹 **Distribution** (Based on 55%-45% split):

- **Investor receives: $550** (55% of $1,000)
- **Platform earns: $450** (45% of $1,000)

Risk & Safeguards

1. **Campaign Losses**
   - Not all campaigns will be profitable, so investors must understand the **risk of losing money**.
   - The platform could introduce a **"reserve fund"** to mitigate investor losses.
2. **Fraud Prevention & Transparency**
   - Use **blockchain technology** or **detailed analytics** to ensure fair distribution.
   - Provide **real-time dashboards** showing ad spend, revenue, and profit.
3. **Affiliate Network Restrictions**
   - Some affiliate networks have **rules on traffic sources** (e.g., banning certain types of paid ads).
   - The platform must ensure **compliance** to avoid bans or withheld commissions.

Ways to Enhance Profitability

Ways to Enhance Profitability

✅ **AI-Powered Ad Optimization** → Use AI to maximize ROI on ad spend.
✅ **Diversify Affiliate Offers** → Promote high-converting and high-commission products.
✅ **Performance-Based Bonuses** → Reward investors who reinvest funds for longer periods.
✅ **Referral Program** → Attract more investors by offering a small commission for referrals.

Next Steps

Would you like to:

1. **Define a Minimum Investment Amount?**
2. **Choose a Payment System (crypto, PayPal, bank transfers)?**
3. **Develop a Proof of Concept (PoC) or MVP for testing?**

This model has potential, but it will require careful **risk management and investor trust.** 🚀

> For an investor to earn a profit between 25% and 35%, what percentage of earnings should the advertising campaigns generate?

To calculate the required **Return on Ad Spend (ROAS)** to ensure an investor earns **25% to 35% profit**, we need to determine the necessary earnings from advertising campaigns.

Key Variables

- **I** = Investor's initial contribution (e.g., $1,000)
- **R** = Revenue generated from advertising campaigns
- **A** = Advertising spend (equal to investor's contribution)
- **P** = Profit after ad spend (**P = R - A**)
- **Split** = 55% investor / 45% platform

Step 1: Define Investor's Profit Goal

For an investor to **earn a profit of 25% to 35%**, their total return (including the original investment) should be:

- **25% profit → $1,250 total** (i.e., $250 profit)
- **35% profit → $1,350 total** (i.e., $350 profit)

Since the investor receives **55% of the profit**, we set up the equation:

$$0.55 \times P = \text{Investor's Desired Profit}$$

$$P = \frac{\text{Investor's Desired Profit}}{0.55}$$

For **$250 profit (25%)**:

$$P = \frac{250}{0.55} = 454.55$$

For **$350 profit (35%)**:

$$P = \frac{350}{0.55} = 636.36$$

So, the advertising campaign must generate a total profit (P) between **$454.55 and $636.36**.

Step 2: Calculate Required Revenue (R)

Since **profit P = R - A**, we get:

$$R = A + P$$

For **$454.55 profit (lower bound)**:

$$R = 1000 + 454.55 = 1454.55$$

For **$636.36 profit (upper bound)**:

$$R = 1000 + 636.36 = 1636.36$$

Step 3: Required ROAS (Return on Ad Spend)

ROAS is calculated as:

$$ROAS = \frac{R}{A}$$

For **$1,454.55 revenue**:

$$ROAS = \frac{1454.55}{1000} = 1.45$$

For **$1,636.36 revenue**:

$$ROAS = \frac{1636.36}{1000} = 1.64$$

Final Answer:

To ensure an investor earns a **25% to 35% profit**, the advertising campaigns must generate a **ROAS between 1.45 and 1.64**.

This means for every **$1 spent on ads, the campaign must generate between $1.45 and $1.64 in affiliate commissions**.

Would you like help with **strategies to optimize ad campaigns** to achieve this ROAS? 🚀

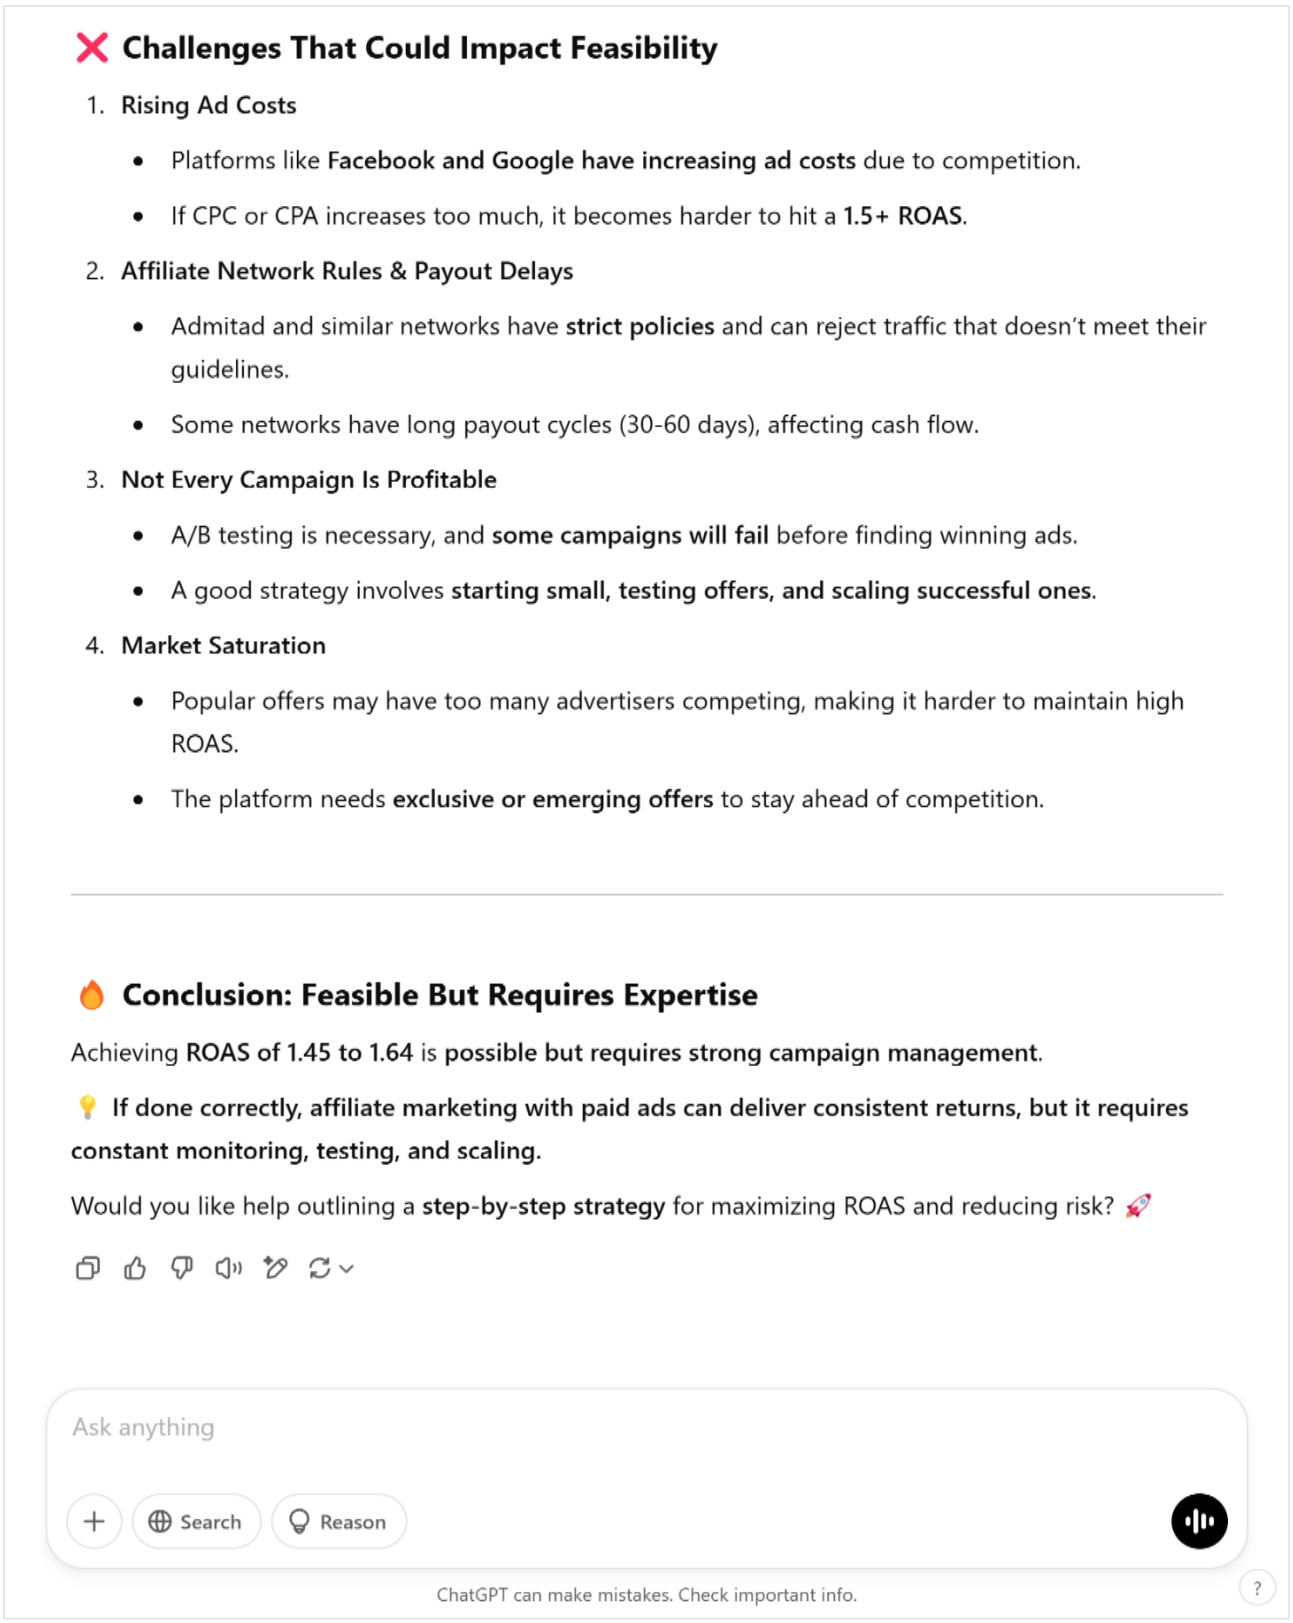
Do you think this kind of profit is feasible?

Yes, achieving a **ROAS of 1.45 to 1.64** is feasible, but it depends on several **key factors** in affiliate marketing and paid advertising. Let's break it down:

✅ Factors That Support Feasibility

1. **Well-Optimized Ad Campaigns**
   - With proper audience targeting and A/B testing, it's possible to get **high conversion rates** that push ROAS above 1.5.
   - Platforms like Facebook Ads, Google Ads, and TikTok Ads can deliver strong results when optimized.
2. **High-Payout Affiliate Offers**
   - Offers with high commissions (e.g., finance, software, gaming, health, and high-ticket e-commerce) tend to perform better.
   - Some offers pay **$50-$500 per conversion**, making it easier to reach the target ROAS.
3. **Retargeting & Lookalike Audiences**
   - Retargeting past visitors can **increase conversion rates**, reducing ad costs.
   - Lookalike audiences (based on past buyers) can also improve ROAS.
4. **Geographic Targeting & Ad Cost Management**
   - Running ads in countries with **lower cost-per-click (CPC) and cost-per-action (CPA)** can help maximize returns.
   - For example, promoting offers in Tier 2 & 3 countries can yield **higher ROAS** than Tier 1 markets.

❌ Challenges That Could Impact Feasibility



❌ Challenges That Could Impact Feasibility

1. **Rising Ad Costs**
   - Platforms like **Facebook and Google have increasing ad costs** due to competition.
   - If CPC or CPA increases too much, it becomes harder to hit a **1.5+ ROAS**.
2. **Affiliate Network Rules & Payout Delays**
   - Admitad and similar networks have **strict policies** and can reject traffic that doesn't meet their guidelines.
   - Some networks have long payout cycles (30-60 days), affecting cash flow.
3. **Not Every Campaign Is Profitable**
   - A/B testing is necessary, and **some campaigns will fail** before finding winning ads.
   - A good strategy involves **starting small, testing offers, and scaling successful ones**.
4. **Market Saturation**
   - Popular offers may have too many advertisers competing, making it harder to maintain high ROAS.
   - The platform needs **exclusive or emerging offers** to stay ahead of competition.

🔥 Conclusion: Feasible But Requires Expertise

Achieving **ROAS of 1.45 to 1.64** is **possible but requires strong campaign management**.

💡 **If done correctly, affiliate marketing with paid ads can deliver consistent returns, but it requires constant monitoring, testing, and scaling.**

Would you like help outlining a **step-by-step strategy** for maximizing ROAS and reducing risk? 🚀

Ask anything

+ Search Reason

ChatGPT can make mistakes. Check important info.

In conclusion, according to ChatGPT, a system like NT's is possible and can lead to obtaining the declared gain.

For those wishing to learn more about the topic, you can find the original conversation on ChatGPT.

11.3 Reviews

We also investigated how the platform is viewed by the online community.

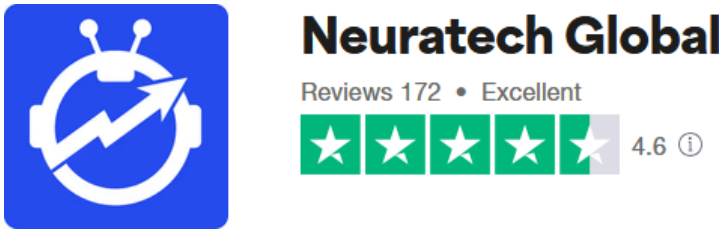
The well-known Thrustpilot platform was taken into account.

For those who do not know it, here is a brief description:

*"**Trustpilot** is an online platform where users can leave reviews about companies and products. It helps consumers share feedback and businesses manage their reputation through review responses. Each company has a score, called **TrustScore**, based on the reviews it receives." (Source: ChatGPT)*

Well, as of January 2025, the company's ThrustScore is a whopping **4.6 out of 5**.

See for yourself on Thrustpilot the updated score.



11.4 User Questions

Here are some questions that have been asked by some users.

Question 1: but if they have created such an advanced system, why don't they put the money there instead of looking for investors?

Answer 1: Of course they could, but having investors guarantees you a much larger budget, and sharing their earnings with us is a small price to pay for being able to earn much more than doing it on their own.

Question 2: Is this a Ponzi scheme?

Answer 2: To answer this question first we need to understand what a Ponzi scheme is.

*"A **Ponzi scheme** is a financial scam in which the earnings promised to investors come from money paid by new investors, rather than from real profits generated by an economic activity. The organizer attracts new investors with the promise of high returns, but pays profits to existing investors using funds from newcomers. This scheme inevitably collapses when there are no longer enough new investors to support the payments." (Source: ChatGPT)*

Since the earnings come mainly from advertising campaigns thanks to the **publisher activity with Admitad** and not from the registration of new members, this cannot be called a Ponzi scheme. In fact, to undertake this business it is not necessary for subscribers to bring in new investors. There is still a small incentive of 5%, for those who bring their friend, on the amount invested by the latter in the platform, but unless you have a large amount of affiliates it is very little if compared to the income from advertising campaigns.

Question 3: but does the company at least exist? Does it have a registered office?

Answer 3: below are the related data and government links to the respective offices:

Operational locations from 2024

- PGSI MANAGEMENT LTD
  3 More London Place, London, England, SE1 2RE. #15661994
- NEURA TECHNOLOGIES LIMITED
  700 Nathan Rd Mong Kok Hong Kong. #76934029-000-08-24-8
- NEURATECH GLOBAL LIMITED
  222 Queen St, Ottawa, Ontario, K1P 5V9, Canada. #1001007469

Operational locations from 2025

- SIYATECH LTD

P.O BOX 8493, Ronald Ngala St, Nairobi, Kenya. #PVT-JZUAZ3E5

- ZAMPROCESS VENTURES LIMITED
  10993 Chip Chipalo Road, Kabwata, Lusaka, Zambia. #120251018218

The company has announced that new offices will be opened, in order to better operate in other parts of the world and respond to the growing influx of new investors.

12. Contacts

Below are links, channels and contacts for info and assistance.

12.1 Official links

Be wary of those who send you unofficial links, they could be scam sites pretending to be NTs.

The list of official links is as follows:

- Main Site
  - neuratech.global

- Official Mirrors
  - neuratech-mirrors.com *(updated list of official mirrors)*
  - neuratech.ba *(mirror for Bosnia and Herzegovina)*
  - neuratech.cc *(mirror for the Cocos Islands "Australian Territory")*
  - neuratech.su *(mirror for Russia)*

What is a Mirror?

*A **mirror** is an identical copy of a website hosted on another server and accessible through a different domain.*

Purposes of Mirrors in Web Domains

- ***Redundancy and Availability:** If the primary server is offline or overloaded, users can access the mirror copy.*
- ***Load Balancing**: Distributes traffic across multiple servers to improve performance.*
- ***Geographic Accessibility:** Allows users in different parts of the world to access content faster by choosing the nearest mirror.*
- ***Backup and Security:** If the main site is compromised or corrupted, the mirror can serve as a backup.*
- ***Censorship and Alternative Access:** If a site is blocked in one country, it can be made accessible through a mirror with a different domain.*

(Source: ChatGPT)

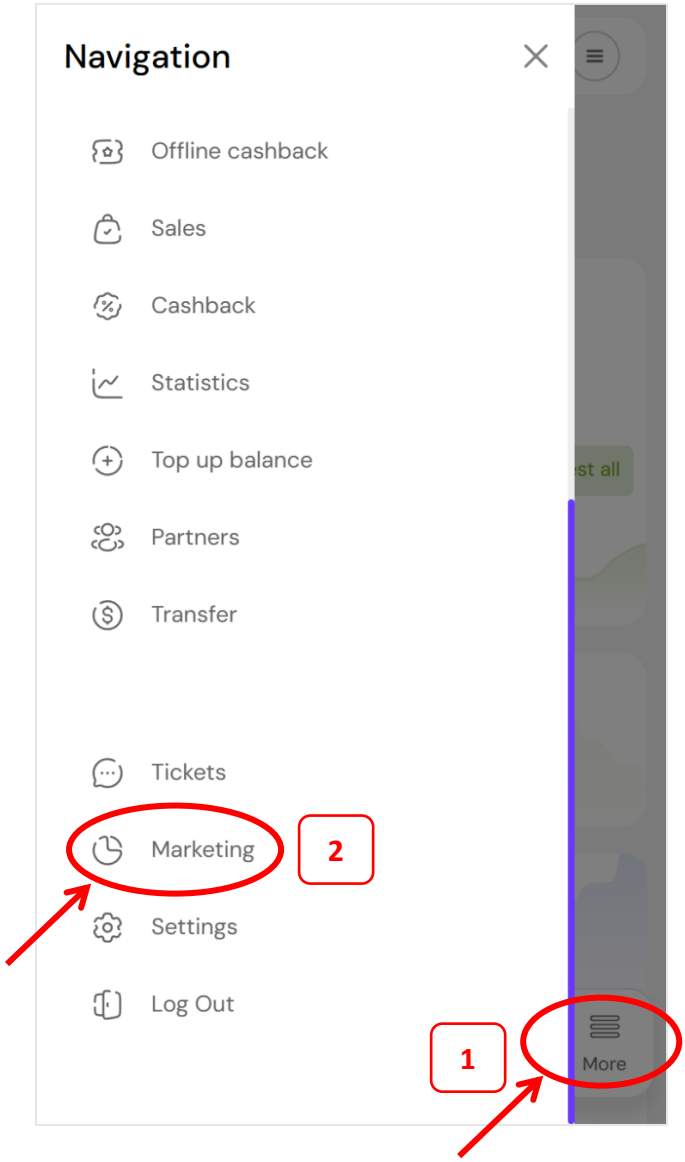
12.2 Official channels

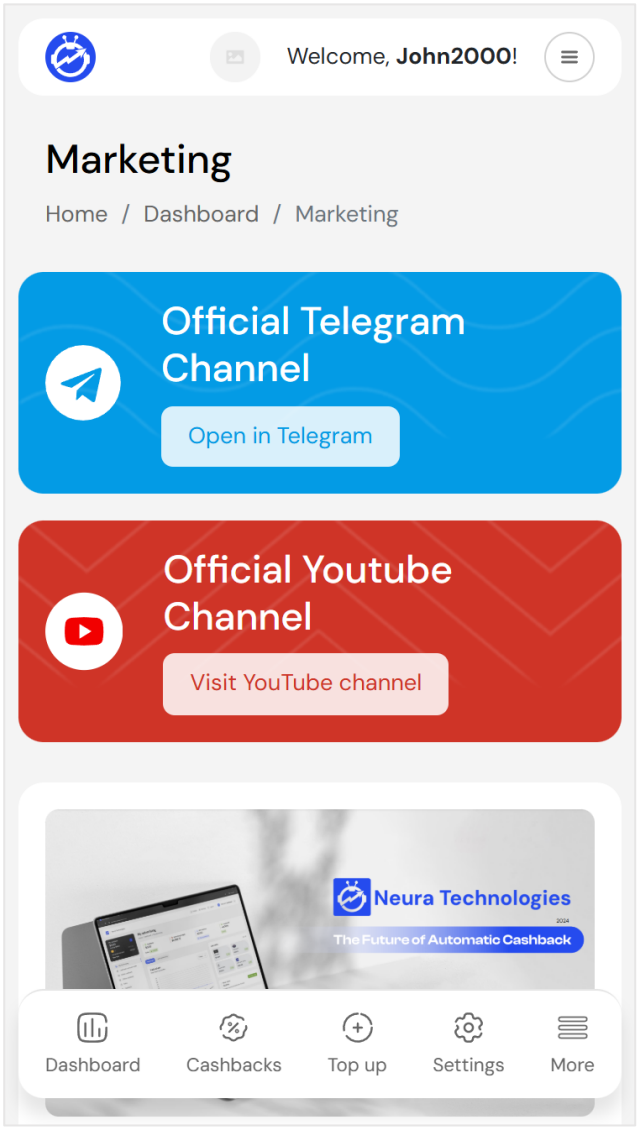
Telegram: https://t.me/neuratechnologies

YouTube: https://www.youtube.com/@NeuraTechnologiesGlobal

You will also always find the official channels updated in the marketing section.

ATTENTION!!! There are no official apps that can be installed from the App store, Play store or similar, NT can only be reached from any internet browser, apps that proclaim themselves as such are actually FAKE and are intended to steal your NT access data. DO NOT INSTALL THEM!!

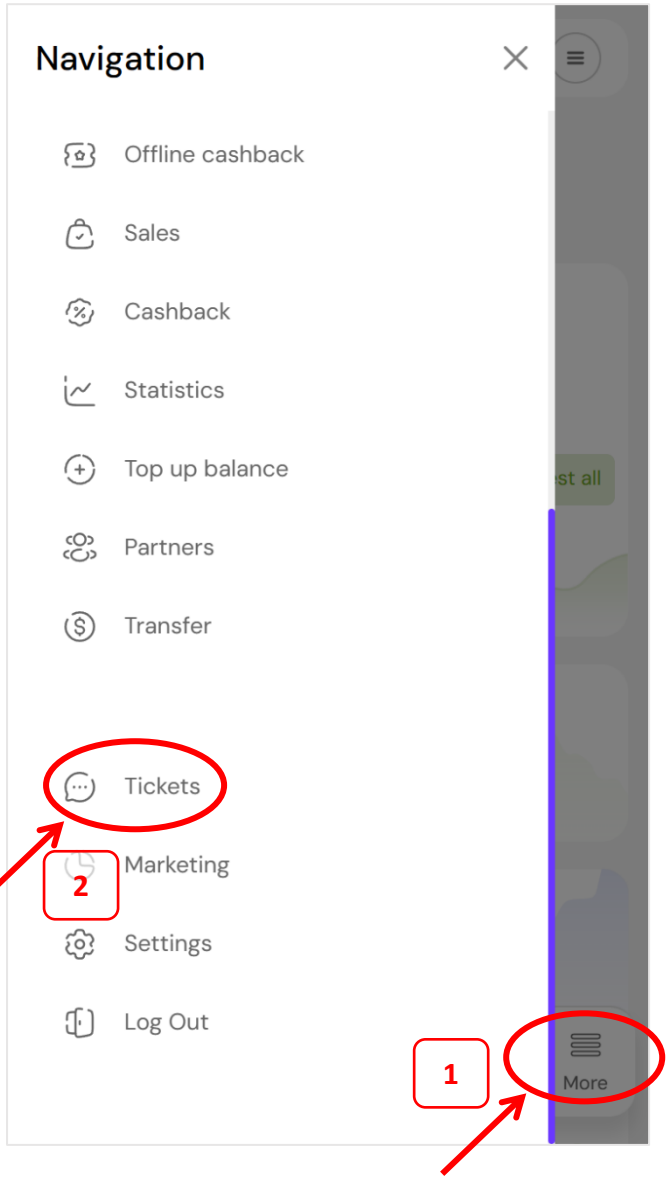


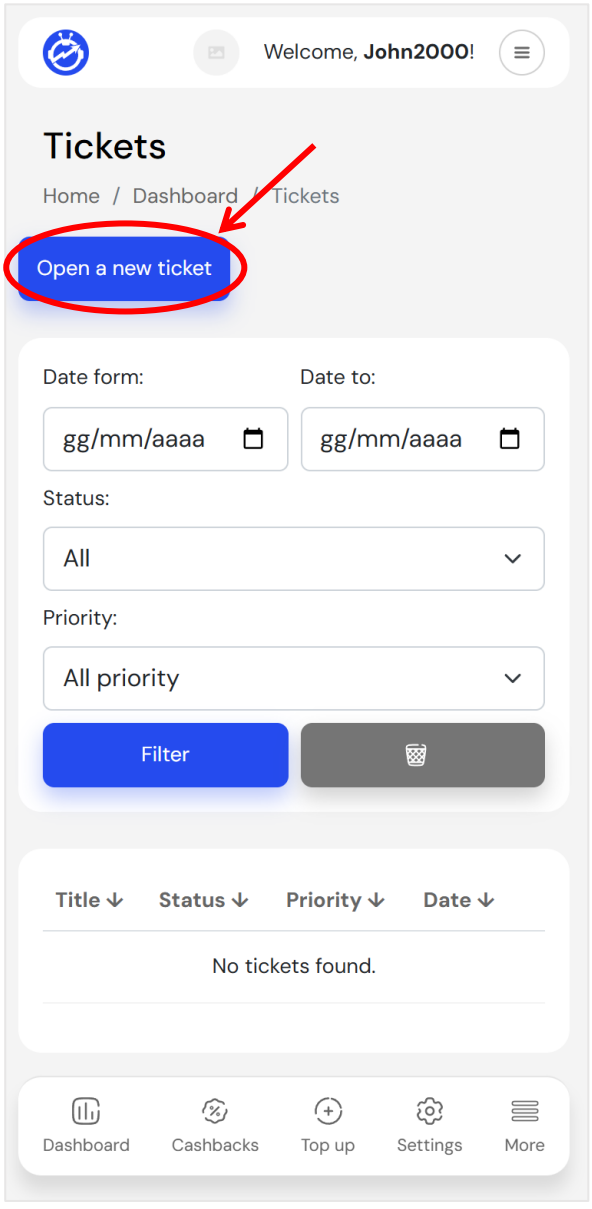


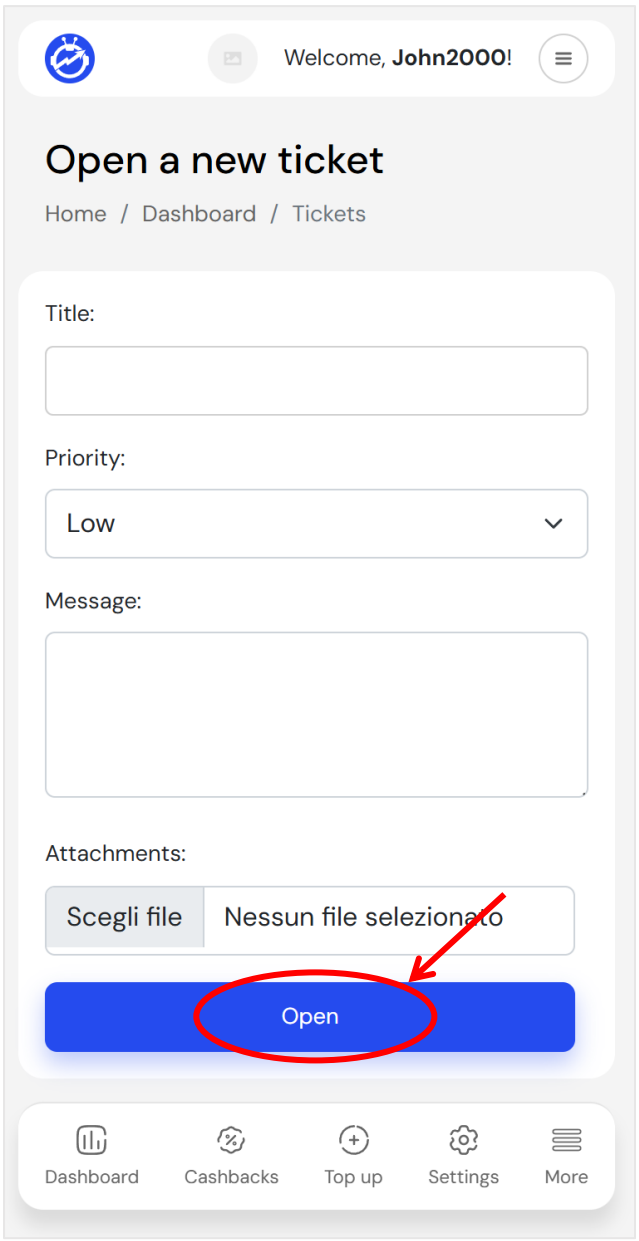
12.3 Official Support Channel

For any problem related to the platform, you can contact support by email at support@neuratech.global, or you can open a support ticket, an operator contact you as soon as possible.

Below you will be shown how to open a ticket.

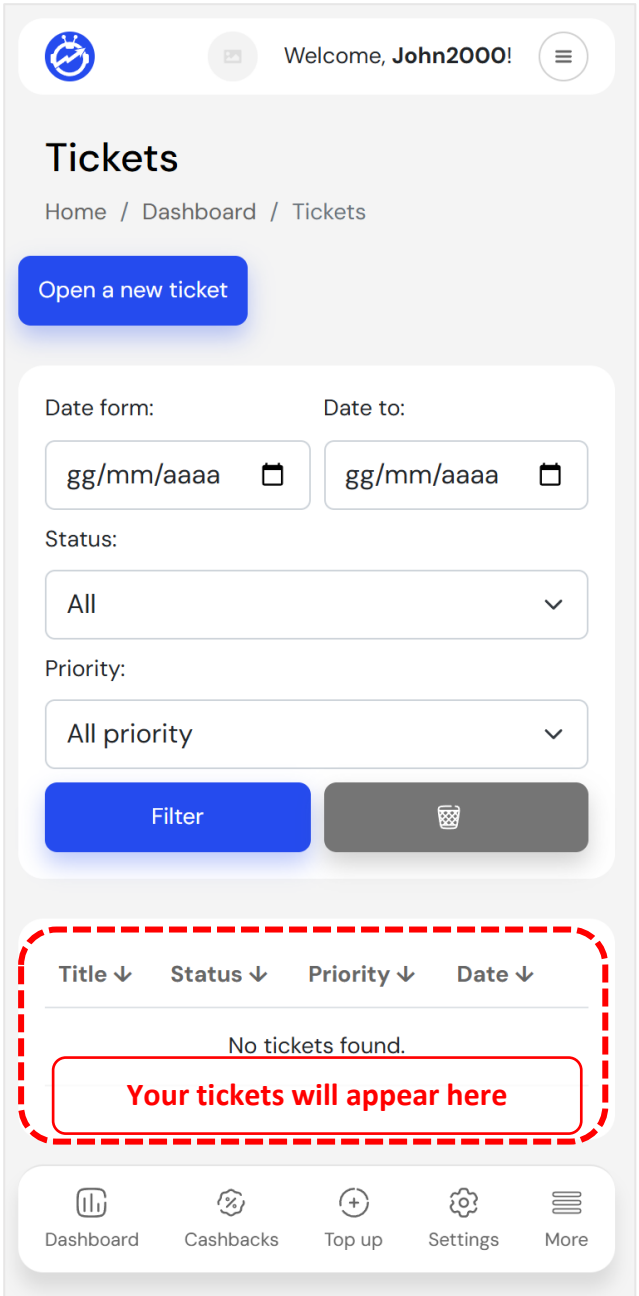






Fill in the fields and attach a screenshot of the problem, then confirm by clicking on "Open".

Then you will have to wait for the operator's response, you will find the list of open requests and answers at the bottom of the ticket section.



12.4 Unofficial channel for information

Our community has decided to open an **unofficial channel** for requesting information, we will be happy to help you in the registration and start-up phases of the platform.

We also welcome suggestions for improvement of this manual.

You can contact us at the following address: neurabot.global@gmail.com.

Please write to us in English.

Remember, this is not an official channel, so if you have any technical problems, please contact the official support channel.

12.5 Keep up to date

You can always find the latest update of this manual at:

Telegram

13. Latest news

Below are the latest important news, from the most recent.

News of 31 March 2025

Finally something is moving.

In fact, some users declare that they have received part of the funds recovered by NT on their account, more precisely the equivalent of their "Neura Protect Found > Budget ADV covered" has been credited to "ADV balance", this has meant that in 24/48 hours it was regularly processed and passed to the status of "Advertising budget", therefore on Sunday 30 March, those who preferred to wait, could finally reactivate their NeuraBots.

Unfortunately, it is not known how much longer it will take to get the remaining credit back, but we do know that the NT team is working hard to resolve the issue as soon as possible.

We have therefore opened a ticket to ask for information, this is the answer we were given.

"Hello! Thank you for your patience. We are working hard to unlock the cashback and deliver it to you. These things take time, but we are working on them! We will let you know as soon as we have a definitive answer."

Stay tuned.

News of 17 March 2025

Below is the official communication.

*"**Important update!***

We're excited to share some significant developments:

- *Enhanced Advertising Power: A substantial portion (75%) of previously held advertising funds have been released and credited to your ADV balances.*
- *Secure Past Campaigns: All previous ad campaigns are now fully supported by the Protect Fund and company resources.*
- *Rapid Campaign Activation: These newly available funds will allow us to launch new campaigns quickly, within our usual 48-hour interval.*
- *Final Updates on the Upcoming Budget: The remaining portion of the frozen advertising budgets will be distributed to the ADV sales in the coming days.*

Our commitment remains strong:

We are committed to transparency and delivering on our promises. In a week's time, we'll provide a detailed update on the Protect Fund, focusing on the plan to offset and release the previous frozen cashback.

As a reminder, site activity has been fully restored to its normal state:

- *All cashback and affiliate commissions are processed without any problems.*
- *Withdrawals are completed within a few hours.*

Exciting future developments:

- *We are expanding our network with numerous new business partners this month.*
- *A modernized Dashboard and user interface, incorporating the latest features, will be launched later this month.*
- *The online and offline cashback functionality is scheduled for April.*
- *Neura cashback credit cards, starting with virtual versions and followed by physical cards, will arrive soon.*

We are committed to transparency, delivering on our promises, and providing a superior experience for our users. We appreciate your patience and continued support as we continue with these exciting developments."

That's all.

Stay tuned.

News of February 27, 2025

We inform you that for the first time since the platform has been operational, the emergency procedure of the Protection Fund has had to be activated.

What happened?

The procedure was activated because following the purchase of advertising campaigns by malicious users, with the use of stolen credit cards, NT's Canadian bank accounts were frozen.

Unfortunately, this inevitably led to the blocking of the platform's operation, as it was no longer possible to purchase new advertising campaigns.

Therefore, NT is committed to collaborating with law enforcement, to provide the data necessary to identify fraudsters.

While waiting for the bureaucracy to take its course and for the funds to be released, an emergency procedure has been activated to reactivate the platform as soon as possible.

What will happen in the future?

The NT team is opening new bank accounts and new accounts on advertising platforms to get the business going again. At the same time, the accounts of all users are being recalculated and the funds to be recovered are verified.

Subsequently , new advertising campaigns will be reactivated with the funds still available.

The revenues deriving from the protection fund for new advertising campaigns will cover the amount of blocked funds.

What should I do?

The only thing to do is remember to reactivate the NeuraBot as always every Sunday and wait for the NT team to start the new advertising campaigns and then recover the funds.

How do I verify the recovered funds?

For all those who have funds to recover, they will see progress below their cashback card. As always, 55% of the cashback will be the new income from advertising campaigns, while the remaining 45% will go to cover losses on the screen relating to the protection fund.

You can consult the operation of the procedure in the Protection Fund section.

While all users not affected by the problem or who joined the platform after the block, will be able to operate regularly and without problems.

Conclusions

The NT team proved to be quick to find a solution, transparent in explaining what happened and what the future would hold, confirming the seriousness and commitment they are putting into this project.

However, it is hoped that these events will not happen again, as we have seen, trying to launder stolen money through NT is not possible as being a serious platform, it complies with the regulations of the countries in which it operates.

14. Frequently Asked Questions (FAQs)

Below you will find a series of answers to the most frequently asked questions.

14.1 General

What is Neura Technologies?

Neura Technologies represents the future of automatic cashback: it offers an advanced platform to optimize advertising budgets and increase sales through an AI-powered cashback system.

How does the cashback system work?

The Neura Technologies platform allows users to earn cashback for purchases made in online and offline stores. Users receive cashback based on predefined criteria, with a portion of earnings directed to the NeuraBot Protect Fund to protect against returns and order cancellations.

How do ad campaigns affect my cashback?

The success of advertising campaigns depends on various factors, including consumer behavior and market conditions. We recommend that you monitor your campaigns closely and adjust them as needed.

How does NeuraBot help businesses?

NeuraBot is an AI-powered automated cashback platform that helps businesses attract customers, increase sales, and gain valuable insights to optimize their marketing strategies.

Where are NeuraTech's offices located?

NeuraTech Global operates internationally, with offices currently in the UK, Hong Kong and Canada. Additional offices are planned in New York, Dubai, Singapore, Paris and Dublin.

How does AI affect the platform?

AI automates processes, analyzes consumer behavior, and offers personalized offers, improving the efficiency of cashback systems and helping businesses better understand their customers.

How can I earn cashback online?

Simply shop through our platform at your favorite online retailers and earn cashback on every purchase. The system automatically tracks your spending and credits cashback to your account effortlessly.

What additional features does the platform offer for online cashback?

The Neura Technologies platform provides access to exclusive offers and higher cashback rates, allowing you to maximize your savings. The user-friendly interface makes getting cashback easier than ever.

How does NeuraBot's artificial intelligence work?

NeuraBot uses advanced machine learning and big data analytics algorithms to offer personalized cashback offers to each user. The system is constantly adapting to changes in the market, providing the best possible cashback offers.

Who are NeuraTech Global's partners?

NeuraTech works with a wide network of partners in various industries. This helps us improve our AI solutions and expand our global presence, ensuring a convenient shopping experience for consumers and powerful analytics tools for businesses.

When was NeuraTech Global founded?

NeuraTech Global was founded in 2010 with the vision of leveraging artificial intelligence to create innovative solutions that transform industries. Our journey began with a small team of passionate technologists who recognized the untapped potential of AI for radical improvements in day-to-day tasks and business processes.

How do you ensure safety?

We ensure the security of your data through advanced encryption technologies and security protocols, ensuring that your information is protected at all times.

What is NeuraTech's mission?

Our mission is to change the way you save and invest, offering innovative solutions for smart spending and growing success.

14.2 Platform

What cashback rewards can I receive?

Users are rewarded based on predefined conditions. For each successful purchase, users can receive up to 55% cashback, while 45% is allocated to the protection fund to safeguard against risks.

What is the Unilevel Bonus and how does it work?

The Unilevel Bonus is a system where you earn a percentage from the advertising budgets of your direct referrals and their teams. The higher your turnover, the higher the percentage you earn from each invited attendee.

What is the Ranking Bonus?

The Ranking Bonus rewards you for the growth and balance of your network. As you level up, you unlock additional bonuses based on your team's performance. To qualify, you must maintain an active budget and ensure balanced development across your network.

How does Cashback Booster work?

Cashback Booster offers additional rewards via a $50 gift card system. When your friends use your voucher code to increase their advertising budget, you earn 5% of all future purchases they make. The more you share, the more both you and your friends earn.

Do you have an insurance fund?

Yes, we allocate 45% of the cashback accrued to the NeuraBot Protect Fund. This fund protects users from returns and order cancellations, as well as ensures the financial stability of the company.

Can I check my account myself? How transparent is it?

Yes, you can independently control your account. You have full access to your account activity, sales, and cashback accrued, which ensures a high degree of transparency.

How do I deposit funds?

You can fund your advertising budget through various methods, such as credit cards (Visa, MasterCard, American Express), digital wallets (Apple Pay, Google Pay), bank transfers (SEPA, SWIFT), and cryptocurrencies.

How do I withdraw funds?

You can withdraw funds in a variety of ways, including crypto withdrawals and convenient withdrawals to credit cards around the world.

Are there any fees associated with transactions?

Deposit fees: vary by payment method; There are no fees for cryptocurrency deposits. Withdrawal fees: $2.50 + 4% fee applies to all withdrawals.

What is ADV balance?

The ADV balance is where the funds are held after a top-up. The funds remain in the ADV balance for approximately 48 hours, which is the moderation period before the advertising campaigns are launched. After this period, the funds are transferred to the advertising budget and the budget starts to be spent on generating sales.

How does advertising budget work?

The advertising budget is spent gradually, and the cashback increases as sales are generated. The average profit observed ranges between 25% and 35% per month.

What happens to funds after a sale?

Once a sale is complete, there is a waiting period that varies depending on the store. During this time, the funds remain in a pending state. After the waiting period ends, the funds are transferred to the cashback balance, where they can be withdrawn or reinvested.

What are the minimum amounts for top-ups, withdrawals and reinvestments?

- Minimum reinvestment amount: $10
- Minimum withdrawal amount: $50
- Minimum top-up amount: $50
- Maximum daily withdrawal per account: $100,000

How does the $50 certificate work?

The $50 certificate acts as a "loan," allowing users to test the platform. Users who activate the $50 bonus certificate must return it before making their first withdrawal or reinvestment. Also, the first withdrawal or reinvestment must be at least $100 for users who activate the bonus certificate. After

the first withdrawal or reinvestment, the withdrawal limit returns to $50 and the reinvestment limit to $10.

What is the weekly activation of the robot on Sundays?

Every Sunday, all users must reactivate their robot for the following week. If the robot is not activated on Sunday, the user will have to wait until the following Sunday. While the robot is down, there will be no cashback, sales, and affiliate commissions earned.

What are online cashback and offline cashback?

Online cashback refers to the cashback earned on purchases made through online retailers. Users can receive cashback for their online purchases with participating retailers. Offline cashback refers to the cashback earned on purchases made in physical stores. The ability to earn cashback for offline purchases will soon be available on the platform.

15. Final Thoughts

After thoroughly evaluating the platform over time, it was concluded that it is certainly an excellent opportunity for real earning, even for those who are not experts in the field of marketing or investment.

On the other hand, remember that these can be considered high-risk investments, so as I mentioned at the beginning, only invest what you can afford.

16. Thanks

I thank the team of Telegram groups that disseminate everything related to NT, where you can compare yourself with many other users who have undertaken this business.

In addition, a dutiful thanks to all readers for the great interest and feedback shown for this platform that is expanding more and more day by day.

We and millions of other users can say that we are there, and you?

I wish everyone a happy Cashback!
